GERMAIN'S
 FIFTY-SIXTH ANNUAL
 GARDEN GUIDE

"The New Mary Pickford Sweet Pea" Next Page

GENERAL DIRECTIONS TO OUR PATRONS

SEEDS BY MAIL

IMPORTANT NOTE—The weight limits in the 1st, 2nd and 3rd zones have been increased to 70 pounds; in other zones the limit is now 50 pounds

Parcels Post—Since the installation of the new parcels post law seeds, bulbs, tools, plants and garden supplies (excepting poisons and liquids) may be sent by mail to all parts of the United States, including Alaska, Canal Zone, Guam, Hawaii, Porto Rico and the Philippines. Packages are subject to a limit of maximum weight in the first and second and third zone of 70 pounds; in all other zones of 50 pounds. The maximum size of a package is 84 inches for length and largeness of the girth combined.

Zone Rates—May be had by applying to your postmaster, who will tell you which zone you are in with reference to Los Angeles or upon application we will tell you if you supply us with the name of your postoffice.

For Parcels Weighing 8 Ounces or Less, containing seeds, bulbs or books only, the rate of postage to all zones is 1½ cents for 2 ounces or fraction. (Over 8 ounces the parcels post rates apply.)

On shipments weighing 20 pounds or more beyond the 2d postal zone it is cheaper to ship seeds by express. As the express companies give a receipt for each package, it amounts practically to insurance without cost, whereas it costs extra, according to value, to insure a parcel post package. We guarantee the safe arrival in the U. S. of all seeds shipped by express or insured parcel post.

To foreign countries the parcel post rate is 14 cents per lb. Registration where possible is 10 cents. C.O.D. orders can now be sent to Mexico.

FREE DELIVERY

FOR CERTAIN QUANTITIES OF SEEDS

We Deliver Free in the United States and Possessions, and Mexico, by Parcel Post or Express to any express office at our option all vegetable and Flower Seeds by the Packet, Ounce and ¼ Pound, and up to and including ten pounds. All other articles, including bulbs, are quoted f. o. b. Los Angeles and postage must be added as per table at the right where goods are desired by parcel post.

Purchasers pay transit charges on larger quantities of seeds, and other merchandise, unless otherwise provided.

Please Order Early, thus enabling us to forward promptly. It will hasten forwarding materially, if customers will kindly make up orders alphabetically, as the goods are listed that way in the catalogue. Seeds are also put in compartments in our stores alphabetically, hence an order can be filled more quickly if it is made out in that manner.

Counter Customers—We suggest to those who purchase in person at our store the advantage of having their lists made out before they call. They may be left and called for later, taken at once, or shipped. In any case it is a great saving of time to the purchaser. The list should have full name and address written on it so that our catalogues may be mailed to the purchaser as issued. We also urge early purchases.

Error in the Filling of Orders—We use the greatest care in filling, checking and packing orders. Yet should anything be omitted we will promptly forward when advised. Keep a duplicate copy of your order for comparison.

Remittances may be made by Express Money Order, P. O. Money Order or Bank Draft; if stamps or cash send in a Registered Letter. We must decline sending goods C. O. D. unless 25 per cent. of their value accompanies the order.

Accounts—Parties having no account with us—who order goods without remittance—must furnish satisfactory reference.

NON-WARRANTY

The Germain Seed and Plant Company gives no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of seeds, bulbs, plants or trees they send out, and they will not be responsible in any way for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

Testimonials from Customers—We are always pleased to hear from our customers regarding the results of their gardens. Photographs of gardens and particularly of vegetables and flowers, are thankfully received by us.

Questions and Correspondence—We endeavor to answer promptly all letters of inquiry—which should be on separate paper from orders—but we cannot undertake the planning of entire gardens and grounds.

GERMAIN'S NEW SPENCER SWEET PEA

MARY PICKFORD:

We wish it had been possible for all lovers of Sweet Peas to have been present at Hollywood, June 10, 1925, when "America's Sweetheart" was presented with a basket of flowers of the extremely beautiful variety named in her honor. The Sweet Pea named for Mary Pickford almost equals the little lady herself in both grace and beauty, and we take great pride in offering it here for the first time.

Mary Pickford is one of the choicest Spencer varieties ever introduced and a year ago it received an Award of Merit at the National Sweet Pea Society's Annual Trials.

Mary Pickford is a beautiful light and dainty pink, with just the faintest suffusion of salmon, making the color combination difficult to equal.

Mary Pickford is a sturdy grower, producing an abundance of four flowered sprays on long, stout stems. The flowers are perfectly formed, with both standards and wings decidedly waved.

Mary Pickford—the flower—is to the garden what "America's Sweetheart" is to the screen. Mary Pickford will bloom this spring in all the gardens of America.

Packet..... \$.25

MISS CALIFORNIA:

In Miss California we have a Sweet Pea novelty which compels admiration and attention wherever grown.

The beautiful coloring of the flower cannot be conveyed in a word picture as the blending of the shades is so perfect and wonderful.

The general effect is a rich, beautiful salmon cream pink of a distinctly new shade. The flowers are large, beautifully waved and borne in fours on long, stout stems.

A splendid companion variety to Mary Pickford.

Packet..... \$.25

MARY PICKFORD
HOLLYWOOD, CAL.

Oct. 2,
1925.

Germain Seed & Plant Co.,
Los Angeles, Calif.

Gentlemen:

I want to thank you for the Mary Pickford sweet-pea seeds you so very kindly sent me. This sweet-pea is certainly a lovely flower and I hope that it will find a place in gardens everywhere so that it's exquisite beauty may bring happiness to people of all lands.

Sincerely,
Mary Pickford

THREE BEAUTIFUL SWEET PEAS OF RECENT INTRODUCTION: HEAVENLY BLUE:

A fine new blue, of a most beautiful soft tone of Delphinium blue. The flowers are of immense size, with fours invariably well placed on long stiff stems.

A marked improvement over existing blue varieties, and we believe it will be hard to surpass for many years to come. Packet, 25c.

THE PRESIDENT HARDING:

(Named by special permission of the late President of the United States).

The President Harding Sweet Pea was awarded the highest honors both in America and in England, receiving the only Silver Medal from the American Sweet Pea Society and a Certificate of Merit from the National Sweet Pea Society of Great Britain.

The President Harding is an entirely new color in Sweet Peas—peach-red or salmon-cerise suffused orange.

The blooms are magnificent in every way. They are bold and impressive, yet well proportioned and of exquisite texture. Packet, 25c.

POWERS-COURT:

The splendid new lavender Sweet Pea, Powers-Court, is of English origin and received an Award of Merit from the National Sweet Pea Society of Great Britain.

The variety is a strong grower and has all the qualities of a first class modern Sweet Pea, but it is in the color that its greatest appeal lies. The shade is a remarkably fine, pure lavender. Its popularity is very great among Sweet Pea enthusiasts. Packet, 25c.

Germain's Collection of Sweet Peas of Merit:

The five varieties listed and described separately above have been adjudged by the leading Sweet Pea specialists of the world as the cream of the latest Sweet Pea creations.

Unique distinctions and Awards of Merit have been granted them by experts in America and in Great Britain.

We offer the collection of five outstanding varieties of the year for..... \$1.00

MISS CALIFORNIA

GERMAIN'S PLANTING CHART

VARIETY	Seed for 100 ft. row	Seed for 1 acre	Time of Planting	Put Rows Apart	Leave Plts Apart in Row	Crop Matures in about	Depth of Planting
Artichoke, Globe	2 Pkts.	12 oz. T.	October to May	5 ft.	3 ft.	2nd Spring	1 inch

Catalog Prices Subject to Change Without Notice.

Due to extremely unsettled conditions in the seed market this year we find it necessary to make all catalog prices subject to change without notice. At all times we shall have in mind our customers' welfare, and prices will be consistent with the market.

GARDEN HELPS

You who read this catalog are naturally interested in gardening and garden information. With this thought in mind we have prepared for you a series of bulletins on vegetable and field crops. The list is not complete as yet, and from year to year we will add bulletins dealing with new varieties and methods.

These pamphlets are for the use of our patrons, and a complete set or any particular ones will be mailed, upon your request, free of charge with every order.

The following are the subjects now available:

Artichoke	Celery and Celeriac	Endive	Parsnip	Strawberry	Whipporwill Cow Pea
Asparagus	Chervil	Garlic, Leeks, Chives	Pea, Garden	Water Cress	Planting and Care of
Bean	Chicory	Shallots	Pepper	Watermelon	Trees
Beet, Table	Collards	Kale	Pumpkin	Alfalfa	Success with Flower
Brussels Sprouts	Corn, Salad	Kohlrabi	Radish	Corn, Field	Seeds
Broccoli	Corn, Sweet	Lettuce	Roselle, Okra	Mellotus Alba	Making and Care of
Cabbage	Cress or Pepper Grass	Muskmelon and	Salsify	Mellotus Indica	Lawns
Cabbage, Chinese	Cucumber	Casaba	Sorrel	Mushroom Culture	Bulbs and Their
Carrot	Dandelion	Mustard	Spinach	Rhodes Grass	Culture
Cauliflower	Egg Plant	Onion and Onion Sets	Squash	Sudan Grass	Dahlia
	Turnip	Parsley	Tomato	Sweet Sorghums	

GERMAIN'S PREMIUM GRADE LAWN SEEDS

The H. C. Baker home on Arden Road Pasadena

The accompanying photographs show a few Southern California homes that have been treated with Nuvida Fertilizer.

A well kept lawn, rich green in color, adds hundreds of dollars to the value of your home

Lawn Pamphlet Free

The H. G. Wylie home 17 Chester Place L. A.

We carry a complete line of grass seeds of all kinds. The common varieties are listed below.

KENTUCKY BLUE GRASS—Premium Grade—is the finest grade of Blue Grass on the market. Grown from specially selected strains and in carefully selected fields, the seed gives the greatest satisfaction, due to its quality, purity and freedom from other seed. Per lb. 75c; 10 lbs. \$6.00, postpaid.

WHITE CLOVER. Our seed is strictly first-class, absolutely clean and pure and of the highest quality. Per lb. 90c; 10 lbs. \$8.00, postpaid.

KENTUCKY BLUE GRASS and WHITE CLOVER MIXED. This favorite lawn mixture is made up of Premium Grade Seeds mixed in the right proportion. Per lb. 80c; 10 lbs. \$7.50, postpaid.

AUSTRALIAN, OR PERENNIAL RYE GRASS. An extremely hardy sort, requiring less fertile soil and withstanding more hardships. Used extensively in Arizona and becoming very popular in So. California. Per lb. 35c; 10 lbs. \$3.00, postpaid.

NUVIDA LAWN AND GARDEN FERTILIZER

The verdict of all who have used the Nuvida Lawn and Garden Fertilizer is that it is the most complete and satisfactory Lawn Dressing ever placed on the market. It is manufactured by us and we guarantee that it contains all the elements required and in the proper proportions to produce a luxuriant growth. It is a clean, odorless material and can be applied without offending one's sense of smell or sight. Being quick in action the effect can be noticed within a very short time by the rich green coloring and that velvety appearance so much sought after. Its superiority over stable manure can scarcely be estimated, as the latter, in addition to disfiguring the lawn by its unsightly appearance, also gives out an unpleasant odor, and always contains weeds and other undesirable seeds.

Trial bag for 300 square feet, 10 lbs.	50.60
25 lbs. sacks for 750 square feet.	1.25
50 lbs. sack for 1000 square feet.	2.25
100 lb. sack for 3000 square feet.	4.00

Write For Nuvida Pamphlet

NUVIDA FLOWER AND FERN FERTILIZER

It is of a concentrated nature requiring but very small doses to the plant and will undoubtedly yield good results. We confidently feel assured of its success, because of its purity, its food value, and its proportions of fertilizer elements. Nuvida Flower and Fern Fertilizer, 35 cents per can.

The Lawn is the dominant feature [3] of the American Garden

BERMUDA RAKE

This tool is all machine made, with all working parts detachable, and the metal of each part selected for its particular use. The angle of the teeth, and its weight, keep it in the ground in the heaviest lawn. The sharp blades cut the grass in sections and the cross cutter bar completes the work. A lawn raked and cross raked is free of all runners and the work has left a perfect seed bed to sow clover or grass seed. Brown Bermuda lawns can be skinned in the fall with this tool with a fraction of the labor necessary by any other method. Many lawns burn out in spots because the heavy soil has become impervious. Occasional use of the Bermuda Rake will so loosen the soil it will again take water. Price each \$5.00.

Grass Seeds for Golf Courses

Best for the course
This Trademark
on every bag

Scene at Hillcrest Country Club—recognized as one of California's finest. Course entirely seeded with Germain's PREMIUM Grass Seeds.

The greatest care must be taken to see that seed of the highest quality is sown on golf courses. The result of planting impure or poorly cleaned seeds will be that the cost of weeding the greens, tees and fairways will amount to a very large sum. Germain's "Premium Seeds" for golf courses have been cleaned to the maximum point of purity and all possible weed seeds have been eliminated—and as a result will produce the smooth even and practically weedless turf that is the first essential of a successful course. Germain's "Premium" Seeds for golf courses are packed in sealed bags branded with the trademark appearing in the left hand corner of the above picture. Look for this brand and seal. It is your assurance of quality.

We are listing hereunder the principal varieties of grass seeds that we recommend for golf course purposes. We are not making recommendations of the mixtures that should be used as these vary greatly with conditions. We will be very glad however to have our representative call on any golf course, if desired, to make specific recommendations. Also we have not listed prices after the different varieties as the market conditions on grass seeds vary greatly during the year and govern the price. We endeavor to have our prices at all times as low as possible and consistent with the quality of seed offered. We will appreciate your submitting us a list of your requirements for quotations, or if desired, we will have our salesman call.

The amount of grass seed that should be planted for golf course purposes will run about ninety pounds for the small fine seeds to three hundred pounds for the larger seed, to the acre on fairways. For putting greens we recommend planting on the average about one pound to every one hundred and fifty square feet.

SEASIDE BENT—(*Agrostis Maritima*)—a fine bladed creeping grass grown in Coos County, Oregon—for putting green purposes.

SOUTH GERMAN MIXED BENT. This makes a thickly matted surface that is very desirable for putting greens.

RED TOP (*Agrostis Alba*). A fine bladed grass that is often used in mixture with Kentucky Blue Grass for putting greens and tees. Also excellent for lawn purposes.

HARD FESCUE (*Festuca Duriuscula*). Produces stiff upright leaves. Usually used in mixture with other varieties for putting greens and tees.

RED FESCUE (*Festuca Rubra*). Grows well in dry sandy soils. Roots creep extensively. Often included in putting green mixtures and also used for lawn purposes.

CHEWINGS FESCUE (*Festuca Species*). Used extensively on putting greens, tees and fairways and does well on most any kind of soil. Also produces stiff, upright plant.

SHEEP FESCUE (*Festuca Ovina*). Used chiefly on tees and fairways and sometimes on bunkers. Produces stiff leaves.

VARIOUS LEAVED FESCUE (*Festuca Heterophylla*). Used on tees and sometimes on fairways but not to a very great extent. Is excellent for lawn purposes in shady places.

MEADOW FESCUE (*Festuca Pratensis*). Produces very broad leaves. Used on golf courses for the "rough" and sometimes on fairways.

KENTUCKY BLUE GRASS (*Poa Pratensis*). Produces narrow flat leaves of a very deep green color. Is used very extensively on fairways, greens and tees. This is probably the most important grass for both golf courses and lawns in California.

ROUGH STALKED MEADOW GRASS (*Poa Trivialis*). Used both for putting greens and fairways and makes an excellent turf. Also is very satisfactory for lawns in shaded places. Leaves are narrow and flat.

WOOD MEADOW GRASS (*Poa Nemoralis*). A very fine bladed grass, used in mixtures for shady spots.

AUSTRALIAN RYE GRASS (*Lolium Perenne*). Can be used for a quick growth on fairways or "rough". Will grow well on poor soil. Also used for lawn purposes.

PACEY'S (Pacific) RYE GRASS (*Lolium Perenne*) (Pacey). As smaller seeded and finer leaved plant than the Australian and used for the same purposes.

BERMUDA GRASS (*Cynodon Dactylon*). A broad leaved, creeping grass. Used to quite an extent for fairways, polo fields and athletic fields. Will stand a great deal of hard usage.

WHITE CLOVER (*Trefolium Repens*). Used extensively in fairways with Blue Grass. Also used to a great extent for lawn purposes.

BUR CLOVER (*Medicago Arabica*). Used to a great extent on fairways in California. A very hardy plant.

SEMESAN

Semesan is the new mercuric disinfectant for the prevention and cure of the brown patch on golf course grasses. Write for special booklet on this wonderful new preparation and see page 87 for prices. No golf course can afford to be without Semesan.

NUVIDA FERTILIZER

is admirably adapted for golf course purposes, containing all the elements in proper proportion for plant life. It is weedless, odorless, effective and economical. Write for special quantity prices and further information. See page 3.

NURSERY DEPARTMENT

Included in the following pages will be found a comprehensive list of nursery stock in the way of rose bushes, shrubs, vines, fruit trees, bedding plants, grape vines, small fruits and vegetable plants. Our aim is to supply only the best stock available at reasonable prices.

The Germain Seed and Plant Company has been in the business of growing and distributing of plants to the gardens of California and the southwest since 1871, establishing during that period a reputation for honest dealing and quality merchandise, a reputation that we are bending every effort to maintain.

LOLITA ARMOUR—See description on page 7

COCHET—See description on page 10

SHIPPING. Express shipments of Nursery Stock travel under what is known as the "General Special" Rate, which is 20 per cent less than the first-class rate. We would advise having shipments too large for parcel post go by express as we consider freight too slow for goods of such a perishable nature.

NON-WARRANTY. We exercise the greatest care in the selection, packing and labeling of plants and trees, but give no guarantee, express or implied, as to their growth, productiveness, quality, or any other matter of any trees, plants or seeds that we send out, and will not be in any way responsible for crops. If the purchaser does not accept the goods on these terms, they must be returned at once.

SUBSTITUTION. Where particular varieties are ordered and particular ages and sizes of trees, kinds of stock, etc., it should be stated whether and to what extent substitution will be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection of varieties is left entirely to us, we shall endeavor to send only such sorts as are acknowledged to give general satisfaction.

AS USUAL, six of any one certain variety will be furnished at dozen rates; 50 at 100 rates; 500 at 1,000 rates.

CLAIMS. Should any errors occur we desire to be informed upon receipt of goods, that we may rectify them without delay. All claims must be filed within ten days after the arrival of shipments. No plants shipped C.O.D.

CAUTION. Be careful in unpacking to note everything, and either plant, or cover up with moist soil at once. Moisten the roots, and do not allow them to become dry.

PLANTING. Dig holes large enough to allow the roots of the tree to spread out in their natural position, carefully placing the finest and best soil from the surface in among the roots; when the soil is nearly filled in, thoroughly settle the earth by filling the hole with water; after it settles, fill in the remainder of earth. In most soils, the use of water to settle the earth is much better than treading the soil with the foot.

AFTER CULTURE. The ground should be kept loose and free from weeds. It is advantageous in a dry climate to throw around the tree, for a distance of two or three feet each way, a mulch of rough manure or litter. It prevents the ground from drying out and baking.

PLANT AND SEED ORDERS should be kept separate, as during our rush season we may run short of some varieties of plants or trees and this sometimes causes a slight delay in receiving consignments from our various growing grounds. The rush of business is terrific during the winter and spring in the Nursery Department and orders cannot always be shipped at once. With our present facilities we hope to have but few delays in filling orders, but in cases where the nursery stock cannot be shipped at once, the seed orders will be shipped at once, and balance of order will follow when ready.

ROSES

The season of 1926 ushers in a number of new roses remarkable for their color, form, and beauty. On the following page the new varieties are described in words which can only very inadequately give one a true image of their worth. Such roses as the Pernet, Padre, Lulu, Climbing Los Angeles and others are far superior to the older varieties and will add charm and beauty to any garden.

Our stock of roses is very complete. The following pages besides describing the new varieties also contain listings of the better roses among the older varieties.

IMPORTANT NOTICE

All prices on Roses in this catalog are on dormant or bare root stock for shipment after January First and before April First. After April First only established roses taken from gallon cans can be shipped. Add twenty-five cents to the price of each rose for shipment after April first.

For the convenience of our patrons we are listing below several collections of roses, all first grade stock at lowered prices. No substitutions are allowed in these collections.

ROSES

NOVELTIES AND SPECIALTIES FOR 1926

Bush Roses

- GOLDEN EMBLEM.** Flower similar in color to "Constance" and having the same crimson stripe on outer petals, with high pointed center; tea perfume. Growth free and branching with splendid constitution, deep glossy green foliage, stout stalks and mildew-proof; extra perpetual flowering. One of the best yellow roses grown. **1.25**
- HADLEY.** See Back Cover **.50**
- HOOSIER BEAUTY.** In our opinion, one of the finest red hybrid tea roses in existence. A rose of American origin and one which easily out-distances most other reds on the market. Flowers are of superb form, not unlike a perfect Sunburst in shape. They are beautiful. **.75**
- IRISH FIREFLAME.** See Back Cover **.50**

PADRE—Description on this page

- THE WONDERFUL PRIZE WINNING ROSE "LOS ANGELES".** It is a rose without a fault. It is strong in growth, sending out enormous canes clothed with dark, handsome foliage. The foliage is mildew proof. It is hardy, deliciously fragrant and during the spring, summer and autumn months produces an endless succession of ravishingly beautiful blossoms. The buds are long and pointed and expand to a flower of glorious size. Its color is of transcendent beauty, being an indescribable tone of flame pink, with superb golden yellow shadings at the base of the petals. **.75**
- LULU.** A new rose of English origin and considered by us to be the best of its kind. The color is a pure apricot, the buds being long and pointed and quite similar to Irish Fireflame in form, but with twice as many petals. **1.00**
- MAD. EDOUARD HERRIOTT.** The famous Daily Mail Rose. Winner of the \$5,000 prize at the International Horticultural Exposition held in London, England. Buds coral red shade with yellow at the base. Open flowers of medium size, when fully expanded they take on a superb coral red color. **.75**
- MRS. H. R. DARLINGTON.** A long felt want in a white rose. Buds are creamy white, but turn to pure white as the flower expands. A rose of delightful fragrance and beautiful form. A very desirable variety in every way. Awarded the Gold Medal by the British National rose society. **1.25**
- MISS LOLITA ARMOUR.** Regardless of color, we doubt if there are any more beautiful. The color is difficult of description, but may be briefly described as follows: Chrome yellow at the base, shading to burnt orange and copper. The reflex of the petals is chrome yellow at the base, shading to bright salmon with brilliant copper suffusion. The flower is quite double. **.75**
- PADRE.** An exquisite new variety in a color that is distinct from any other. The bud is long and pointed borne on a strong stem with dark foliage. The color is a beautiful shade of coppery orange crimson with yellow shadings at the base of the petals. A splendid cut flower variety and a strong, vigorous grower. **1.25**

- QUEEN ALEXANDRA.** A remarkable combination of color may be noted in this magnificent new rose. A combination which is not only startling, but of peerless beauty as well. It is a two-toned rose with the upper side of the petals a glorious shade of vermilion, the reverse side being old gold. The petals of the entire flower toward the base merging from this remarkable shade to pure golden yellow. **1.25**
- ROSE MARIE.** Amongst the various Roses which we have had under trial there are but few more meritorious than this magnificent American novelty. The buds are long and pointed, the petals large and well-rounded, and the open bloom ideal as to form. The color is a delightful shade of pure rose pink. Highly recommended. **.60**
- SOUVENIR DE CLAUDIUS PERNET.** See Back Cover. **1.25**
- SOUVENIR DE GEORGES PERNET.** Flower of beautiful Orient red color, the end of petals cochineal carmine, shaded with yellow, very large, full and globular, oval bud carried on erect stem. A vigorous grower of branching habit, with few long thorns and bronze green foliage. This wonderful variety will be a precious addition to the Pernetiana class, being very vigorous and absolutely hardy. An abundant bloomer. **1.25**
- SOUVENIR DE H. A. VERSCHUREN.** A new variety that is bound to attract a lot of attention. The color is deep golden yellow. Flowers are double and intensely fragrant. Stems are long and stiff. A very fine variety. Stock scarce. **1.00**
- UNA WALLACE.** This is without doubt the best of all pink roses and quite distinct from any other variety. A beautiful shade of soft cherry rose without any shading. It is a very strong grower and a free bloomer, has excellent foliage and perfect form. It is exceedingly fragrant. **1.00**
- WM. F. DREER ROSE.** The flowers, which are similar in shape to Los Angeles, and like that variety, beautiful in all stages of development, are at their best in the half-expanded flower. These, in expanding, are of a soft, silvery shell-pink, the base of the petals of a rich golden-yellow, which, at certain stages of development, gives a golden suffusion to the entire flower. **.75**
- COLLECTION.** One each of the above new roses, 17 in all for **\$12.85**

MRS. AARON WARD—See page 9

Climbing Roses

- CLB. YELLOW CECIL BRUNNER.** New form of the ever popular Clb. Cecil Brunner. Embodies all points of the pink variety. Fills a long felt want for a baby yellow climber. Very floriferous. Bright apricot yellow. **1.00**
- PAUL'S SCARLET CLIMBER.** It is a climber with splendid foliage and glorious vivid scarlet flowers. These are borne in wonderful profusion. A plant in bloom arrests the attention at once. Although only introduced a few seasons ago from England, it has already taken a high position amongst hardy climbing roses. **.50**
- CLIMBING LOS ANGELES.** See Back Cover. **2.50**
- COLLECTION.** One each of the above new climbing roses for **\$3.35**

BUSH ROSES

THE FOLLOWING VARIETIES ARE ALL 35 CENTS EACH, POSTPAID

CECILE BRUNNER. This is the popular Baby Pink or "Sweet-heart" Rose. In the past year or two this Rose has fairly jumped into popularity. It has become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds. Color, blush, shaded light salmon-pink; distinct and desirable.

DUCHESS OF WELLINGTON. Intense saffron yellow, stained crimson. As the flower ages it becomes a deep saffron yellow. Blooms fairly full, buds long and pointed, very free flowering. Exceedingly fragrant.

ETOILE DE FRANCE or STAR OF FRANCE. A brilliant shade of clear red-crimson velvet, centering to vivid cerise; large flowers on long, stiff stems; remarkably vigorous, free-blooming and hardy, with bronzy-green foliage.

GENERAL McARTHUR—See description on this page

GEN. McARTHUR. One of the most popular and freest blooming of all red garden Roses. Color is a bright rosy crimson. It is not subject to mildew. Especially valuable for bedding purposes.

IRISH ELEGANS. A beautiful single bush Rose of fine form, long and pointed. Color bronzy-orange to pink, shaded to apricot. An excellent Rose.

KAISERIN AUGUSTE VICTORIA. A free, healthy grower, with splendid foliage and superb buds. Pure white, occasionally tinted with cream at the center of the open flowers.

LA FRANCE. Silvery-rose, with pink shades and satin-like petals of unsurpassable beauty; large, symmetrical and deliciously fragrant blooms from June until frost; hardy with protection.

LA TOSCA. Flowers silvery pink, tinted with rosy white and yellow, very large, full, opening well. Growth very vigorous. Flowering continuously. Very good.

MME. ABEL CHATENAY. Lovely shade of salmon pink, especially useful as a winter blooming Rose, in the warmer sections of the country. Buds and open flowers ideal as to form.

MAMAN COCHET. Deep rose-pink inner side of petals silvery rose, very double. Extra strong grower; fine bloomer. The finest Rose by far that has yet been introduced for a long time. We can confidently recommend it.

MRS. A. R. WADDELL. Reddish apricot toned with salmon. An odd type in Roses, the petals being somewhat loose and irregular in formation. As a garden Rose it is without an equal. Before the buds expand it is ideal for cutting purposes.

OLD GOLD. The tint is a vivid reddish-orange with rich coppery-red and coppery-apricot shadings.

PERLE D'OR. Coppery-gold, changing to fawn; very double and exquisitely perfumed. Baby Rose.

PINK KILLARNEY. A lovely shade of clear, soft pink. An ideal cut flower Rose, on account of its splendid bud formation. Deliciously fragrant.

SUNBURST. Orange-copper or golden-orange and golden-yellow, all intense shades, giving an extremely brilliant effect. A giant Rose, long stems, long, pointed buds, vigorous, free and healthy, with splendid keeping qualities as a forcer and also an excellent bedder.

YELLOW CECIL BRUNNER or GEORGE ELGER. The long sought for baby yellow rose. Size and habit is the same as the Pink Cecil Brunner and this splendid sort is just as free flowering as the pink variety.

Collection of one rose of each of the varieties listed above for \$4.75

Collection of any dozen of the above varieties for \$3.45

THE FOLLOWING LIST OF ROSES ARE ALL 50 CENTS EACH, POSTPAID

AMERICAN BEAUTY. One of the best Roses for the hot interior sections of the Western United States. Does magnificently in Arizona, Imperial section, etc. Throws especially fine, large blossoms during early fall and spring.

AMERICAN LEGION. Bud well-shaped, globular; flower large, full, lasting, cerise-red throughout; fragrant; foliage large, glossy, reddish-green.

BETTY. Copper Rose, shaded to golden yellow at the base. Buds long and pointed.

MME. ABEL CHATENAY
See description on this page

BLACK PRINCE. Intensely dark crimson, approaching black; cup-shaped, large and full.

CLARA WATSON. Pearly-white center tinted with pale rosy-peach; a free and continuous bloomer.

COLUMBIA. A Rose which is popular with all cut flower buyers throughout America. In color a delightful shade of rose pink. In outdoor planting the bushes attain a moderate height and blossom freely through a long season.

BUSH ROSES—Continued

CRIMSON QUEEN. Flowers large, of a bright velvety crimson, a strong grower, and a continuous bloomer. Fragrant, and fine for cutting.

CRUSADER. Rich velvety crimson; heavily petaled; big double blooms open perfectly, supported on strong-necked stems. Robust, strong-growing, free-flowering, disease-resisting.

ECARLATE. Flower brilliant scarlet, medium sized, semi-double, of cupped form, fragrant. Growth very vigorous and branching, continuous flowering. Very good.

EDWARD MAWLEY. A gold medal winner. One of the best dark velvety crimson Roses in existence. Color rich and lustrous.

ETOILE DE LYON or STAR OF LYON. Deep golden-yellow; a healthy, vigorous grower, blooming freely early and late; full, deep and rich flowers; very sweet; extremely hardy both as to heat and cold.

FRAU KARL DRUSCHKI or WHITE AMERICAN BEAUTY. An ideal hardy white Rose, pure white in color. A remarkably vigorous grower. Free flowering to a degree. In our opinion, the best of all white Roses.

GENERAL JACQUEMINOT. A celebrated and much sought after variety, both for planting out and pot forcing; shapely buds and handsome blooms of bright, shining crimson, rich, brilliant, velvety and fragrant. Everybody knows and wants the "Jack" for its all around good qualities.

GENERAL-SUPERIOR ARNOLD JANSSEN. Flower glowing deep carmine, long filled and perfumed, finely formed bud on perfect stems. Growth vigorous, compact and continually blooming. Fine for forcing, bedding and cut flower purposes.

GOLDEN EMBLEM—See description on page 7

RED RADIANCE—See description on page 10

GEORGE AHRENDS or PINK AMERICAN BEAUTY. This is the wonderful "Pink American Beauty." The growth and make-up of the plants is superb, while the delicate pink color is unapproachable.

GEORGE DICKSON. Flowers are a dark velvety crimson, splendid form and a very free bloomer, makes a fine cut flower, and a very desirable garden Rose.

GRUS AN TEPLITZ. An ideal red Rose for hedge purposes. Blossoms constantly throughout the year. Color velvety crimson, has a splendid constitution, good clean foliage, strong, upright canes.

J. B. CLARK. Intense deep scarlet, heavily shaded, blackish crimson. Large, full, with immense petals. A vigorous grower and very hardy.

JONKHEER J. L. MOCK. Enormous deep rose-colored blooms, equally beautiful in bud or open flower. Throws splendid canes. An ideal cut flower variety.

JULIET. A wonderful combination of orange, scarlet, salmon, gold, etc. By way of color is one of the most sensational Roses ever introduced. Hardy in all sections. Especially fine in early Spring and late Autumn.

LADY ASHTOWN. Rose-pink, shading to silvery pink, with touches of yellow at base of petals and a silvery-pink reflex; large, full, well-formed flowers with high pointed center.

LADY HILLINGDON. One of the best of recent introductions. A lovely shade of apricot yellow. Free blooming and splendid for cut flower purposes.

LADY PIRRIE. Flower outside of petals deep coppery reddish salmon, inside apricot yellow, flushed fawn and copper, large, fairly full, of perfect form. Growth vigorous, very floriferous. Good.

MME. BUTTERFLY. A sport from Ophelia which it closely resembles, but it is much better in color and blooming qualities. A refined bloom of salmon pink suffused with apricot and yellow. A splendid cut flower variety.

MME. CAROLINE TESTOUT. Satiny pink. Flowers beautifully cup-shaped and intensely fragrant.

MME. JULES GROLEZ. A red Kaiserin Auguste Victoria. Bright, chinese rose in color. Flowers large and full, with nice reflexed petals.

MME. LEON PAIN. Flower silvery flesh, center yellowish orange, large, full, sweet, elongated bud opening well. Growth vigorous, very floriferous. Very good.

MISTRESS JOHN LAING. A beauty in clear, bright, shining pink; each bud in its long, serrated calyx with adjacent green foliage forms a dainty and lovely boutonniere; immense, full blooms on long stiff stems; sweetly scented.

MRS. AARON WARD. Deep rich Indian yellow. Stems constantly throw quantities of beautiful medium size buds. Splendid for cut flowers.

BUSH ROSES—Continued

MRS. CHARLES RUSSELL. No other forcing Rose except "American Beauty" can compete with it when it comes to counting points. Stems three feet long, stiff and surmounted by grand, rosy-pink blooms of largest size and build.

FRAU KARL DRUSCHKI (White American Beauty)
Description on page 11

MRS. WAKEFIELD CHRISTY MILLER. A superb pink Rose. One of phenomenal size and vigorous growth. The petals have a beautifully crinkled and wavy outline at the edges. One of the best hybrid teas of its particular color.

OPHELIA. A Rose which has made a record for itself as a cut flower variety, and is admired by everyone. It is perfect in form, large in size and of a most pleasing delicate tint of salmon flush with rose shadings.

PAUL NEYRON. The largest Rose in cultivation. Blossoms often eight inches in diameter. Rich, deep rose in color.

PILGRIM. A beautiful bright rose-pink. A strong grower, resisting disease and mildew. The buds are held on strong straight stems; they are well formed and long, holding their shape and color perfectly. Tea scented.

PREMIER. A pure rose pink throughout, very fine for cutting, a profuse bloomer, and exceedingly sweet scented. Perfect in habit, easy to grow.

PRINCE DE BULGARIE. Silvery-flesh, very delicately shaded with salmon, long bud opening to full cup-formed flowers.

QUEEN BEATRICE. One of the best bright pink roses. Easy to grow and a fine cut flower variety.

RADIANCE. A Rose of American origin and to our mind one of the best varieties in cultivation of today. Buds long and pointed, expanding to blooms of enormous size. Similar in shape to Caroline Testout, but in color deep rich rose pink.

RED MAMAN COCHET. Resembles the well-known pink Manam Cochet but in a distinct shade of red and pink tones, very full flower and fine for cutting.

RED RADIANCE. A sport from the well known pink form. Flowers equal in size, but of a deep, rosy red color. Buds and open flowers of mammoth proportions. Deliciously fragrant; a constant and free bloomer. An ideal Rose for cut flower purposes.

ULRICH BRUNNER. Color a rich cherry crimson. Produces its blossoms on the end of the canes. These may often be cut with a stem length of three to four feet. Especially fine during the early spring and late autumn months.

WELLESLEY. Fine form and upright grower. Bright soft pink color with the outer petals a beautiful rose, reflex silver pink. Strong grower.

WHITE CECILE BRUNNER. The well known Rose in a white blossom.

WHITE LA FRANCE. Large and finely formed buds and blooms having broad petals of silvery-white with very delicate pink shadings. A fragrant, free and continuous bloomer.

WHITE MAMAN COCHET. An exact replica of the pink with the exception of color, which is pure creamy white with tinting of pink.

WINNIE DAVIS. Brilliant apricot pink. Reflex has lighter tints giving it a very handsome appearance. Buds are long, of fine form. Foliage bright green. One of the best.

Collection. Any dozen of the above fifty cent roses for \$4.85

Collection. One each of the above 46 roses in all for \$19.85

OPHELIA—See description on this page

THE FOLLOWING ROSES AT 75 CENTS EACH, POSTPAID

HILL'S AMERICA. Large rose-pink, fine shaped flowers, sweetly scented, carried on long stems. Deep glossy green foliage; almost thornless..... 75c

MRS. S. K. RINDGE. A rich chrome yellow in color. Long pointed buds, petals are stained with cadmium red. Fragrant and a good keeper. As the flowers open they are suffused with soft pink, foliage is large, leathery, and a glossy light green..... 75c

CLIMBING ROSES

THE FOLLOWING CLIMBING ROSES ARE 35 CENTS EACH, POSTPAID

AMERICAN PILLAR. Color a rich rosy carmine with a glint of white in the center. Stamens a rich golden yellow. The flowers are large, single and borne in immense clusters. A very rapid grower. In the autumn it is a brilliant show of color with the pretty clusters of bright red seed pods which remain on the bush until well into winter.

CLIMBING CECILE BRUNNER. One of the strongest growing Roses. Bright clear pink in color. Probably the most popular climber.

CLIMBING KAISERIN AUGUSTA VICTORIA
See description on this page

CLIMBING MME. ABEL CHATENAY. A climbing sport of the popular rose of same name, producing growth of seven to eight feet in one season.

DOROTHY PERKINS. Too well known to need description. Beautiful deep pink flowers, borne in clusters. Vigorous and hardy.

GOLD OF OPHIR. A splendid climber, color combination of copper, carmine and salmon. Very popular and beautiful.

SILVER MOON. Pure white with clear yellow stamens. A beautiful single rose, very large and free blooming. Glossy bronze green foliage.

TAUSENDSCHOEN or THOUSAND BEAUTIES. Bright clusters of blossoms varying in color from flushed white to rosy-carmine. A vigorous, hardy climber with few thorns.

Collection. One each of the above roses for.....\$1.95

THE FOLLOWING LIST OF CLIMBERS AT 50 CENTS EACH, POSTPAID

BANKSIA WHITE. The flowers of this very desirable Rose are pure white, violet scented, very small, double and borne in umbels of twelve to fifteen blossoms. Spring bloomer.

BANKSIA YELLOW. Small, double sulphur-yellow flowers in clusters. A vigorous grower.

CHEROKEE PINK. Similar to the white variety, but gives larger flowers and blooms for a longer period.

CHEROKEE RED. A rampant climber identical in every way with the other roses of the same name except in color.

CHEROKEE WHITE. The well-known Cherokee of the South. A vigorous and rampant climber. Large single white, fragrant flowers produced in early spring in great profusion; evergreen; foliage bright, glossy green; most desirable for pergolas and trellises. Will climb to the top of the loftiest tree.

CLIMBING AMERICAN BEAUTY. Crimson flower 3 to 4 inches in diameter; well formed, fragrant, strong grower. holds foliage late; blooms in May and June and occasionally during the summer.

CLIMBING BELLE SIEBRECHT. This Rose is known in England as Climbing Mrs. W. J. Grant. Imperial pink, large and beautifully formed. Sweetly perfumed.

CLIMBING FRAU KARL DRUSCHKI or WHITE AMERICAN BEAUTY. A new Rose destined to prove very popular. Flowers similar to the bush variety.

CLIMBING GRUS AN TEPLITZ. A perfect sheet of crimson when in bloom. It is the same as the bush Teplitz.

CLIMBING LA FRANCE. A beautiful Rose with its color of silvery rose and pink shades. Large and fragrant blooms. Similar to the bush variety.

CLIMBING LADY ASHTOWN. Similar to the bush variety. Color rose-pink, shading to silvery pink. Long pointed buds very free flowering. Should be in every garden.

CLIMBING LADY HILLINGDON. Identical with the bush variety except in habit. Long pointed buds of deep yellow, very free blooming.

CLIMBING MAMAN COCHET. No Rose we grow is so popular as Maman Cochet. Here we have an exact counterpart of that popular variety, except that it is a vigorous climber.

CLIMBING MME. CAROLINE TESTOUT. Beautiful glowing pink, identical flower with its parent namesake; a rampant climber.

CLIMBING PINK KILLARNEY. A vigorous climber, otherwise possessing all of the splendid qualities of the parent Killarney.

CLIMBING SOUVENIR OF WOOTTON. Velvety red; same in bloom as the bush Wootton, from which it is a sport; vigorous; profuse with splendidly formed flowers.

CLIMBING WHITE MAMAN COCHET. Here we have a climbing form that will become as popular a climber as its parent has as a bush Rose. Grand, huge white flowers, tinged pink.

CLIMBING WINNIE DAVIS. A sport from the bush variety. Similar to it in all characteristics. Apricot pink color and long buds of fine form.

LADY GAY. A bright rose-pink; similar to Dorothy Perkins, but later; the flowers being larger and fewer to the cluster.

REINE MARIE HENRIETTE. Deep cherry-red. This Rose takes the lead as a climber.

REVE D'OR or GOLDEN CHAIN. Buff-yellow, a very free bloomer, very pretty. Strong grower; will do well in any situation.

WILLIAM ALLEN RICHARDSON. Copper-yellow, flushed carmine. One of the very popular climbing yellow varieties.

Collection. One each of the above climbers for.....\$8.95
Collection. Any twelve varieties from the above list for... 4.85

THE FOLLOWING LIST AT 75C, POSTPAID

CLIMBING GEN. McARTHUR (New). Destined to be fully as popular as its parent. A beautiful climbing red rose.

CLIMBING HADLEY (New). The well-known Rose now in a climbing form. In color a deep velvety red, a prolific bloomer and hardy grower.

CLIMBING HOOSIER BEAUTY. A new Rose. The climbing form of the popular and well known bush variety. Dark velvety red.

CLIMBING KAISERIN AUGUSTE VICTORIA. A strong climbing form of the variety of the same name. Pure white.

CLIMBING PAPA GONTIER. A climbing sport of Papa Gontier. Color, rich red; a beauty.

CLIMBING SUNBURST. A true "Sunburst" of vigorous climbing habit. Can be recommended as a fine climbing yellow.

Collection. One each of the above list for.....\$3.65

THE FOLLOWING ROSES \$1 EA., POSTPAID

CLIMBING BELLE OF PORTUGAL. A new variety exceeding in beauty anything heretofore attained. Very vigorous grower giving immense crops of bloom. Color a beautiful pearl pink.

MARECHAL NEIL. A very popular Rose in the beautiful shade of golden yellow, very fragrant, does well in partial shade and blooms very freely.

CLIMBING SUNBURST—See description on this page

SHRUBS AND VINES

All plants listed are of gallon can size unless otherwise noted. Prices are F.O.B. Los Angeles. Allow three pounds each for weight when ordering.

ABELIA

GRANDIFLORA. Free-flowering shrub with small, glossy green leaves. Flowers are tubular, almost an inch long, white flushed, lilac pink. Blooms profusely and continuously all summer. A very fine shrub. **\$0.75** Each

BERBERIS (BARBERRY)

DARWINI. Shrub with many slender branches drooping toward tips. Leaves small, rich green, prickly like Holly. Many of the leaves turn bright red in fall, holding this tint through winter. Flowers golden yellow, produced in utmost profusion early in spring. Berries blue. One of the very finest small evergreen shrubs. **.75**

BUDDLEIA (BUTTERFLY BUSH)

A beautiful flowering shrub from China, bearing long spikes of exquisitely colored lilac flowers. These are produced on the ends of long shoots. When the plant is in full bloom it is a thing of striking beauty. **.60**

CALIFORNIA HOLLY

A native shrub common to our foothills, bears large clusters of crimson berries at Christmas, very hardy, thrives best in a dry location. **1.00**

CALLISTEMON (BOTTLE BRUSH)

Showy flowering shrubs, thriving perfectly in California. Flowers in the exact shape of a bottle brush, which gives the common name. Will thrive in very dry locations with little care or attention. Callistemons are variable in color, usually red, but very frequently run to pink. **.75**

COPROSMA

BAURI. A splendid shrub of prostrate habit and brilliant, glossy green leaves. This is an ideal plant for banking against the bases of buildings, etc., or for covering banks. It is one of the handsomest of all foliage shrubs. **.50**

COTONEASTER

Handsome shrubs of wide use in both the home grounds and public parks; leaves somewhat small, glossy and of varying shades of green; flowers minute, usually white or pinkish white; berries of many hues and colors varying from orange to bright scarlet. Unexcelled for grouping, corner effects and for edging large plantings of shrubby borders.

PANNOSA. A very beautiful shrub of upright growth. Branches long, slender and slightly arching. Leaves deep rich green above and covered with silvery down beneath. Flowers white. Berries borne in great profusion in the fall are vermilion red. The branches loaded with berries can be cut and kept in water for weeks. **.60**

FRANCHETTI. A recently introduced Cotoneaster, bearing during midwinter, immense quantities of brilliant orange berries. The plant is more or less drooping in habit. A splendid plant for the great Southwest. **.60**

CUPRESSUS (CYPRESS)

ARIZONICA. A handsome blue Cypress of Arizona, unequaled for dry land plantings. Flats of 100 plants **\$2.75**. Gallon cans **.50**

ITALIAN. This well known Cypress is largely used in formal gardens, etc. The plants are columnar in their habit of growth. **.75**

MACROCARPA. This is the native Cypress found in the district around Monterey. A splendid variety for seacoast planting, invaluable for parkways, etc., commonly called Monterey Cypress. Flats of 100 plants, **\$2.75**. Gallon cans **.50**

CRATEAGUS

Large shrubs adapted to most any soil and situation; admired for their bright berry-like fruits (which remain on the plant until spring), white flowers and firm foliage. The genus is closely allied to the Cotoneasters, but is easily distinguished by their thorny branches.

LALANDI. Highly recommended. A splendid, free growing shrub that bears in fall great masses of orange-red berries. **.75**

CRENULATA. Brighter in the berries than the last named, a magnificent shrub. **.75**

DIOSMA

ERICOIDES. Often referred to as Breath of Heaven. Foliage exceedingly fine. Blossoms pure white, minute in character but borne in great profusion. A shrub which should be in every garden. **.75**

ERICA

MELANTHERA. This is the great commercial Erica or Heather. It is grown by the thousands by florists, either as pot plants for interior decoration, or in the open ground for cut purposes. There is a daintiness about this Erica which exceeds any other variety which we know. It blossoms during mid-winter, at a time when flowers are generally scarce. It is a gem, any way you take it, and should be in every garden. **.75** Each

EUGENIA

MYRTIFOLIA. A splendid, bushy, tall growing shrub, closely related to the Myrtle; can be trimmed to any desired shape. Very handsome. **.75**

ESCALLONIA

The bright, glossy green foliage of most of the Escallonias and their wonderful freedom of growth, places them in the front rank of medium-sized shrubs. They blossom with great freedom and are extremely decorative in their nature.

ALBA. A beautiful pure white variety. **.75**

RUBRA. With handsome, red-colored flowers and dark-colored foliage. **.75**

ROSEA. Rich, rose-colored blossoms. **.75**

EVONYMUS

JAPONICUS. Fine upright shrub of moderate size and rather compact growth. Foliage and bark are clear, dark green. **.75**

JAPONICUS AUREA MARGINATUS (Golden Evonymus). Of dwarf and compact growth. Leaves deep yellow towards the edges, blotched in the center with light and dark green. **.75**

GENISTA

SPANISH BROOM. Stiff, rush-like foliage and beautiful golden yellow, orchid-like flowers. A popular shrub and justly so, for it is one of the best. **.60**

GREVILLEA

THELEMANNIANA. A very dainty, graceful shrub. Finely branched and densely covered with fine, needle-like leaflets of a soft, pleasing green. Flowers are in small clusters, ruddy pink with green tips. It is no exaggeration to say that this is the freest blooming shrub grown in the State, as it blooms throughout the entire year. Splendid in every way. **.75**

HIBISCUS

A tall growing shrub, with large, double flowers. Free flowering and very ornamental, should be in every garden. **.75**

DOUBLE CRIMSON. **.7**

PEACH BLOW. Double pink. **.7**

HYDRANGEA

One of the most popular shrubs in existence and grown practically all over the world. Produces immense trusses of pink flowers. By the addition of iron to the soil in which they are growing the flower will take on a pale blue caste. **.50**

HYPERICUM

MOSERIANUM. Pretty, low-growing shrub; valuable for borders. Foliage light green; flowers large, deep yellow with five spreading petals and numerous long stamens tipped with reddish anthers. Blooms almost continuously. Does best in partial shade. **.75**

LANTANA (BUSH)

A free flowering, low growing plant that can be used for borders or hedges.

RADIATION. Orange Scarlet.

PINK QUEEN. Pink shaded yellow.

GOLD COIN. Yellow.

DELICATISSIMA. Lavender trailing. **.15**
2 inch pot plants **doz. \$1.50**
Gallon cans. **.50**

LAURUSTINUS

An excellent shrub that blooms early in the spring, makes a wonderful hedge plant, or for massing with other shrubs. **.60**

SHRUBS AND VINES—Continued

LEPTOSPERMUM

LAEVIGATUM. A lovely Australian shrub with long, weeping branches, densely foliaged with small whitish green leaves. During the Spring the plants are literally covered with minute white flowers. Attractive both in and out of bloom .75

LNICERA (BUSH HONEYSUCKLE)

NITIDA. A beautiful shrub with small, dark foliage and white flowers. Useful both as a shrub or hedge plant .60

LIGUSTRUM (PRIVET)

NEPALENSE. This is the most popular plant for hedges, can be trimmed to any desired height. Flats of 100 plants, \$2.50 Gallon cans .50

GOLDEN PRIVET. Same as above in form but with beautiful yellow and green foliage. Flats of 100 plants, \$3.50. Gallon cans .50

MYRTUS (ENGLISH MYRTLE)

COMMUNIS. A splendid dwarf evergreen plant suitable for borders or hedges, also of equal value if allowed to grow into specimens. Bears masses of fragrant pure white flowers. Young plants for lining out .doz. \$1.50. Gallon cans .15

COMMUNIS MICROPHYLLA. Identical with the preceding, but with much smaller leaves. Small plants for lining out. 15c each, \$1.50 doz. Gallon cans .75

NANDINA

DOMESTICA. This shrub from Japan makes one of the most beautiful of all lawn specimens, or it may be treated as a potted plant for indoor ornamentation. The leaves take on rich Autumn colors in the Fall, of red, copper and brown at which time it is exceedingly attractive. Extra fine plants .75

OLEANDERS

These make beautiful specimens in a short time and are practically ever-blooming. They will stand several degrees of frost without injury. Of splendid value for such locations as Arizona, Texas, and generally speaking, the Southwest, where the temperatures do not go too low. We can offer them to you in the following colors: White 75c each; Pink .75

PITTIOSPORUM

The bright, glossy green foliage of the various Pittosporums, coupled with their delicately fragrant blossoms, places them in the front rank of medium high garden shrubs. We offer two of the very best.

UNDULATUM. Handsome undulated foliage, light green in color. Flowers delightfully scented. Strong plants .75

TOBIRA. Dark green, glossy foliage. White fragrant flowers. .75

PLUMBAGO

CAPENSIS. A tall growing, drooping shrub that is covered practically the entire year with sky blue flowers, does best in a sunny position .75

VERONICA

A compact growing class of shrubs that are hardy and adaptable to sun or shade.

DECUSSATA. Rather dwarf. Leaves medium sized and closely set. Flowers large, violet blue. An excellent plant .60

IMPERIALIS. Growth strong and rather spreading. Leaves large, dark green with purple margins and midribs. Flowers amaranth red. Very handsome .60

VIBURNUM (SNOWBALL)

OPULUS STERILE. The well known eastern Snowball does equally well in California, blooms in the early spring. Beautiful white flowers .75

SPIRAEA

Medium-sized shrubs of free blooming habit, varying in appearance, color of flowers, and manner of blooming. All have very small flowers borne in compact clusters of different forms. Do well in any ordinary good garden soil.

ANTHONY WATERER. Dwarf but erect form, growing about three feet high. Flowers bright crimson, in flattened heads at end of branches. Blooms about midsummer .75

VAN HOUTTEI. Branches arching and drooping with the weight of the flowers, which are borne so freely in spring as to cover plant completely with a mass of snowy bloom. Very beautiful and extremely hardy .75

PINUS

HALAPENSIS. This handsome Mediterranean pine tree is especially adapted to planting in California. It forms a dense growth, withstands drought to a marked degree. Owing to its value we have grown a very large stock of this variety .75

INSIGNIS. The well known Monterey Pine. A rapid-growing variety with handsome, dark green needles .75
All plants listed below are of gallon can stock unless otherwise noted.)

CLIMBING AND TRAILING PLANTS AMPELOPSIS

Well known deciduous vines climbing by tendrils. All assume most gorgeous autumnal tints.

QUINQUEFOLIA (Virginia Creeper). Very well known. Leaves large with five leaflets. Berries dark purple with a bloom, borne on red stalks. Foliage colors a most intense scarlet early in the fall .75

VEITCHII (Boston Ivy). Perfectly distinct from Virginia Creeper. Leaves on very young plants are divided into three separate leaflets, but on older plants are merely three-lobed. Foliage is dense and very glossy. Tendrils furnished with small discs, which adhere tenaciously to brick, stone or even wood. Foliage turns red in fall .75

BIGNONIA (TRUMPET FLOWER)

These beautiful plants are deserving of more attention than they have received. Their flowers are large, showy, of the most delicate shades and colors. For covering walls, rocks, trellis-work, or for climbing trees they have few equals. We consider the following the best varieties:

TWEEDIANA. Yellow. .75
VENUSTA. Yellow.
RADICANS. Orange scarlet.
CHERERE. Red.
McKENNII. Pink.

FICUS

REPENS. Extremely handsome evergreen climber with about same habit as the well known Boston Ivy. It adheres closely to walls by its clinging tendrils. Leaves are small, dark green and heart-shaped. Perfectly hardy. Plants in pots .35

HEDERA

ENGLISH IVY. The well known species with very dark green, leathery leaves, usually about five-lobed. Old vines have greenish flowers and black berries in clusters on lower part of plant. Small plants, 15c each, \$1.50 dozen. Gallon cans .50

JASMINE

OFFICINALE. Slender vine with finely divided pinnate leaves and numerous small, white, fragrant flowers. Summer bloomer. Partly evergreen .75

PRIMULINUM. A recent and very valuable introduction. It is not only the fastest growing Jasmine, but the quickest-growing climber. Flowers clear primrose yellow .75

HONEYSUCKLE

Growth extremely strong. Old leaves dull green. New growth is reddish purple on branches and backs of leaves. Flowers white inside, purplish outside. One of the very best vines where very rapid growth and a dense mass of foliage are desired .50

WISTARIA

One of the prettiest climbing vines. Has long racemes of pea shaped flowers that almost cover the plant in early spring. Grafted plants in white and purple 1.50

ASPARAGUS FERNS

PLUMOSUS. Used extensively for mixing with cut flowers, grows best in the shade, responds to good rich soil. \$2.00 doz. .20

SPRENGERI. A great favorite for hanging baskets and ferneries; grows well in sun or shade. \$2.00 dozen .20

SWORD FERN

A great favorite for outside planting as well as for pot culture. \$2.00 dozen .20

WOODWARDIA FERN

The Giant Brake or mountain fern grows to a height of 6 feet, requires a moist shady place for best results .50

HARDY FLOWERING PLANTS

CANTERBURY BELLS .Doz. \$0.50
CARNATIONS. Pink, red and white .75
COREOPSIS .50
GAILARDIA .50
PENTSTEMON .50
SHASTA DAISY .50
VIOLETS. Flat grown .50
Pot grown .1.50

Deciduous and Citrus Fruit Trees and Small Trees

Contained in the following you will find a complete list of the various fruit trees, vines, and berry plants that we have to offer for this season. After the description of each variety we have noted the month of ripening. All prices are quoted f. o. b. Los Angeles, and due to market changes, are subject to change without notice. In general we supply one dozen trees for the price of ten. Please write us for special prices in large quantities.

PLANTING INSTRUCTIONS

On receipt of shipment unpack it immediately, and if not planted at once place the roots of the trees in a trench, cover them with soil, and water thoroughly, so as to settle the dirt well about the roots. For this purpose it is well to open the bundle. If on account of delay enroute the trees look withered, bury them entirely in wet soil for a few days until they have recovered.

It is of great importance to dig holes deeper and larger than is necessary to admit all the roots in their natural position, keeping the surface and subsoil separate. While we exercise the greatest care possible in digging and packing the trees the loss or injury of the roots is sometimes unavoidable. Any injured roots should be cut off with a sharp knife. Fill the hole with the surface soil, so that the tree after the earth has settled will stand about as deep as it did in the nursery, a line which can usually be noted by a difference in color. Settle the soil well around the roots by filling the hole with water. Never let manure come in contact with the roots, but it can be used as a top dressing.

Grass or weeds should never be allowed to grow around the trees. The ground should be thoroughly cultivated, so that the finely pulverized soil forms a mulch over the whole surface of the ground.

Apples, Apricots, Peaches, Pears, etc., should be pruned back according to the size of the tree. Tree protectors should be used against sunburn.

GUARANTEE

While we exercise the greatest care to have all stock true to its name, it is understood and agreed that should any stock prove untrue to name we shall be held liable only for the sum paid for the stock that may prove untrue and shall not be held liable for any greater amount.

APPLES—75c EACH

DELICIOUS. An excellent variety of delicious flavor. Large, conical, brilliant red on yellow ground. Flesh crisp, juicy and sweet. Strong grower, good bearer and keeper. "November."

EARLY HARVEST. Medium, flattened, yellow. A favorite summer variety. "July."

JONATHAN. Fruit medium, roundish, skin yellow nearly covered with lively red, flesh fine grained, good keeper. "October to December."

RED JUNE. Medium, oblong, deep red, excellent early table variety. "June to July."

WHITE WINTER PEARMAIN. Medium size, skin light yellowish green, flesh tender. One of the leading varieties. "November."

WINESAP. Medium size, dark red. A favorite variety in the West. "November."

YELLOW BELLFLOWER. Large yellow with a blush on the sunny side. Very tender, juicy. An excellent apple. "October."

YELLOW NEWTON PIPPIN. Medium to large, yellow, very firm, crisp, juicy with a very high flavor. "December."

CRAB APPLES—75c EACH

TRANSCENDENT. Medium large, round, yellow striped with red. Highly recommended. "August."

HYSLOP. Deep crimson. Very popular on account of its large size, beauty and hardiness. Vigorous grower. "August."

APRICOTS—75c EACH

ROYAL. Medium to large, oval, orange in color, sweet excellent flavor. Very productive. Highly recommended for all purposes. "Early June."

NEWCASTLE. Medium, orange with red cheek. Ripens early. Fine for family and an early market. "First of June."

ALMONDS—75c EACH

I. X. L. Nut large, soft shell, good bearer. Vigorous, upright grower. One of the best commercial varieties.

TEXAS PROLIFIC. Medium size, soft shell, regular and heavy bearer. Good for pollinizing others.

NONPAREIL. Medium size, thin shell, good quality and prolific.

CHERRY—\$1.00 EACH

BING. Dark red nearly black. Brings best prices in all cherry districts. Fine flavor, very productive. "Late June."

BLACK TARTARIAN. Large, purplish black flesh, juicy, rich and sweet. Strong grower and prolific bearer. "June."

EARLY RICHMOND. Medium size, red, melting juicy, slightly acid flavor. "Late May."

MORELLO. Medium to large, blackish red, acid, juicy. Very productive. "July."

ROYAL ANN. Large, yellow light with red cheek. Flesh juicy and sweet. "Late June."

PEARS—75c EACH

WINTER NELIS. An early winter pear of very good quality. Fruit medium size and dark russet in color, heavy bearer and good flavor. "December."

KIEFFER. A large fruit variety of golden yellow color. Flesh somewhat coarse and juicy, and quince flavor. "October."

BARTLETT. The best known and most popular pear in California. The tree is a vigorous grower, bearing abundantly, fruit of large size, and rich flavor. "August."

QUINCE—75c EACH

This fruit succeeds almost everywhere in California and is especially in demand for jellies and preserving.

CHAMPION. Large, light yellow, very productive. "September."

ORANGE. Large, greenish yellow, valuable old variety. "Late September."

VAN DEMAN. Originated by Burbank. Hardy and a strong grower, early and prolific bearer, ripens through a long season and keeps well. "Late September."

PLUMS—75c EACH

This fruit grows well in all parts of the state. The Japanese varieties and their crosses occupy a prominent place in the plum culture of California. The European varieties are also held in considerable favor, especially for canning purposes.

BLUE DAMSON. Small, skin purple, flesh yellowish green. Juicy and rather tart. An old favorite sort for making jam. "September."

BURBANK. Medium large, yellow mottled red, flesh yellow, small pit, very productive. "July."

HALE. Medium, yellowish green slightly shaded red. Very juicy and delicious. Regular and heavy bearer, fine for table and market. "Late June."

SANTA ROSA. Large purplish crimson, flesh yellow mottled crimson. Very good quality, excellent for all purposes. "Early July."

SATSUMA. A very large and well flavored plum with blood red flesh, skin blush red, a very small pit. Vigorous and productive. A well known variety much in demand for home canning. "July."

WICKSON. Deep cherry red to a rich claret color when ripe. Flesh amber very juicy. "August."

PLUMCOTS—75c EACH

APEX. This fruit is indicated by its name. Is a very satisfactory combination of the Apricot and the Plum. Large round, yellow rich and aromatic. "June."

PRUNES—75c EACH

The prune is really a plum with the distinguishing characteristic that it dries sweet and makes a commercial product. In California the prune industry is one of the great horticultural interests of the state.

FRENCH. The best of all commercial Prunes. Medium size, skin reddish purple with a blue bloom. Flesh very sweet and rich. Regular bearer, used extensively for drying in California. "August."

SUGAR. Medium large, dark purple, flesh yellow, juicy and sweet. Excellent for canning and drying. Vigorous and productive. "August."

TRAGEDY. Large, dark purple, yellowish green meat, rich and sweet. Fine table prune. "July."

PEACHES—75c EACH

The trees do best on a well drained sandy loam, rather than on land inclined to be moist. When too many fruits have set the only remedy is to thin them out. Thinning is done before the pit has formed.

FREE STONE

EARLY CRAWFORD. Very large, oblong, golden yellow with red cheek. Flesh yellow, juicy and sweet. "July."

ELBERTA. Oblong, bright golden yellow with beautiful red cheek. Flesh very firm, juicy and sweet, vigorous and very productive. One of the best for all purposes. "August."

FOSTER. Large, bright yellow with dark cheek. Resembles arly Crawford, much better quality, ripens earlier. "July."

GEORGE IV. Large, flesh white, skin creamy white shaded red, prolific. "July."

J. H. HALE. Valuable new variety, resembles Elberta but larger and better quality. Skin almost fuzzless, flesh very firm, good shipper. One of the best yellow freestones. "August."

LATE CRAWFORD. Large golden yellow with dull red cheek. Flesh yellow, juicy and sweet. "August."

LOVELL. A California variety, large, almost perfectly round, clear golden yellow, with faint red blush. Flesh fine, grain firm and yellow to the pit. A superb canning and drying peach. Also excellent for table use. Highly recommended. "August."

MILLER'S LATE. Matures three weeks later than Salway. Fine flavor. Flesh yellow. The latest of all yellow freestones. October.

SALWAY. Large round, yellow shaded red, sweet and rich flavor. Good canning peach, also best for late market. "September."

SAUCER. Australian, medium size, flattened on both ends. Creamish white, shaded crimson. Flesh white. A peculiar sweet flavor. "June."

IMPERIAL. Early free, a strong vigorous grower yielding abundantly. Fruit large with small pit, skin yellow, heavily shaded with dark red. Flesh yellow, rich and firm. Desirable for both shipping and home use. "Late June to July."

CLINGSTONE

Clingstone peaches are much sought after by canners on account of their richness and firmness. Recommended for home canning.

LEMON CLING. Large, oblong, yellow shaded red. Flesh yellow. "August."

McCLURE'S STRAWBERRY CLING. A new valuable variety, large creamy white, nearly covered with brilliant crimson. Flesh white, red around the pit. Excellent for table and market. "August."

TUSCAN CLING. A popular canning variety. A fancy peach, large, deep red on sunny side, solid yellow fleshed. Early and heavy bearer. "July."

ORANGE CLING. Very large, golden yellow with crimson cheek. Flesh yellow, sweet, delicious. Much desired for home canning. "Late August."

PHILLIP'S CLING. This prime variety is well known and esteemed as the standard of excellence among canning peaches. Large, round with a slight blush on the sunny side. Flesh firm, yellow to the center, pit small. "Late August."

NECTARINES—75c EACH

The Nectarine is practically a peach with a smooth skin. Its delicious and aromatic flavor makes it especially valuable for the table and also for drying and canning. It requires the same culture as the peach.

BOSTON. Large, deep yellow with bright blush and mottling of red. Sweet and of a peculiar, pleasant flavor. Ripens in August.

STANWICK. Large, greenish white with violet cheek, flesh white, juicy and delicious. "August."

WALNUTS—\$2.00 EACH

The English Walnut is the great commercial nut of California, and the class of nuts known as soft shells is the one universally planted at the present time. A deep rich soil is best adapted for the Walnut. Much attention has been given in recent years to the budding and grafting of the Walnut. Budded or grafted trees yield a nut larger than the average seedlings.

EUREKA, ON BLACK ROOT. Large oblong, soft shell tightly sealed. Tree vigorous grower, blight resisting, good producer, blooms very late. Therefore, not so much subject to late frosts. 6 to 8 feet.

PLACENTIA PERFECTION, ON BLACK ROOT. A favorite in Southern California. Nuts large, soft shell, white meat of excellent quality. Heavy and regular bearer. 6 to 8 feet.

FIGS—75c EACH

There is probably no fruit that repays its owner so well as a few fig trees. From early summer till late fall there is a constant supply of wholesome appetizing fruit. The trees require sufficient moisture to keep them constantly growing during the summer months in order to fruit well.

BLACK MISSION. This is probably the most common black fig in California today. Fair size, dark purple, almost black in color. Flesh very rich and sweet. Strong grower and heavy bearer. "August."

BLACK SPANISH. Not so black in color as the Black Mission, but a much larger fig, vigorous and very prolific. "August."

BROWN TURKEY. Large, dark purplish red, good quality earliest to ripen and bearing fruit constantly until frost. Valuable market variety. "July."

KADOTA, or WHITE PACIFIC. This is one of the very best white Figs. Medium size, slightly elongated, yellowish green, flesh yellow, of excellent quality, rich and sweet as honey. Does not crack or sour and dries perfectly. Highly recommended for all purposes. "August to November."

WHITE ADRIATIC. Large, greenish yellow skin, red flesh. Vigorous grower and prolific bearer. One of the most common sorts grown in California. "August."

SAN PEDRO BLACK. A fine table variety, fruit large, somewhat elongated. Color violet black, tending to green toward the neck. Pulp of a coppery red color. Ripens early in September.

OLIVES—\$1.50 EACH

The olive will thrive wherever Oranges do. The trees should be planted 24 to 30 feet apart and special care should be taken to prevent the roots from drying out when planting.

MISSION. This well-known old Spanish variety is still generally planted in California. Fruit medium large, jet black and most productive. Very vigorous. "November."

POMEGRANATE—75c EACH

The Pomegranate grows in bush form, and should not be pruned very much if a large crop of fruit is the main object. However, its glossy light green foliage and beautiful scarlet flowers render it also very desirable for ornamental purposes. A pomegranate hedge is especially beautiful.

PERSIMMONS—\$1.75 EACH

The value of this beautiful and luscious fruit is becoming more and more recognized. Persimmons are particularly hard to transplant. The root must never be allowed to become dry before planting, and after planting until well established they must be well supplied with water. If this is neglected a large percentage may die.

HACHIYA. Very large, oblong conical, with short point. Very showy. Diameter three and three-fourths inches, skin bright red with occasional dark spots or blotches and rings at the apex. Flesh is a deep yellow, astringent until ripe, then very fine. The largest of all trees and vigorous.

CITRUS TREES

When planting a citrus tree the burlap should be left on the ball of the tree. If removed the soil is apt to fall away from the roots, thus lessening the chances of the tree to live.

ORANGE—\$2.00 EACH

WASHINGTON NAVEL. The world wide famous California Orange. Fruit large and seedless. Flesh juicy, sweet and highly flavored. Ripens November to March.

VALENCIA. Sharing more and more the popularity of the Navel, and often bringing the highest prices in the market. Ripens after Navel season is over. Fruit medium size, few seeds, tender, sweet and delicious. "May to October."

LEMON—\$2.00 EACH

EUREKA. This is the most commonly grown and leading market variety. Almost thornless. Fruit of a good even size and splendid quality. Almost seedless.

GRAPE FRUIT—\$2.00 EACH

MARSH'S SEEDLESS. Extra large, practically seedless. It has a very fine flavor. Best of all Grape Fruits. Strong grower and heavy bearer.

TANGERINE—\$2.50 EACH

DANCY. Very popular Mandarin variety. Skin orange red, meat juicy and sweet, few seeds. Vigorous and prolific. "March."

GRAPES

FOREIGN VARIETIES—15c Each—\$1.50 Doz.

BLACK MOROCCO. A fine late black grape. Very large berries. Flesh firm, bunch compact.

CORNICHON. Berries long and large, skin blue-black and thick. Flesh firm, good flavor. Late keeper and good shipper. "October."

EMPEROR. Fruit large, oval, dark red, juicy and sweet. Good shipping and keeping quality. "November."

MALAGA. Very large, greenish white, meaty, sweet and juicy. "August."

MISSION. Medium size, blue-black, good for table and wine. "September."

MUSCAT. Standard table and raisin grape. Fruit large, greenish yellow. Flesh firm, sweet and juicy.

THOMPSON SEEDLESS. Small, yellow, very sweet and delicious flavor, prized for table raisins. "August."

ZINFANDEL. Bunches large and compact. Planted extensively in California for the juice. "September."

BLACK MALVOISE. Vine a very strong grower, berries large, oblong, reddish black with faint bloom. Fresh juicy, flavor neutral. An immense bearer, a fine table grape. "September."

FLAME TOKAY. Bunches and berries very large, pale red with bloom, flesh firm and sweet. "September."

AMERICAN OR EASTERN GRAPES—25c Each—\$2.50 Doz.

CONCORD. The most widely known and popular of all American grapes. The vine is a healthy, vigorous grower, and being hardy, it succeeds where the more tender varieties fail. "August."

NIAGARA. Large fruit, pale yellow color, skin thin and tough, tender and sweet flesh. "August."

SMALL FRUITS

There are few if any sections in California where one or more of the so-called small fruits or berries do not thrive well. They are especially adapted to the garden, on account of the small space occupied, and the short time in which fruit can be obtained.

BLACKBERRIES

A most rampant grower. Should be trained on a trellis and be pruned back like the grape vine.

MAMMOTH. Strong grower and heavy bearer. Berries large, highly flavored and very sweet. Ripens early and fruits over a long period. Should also be grown on a trellis. Highly recommended. 15c each, \$1.50 doz.

CORY'S MAMMOTH THORNLESS. Plant vigorous, sending up strong, stocky canes early in the spring, which often make a growth of twenty feet in one season. Can be kept in bush form by pruning. Ripens early, flavor delicious, sweet, flesh firm, melting and juicy, few seeds. Berries are very large. Vines are thornless, making picking easy. "June and July." 20c each, \$2.00 doz.

HIMALAYA. A very rampant grower and heavy yielder. Fruit has few seeds. 15c each, \$1.50 doz.

DEWBERRIES

A trailing low bush blackberry.

GARDENA. Berries large, ripens early, vigorous and very productive, fine quality. 15c each, \$1.50 doz.

LUCRETIA. A delicious berry of high quality. 15c each, \$1.50 doz.

LOGANBERRIES

Supposed to be a hybrid between the Blackberry and Raspberry, but it is entirely distinct from either of its parents. When fully ripe it is a very dark red very large, often an inch and a quarter long. The vines are rampant growers. 15c each, \$1.50 doz.

RASPBERRIES

LA FRANCE. Without doubt the largest and most prolific raspberry ever grown. Fine flavor and thoroughly everbearing. Bears heavily in summer and fall. 35c each, \$3.50 per dozen.

CUTHBERT. An old standard variety, very large, fine flavor, ripens over a long period. 15c each, \$1.50 doz.

ST. REGIS EVERBEARING. A new early variety, ripens throughout the season. Berries large and of best quality, strong grower. 15c each, \$1.50 doz.

KANSAS BLACK CAP. One of the best black Raspberries, vigorous and productive. 15c each, \$1.50 doz.

CURRANTS

FAY'S PROLIFIC. Extra large, very productive, red, excellent quality. 25c each, \$2.50 doz.

WHITE GRAPE. The best white currant. 25c each, \$2.50 doz.

GOOSEBERRIES

OREGON CHAMPION. Medium large, round, fine quality, productive and free from mildew. 25c each, \$2.50 doz.

STRAWBERRIES

CAROLINA. A new berry that has met with instant favor. A vigorous grower, with strong foliage, producing heavily berries of large size and fine flavor. 25c doz., \$1.75 per 100.

KLONDYKE. A very popular berry. A vigorous grower, berries of medium size and good flavor. Recommended for shipping purposes. 20c doz., \$1.50 per 100.

PROGRESSIVE. A new variety that will bear over a longer period than any other. The fruit is of fine flavor and good size. 35c doz., \$2.50 per 100.

VEGETABLE PLANTS AND ROOTS

We beg to call your attention to the fact that in dozen and lots of 100, the prices below are parcel post or express prepaid. In lots of 1000 the price quoted is F. O. B., Los Angeles. Owing to the fact that our vegetable plant stock is grown at a different nursery from other plants, we are compelled to make shipment of vegetable plants separately.

The plants mentioned below are usually sent out packed carefully in moss. If desired, sent in a flat, please add fifty cents for each flat.

Germain's Winnigstadt Cabbage

THE PROVEN STRAIN

We recommend **Germain's Winnigstadt Cabbage** for many reasons, the most important of which are as follows:

SURE HEADER. Germain's Winnigstadt Cabbage is a strain that has been improved upon year after year until we have a type that is a sure header.

HARDINESS. Germain's strain, is a type that withstands wet and cold, is as immune from disease as any one is able to get it; its rugged growth withstands the attacks of insect pests.

GOOD SHIPPER. It is a strain of seed that will enable you to place on the market with the local or eastern houses a Cabbage that is in fine condition and commands the highest prices. It has proven without a doubt, that it is the best keeper, and therefore the best Cabbage California can produce.

EARLINESS. It is the earliest of the early. It is the one that is on the market before other strains. The first Cabbage from the field is usually the Cabbage that commands the highest market prices, and if you desire to grow for an early market, you cannot secure a type of Cabbage that will produce a crop earlier and more perfect than **Germain's strain of Winnigstadt Cabbage.**

Prices: Packet, 10 cents; ounce, 35 cents; ¼-pound, \$1.20; one-pound, \$3.50.

The Winnigstadt Cabbage Seed you sent me last spring came up splendidly in large thrifty plants, and having more than I wanted I furnished my neighbors with plants. They are all unanimous in saying that the cabbage is far superior to anything of the kind they have ever grown. They are solid, sweet and very crisp and tender.

Willis E. Steadman, Inspiration, Ariz.
I wish to tell you that I had very good results from the Early Winnigstadt Cabbage Seed, and also with all the other seeds that I purchased from you.

Maira G. Lima, San Luis Obispo, Calif.
The Winnigstadt Cabbage Seed did wonderfully. I have about twelve heads of the cabbage yet.

Wm. J. Leonard, Isabella, Calif.

Germain's Cannon Ball Cabbage

This is an early variety of the round-headed type, producing a very heavy crop. For uniformity of head, solid, compact nature, and excellent quality it is unsurpassed. The meat is tender, the very few outer leaves make it a variety in great demand. It can be placed on the market as early as any other Cabbage, thus finding an exceptionally good market, invariably. Below we are reproducing a field of **Cannon Ball Cabbage** showing the immensity of its growing properties. We recommend it.

Prices: Packet, 10c; ounce, 40c; ¼-lb., \$1.35; one pound, \$4.00.

The cabbage seed is all you advertised and am well pleased with the cabbage, very fine flavor, sweet and juicy, and for me I always want the Cannon Ball Cabbage and no complaint to find with any other seed purchased from your company

W. L. BUTTERFIELD, Manzanar, Calif.

I was very well pleased with the Cannon Ball Cabbage Seed, and that the flavor of the cabbage is even better than I expected. It is, in fact, the best flavored cabbage I ever ate. I am going to try it as a variety winter cabbage. It is a splendid heading. I have been very well pleased with all the seeds and plants I have received from you.

MRS. FRANCIS WILSON, Petaluma, Calif.

The photograph represents part of a thirty acre field of Cannon Ball Cabbage planted from Germain's Seed.

GERMAIN'S SNOWFLAKE CAULIFLOWER

For Cultural Directions, see page 30

Out of the many varieties of cauliflowers introduced and exhibited, we claim that Germain's Snowflake Cauliflower stands out supreme. It has the best appearance, best keeping qualities, it withstands the sudden climatic changes better than any other type and with its perfect leaf protection over the head, is a thoroughly bleached product of pure white, from whence it derives its name "Snowflake." It retains its snowflake appearance longer than any other strain and those who have once grown it never fail to demand Germain's Snowflake Cauliflower.

GERMAIN'S EARLY SNOWFLAKE

This type should be planted from June fifteenth to the first of July. We, however, do not recommend the planting of cauliflower too early because of the possibility of its heading prematurely, and climatic conditions also have considerable to do with the success of the grower.

Price: Packet 20c; 1/4 oz. 65c; 1 oz. \$2.00; 1/4 lb. \$6.65; 1 lb. \$20.00.

GERMAIN'S MEDIUM SNOWFLAKE

Plant from May twentieth to July fifth. This is the money-maker for the market grower as it becomes ready for the market at the time when prices are best.

Price: Packet 20c; 1/4 oz. 65c; 1 oz. \$2.00; 1/4 lb. \$6.65; 1 lb. \$20.00.

GERMAIN'S LATE SNOWFLAKE

Here we have a distinctive type which should be planted June 25th to August 25th. If planted too early it has a tendency to go into foliage and the grower will have additional expense and labor in taking care of his field. Earlier planting will not bring any earlier crop, as this type will not form its head until the proper season. This is a taller plant than the other type as it grows to a height of three feet or more. It should be planted two feet apart in rows three feet apart.

Price: Packet 20c; 1/4 oz. 65c; 1 oz. \$2.00; 1/4 lb. \$6.65; 1 lb. \$20.00.

GERMAIN'S GOLDEN SELF-BLANCHING CELERY SEED

(French Stock)

Nothing compares with this superb strain of celery seed. We have endeavored year after year to obtain only the best of French stock to offer our customers, and we feel well repaid for our efforts in this variety. One who delights in crisp, tender yet mild celery, which has a characteristic flavor, will not hesitate to plant Germain's Golden Self-Blanching. It is true to the name in being self-blanching, and is of the highest quality. Our seed is selected for purity and germination and will unquestionably meet with your approval.

We are satisfied we are offering the greatest value for the money in this tried and true sort. Celery seed has for many years been a strong item with Germain's for purity and high quality, but with the establishment of our testing grounds we are in a better position than ever to praise this item. It is a thrifty variety, growing 18 to 22 inches in height, very stocky, heavy, perfectly solid and a splendid shipper, and from every point of analysis is entitled to the mark of approval of this house. Packet, 15c; ounce, \$2.00; 1/4 lb., \$6.00; 1 lb. \$20.00.

GERMAIN'S GOLDEN BANTAM CORN

As a sweet corn one might say that Golden Bantam is unsurpassed. It is by far the sweetest and most delicious corn ever introduced. Golden Bantam is a dwarf early variety, growing four to five feet in height. The grains are golden yellow in color, the ears being eight rowed and from six to seven inches long. On account of its remarkable flavor it is an ideal home garden variety and we feel that no garden is complete without it.

Golden Bantam can be planted in hills three feet apart each way, or in rows three feet apart and the plants standing singly at nine inch intervals.

We heartily recommend it:

Gentlemen:—In the East we use Golden Bantam Sweet Corn altogether. It is one of the finest corns in the United States. Why don't you people recommend a corn of this quality in your catalogue rather than give it mere mention. People don't seem to know about it! By all means give it a lot of publicity and you will never regret it as the seed will sell itself.

A. G. BALDWIN, Covina, Cal.

Price, packet 10c, ½-pound 20c, pound 35c, 10 pounds \$3.00, postpaid.

**GERMAIN'S
GOLDEN
BANTAM
CORN**

**GERMAIN'S
OREGON
EVERGREEN
CORN**

Germain's Oregon Evergreen Corn is the best type to grow in Southern California both for its quality and for its yield. We have a strain of specially selected seed that will afford you ears most palatable and delicious. There is none better than **Germain's Oregon Evergreen Corn**, whether you are a home gardener or a market gardener. It can be grown early or late and with ordinary care will give more than a satisfactory crop. This Corn is extra sweet and due to the tight-folding of its shucks, is as near corn-worm proof as any. **Prices: Pkt. 10c; ½-lb. 20c; 1 lb. 35c; 10 lbs. \$3.00. Postpaid.**

Riverside, Calif.

Will say that it (the Evergreen Corn) was very satisfactory. The ears were large and full and very sweet. Will also add that other seed purchased from you gave very good satisfaction.

A. C. GIBFORD.

Blythe, Calif.

I am glad to say that my corn has done wonderfully, and has yielded by far the most of any I have ever planted. I planted two rows about 150 feet long, two seeds to the hill, and the hills three feet apart, and it was no time until it suckered out until the rows were solid and every stalk had from two to four ears on it of good size and good flavor. We ate all we could, supplied two of our neighbors with all they could eat, and then I am sure I must have fed all of two bushel to the hogs because it got too ripe on me. This coming year I will certainly have another patch of it. All my other garden seeds and plants which I have bought of you have also done splendidly except my Cauliflower, but I don't think I put them out at the right time. You can be assured of my order for all my garden seeds and plants for the coming year.

JOE BRUYNEEL.

Somerton, Ariz., September 25, 1921.

The Oregon Evergreen Corn was very satisfactory, being tender and of good flavor. All the seed purchased from you gave good results.

MRS. E. FRAUENFELDER.

The corn (Oregon Evergreen) was very satisfactory. Will plant it again in the spring. C. I. BRADBURY, Artesia, Cal.

NEW YORK-LOS ANGELES MARKET LETTUCE

Rarely do we find a variety that so overshadows all others of its kind as New York or Los Angeles Market Lettuce. Nothing better for the home garden at any time of the year and no other lettuce is used by the shippers to the eastern market.

The fact that California grew enough New York or Los Angeles Market Lettuce to supply its own three million people and shipped to the eastern markets ten thousand car loads or nearly three million crates this year proves the great popularity of this variety.

It matures quickly a large solid head, crisp, tender and of finest quality. With successive plantings of this splendid variety your table need never be without the finest lettuce grown.

MARKET GARDENERS

Probably no other class of planters are so keen in demanding the best in seeds as the Market Gardeners whose entire income may be lost by planting inferior seed. To meet a constantly increasing demand from this trade we are now putting up in sealed bags our Special Market Gardeners strain of this seed grown from carefully selected stock seed, thoroughly rogued, and perfectly cleaned. We have spared no expense to make this the last word in seed suitable for the most critical planter.

This Market Gardeners special strain is put up in sealed bags only.

Pkt., 10 cents; oz. 30 cents; $\frac{1}{4}$ lb. \$1.00; 1 lb. \$3.00; 5 lb. \$2.75 per pound.

Germain's King and Queen Watermelon

At last a Christmas Watermelon, the dream of the seedman for years, and at last we are able to offer in limited quantities the seed of this remarkable melon.

You and we and all of us know what a great part the watermelon plays in the dessert of the average dinner. Particularly at Christmas and New Years when we've gone through the whole meal from appetizer through soup, salad, turkey, dressing, potatoes and other vegetables we finally come to the dessert. And when we look at the pudding or mince pie or both we almost give up the ghost. It's too much. Just as Shakespeare said "A kingdom for a horse" we used to say "A kingdom for a piece of melon."

But now this is a thing of the past. We can enjoy a heavy dinner and wind up with something light, appetizing, and healthful.

Germain's King and Queen Winter Watermelon has a hard hornlike shell, and if properly stored can be kept until February in any climate. This melon is new and seed has been carefully guarded by the few who had it. There are ten carloads being stored at Rocky Ford, Colorado, for Winter shipments to the east, and the price they are receiving is extremely high. The melon is of Russian origin. We stored some until January 10th last year, and the eating qualities were perfect at that time.

Price: Packet 10 cents, ounce 30 cents, one-fourth pound \$1.00, one pound \$3.00, postpaid.

GERMAIN'S KLONDIKE WATERMELON

With the introduction of this superior melon several years ago a new step forward was taken in the development of a watermelon for home garden purposes. It is unquestionably the most popular one on the Los Angeles market, the market gardeners in this section having been won over very rapidly.

The Klondike Melon grows to a medium size, but is best known for its remarkable flavor and sweetness. It is unlike any other melon, but is peculiar to itself. The rind is thin, the seed small, about half the size of the ordinary watermelon, and the color of the seed is brown mottled with black.

As a melon for the back yard garden it is unsurpassed, and for the local market it will command the highest prices. However, it will not stand shipping, on account of the thin rind and tender nature.

Price: Packet 10 cents, ounce 25 cents, one-fourth pound 85 cents, one pound \$2.50, postpaid.

KLONDIKE WATERMELON

Germain's
CHINESE
GIANT
PEPPER

GERMAIN'S CHINESE GIANT PEPPER

One couldn't ask for more in a vegetable than is found in **Germain's Chinese Giant Pepper**. In size it is the largest Pepper grown, the photograph being actual size, although they grow still larger. The plants are strong and vigorous, dwarf in habit, seldom growing over two feet high. The fruit is thick and mild.

Prices: Packet, **10c**; ounce, **80c**; $\frac{1}{4}$ -lb., **\$2.65**; one pound, **\$8.00**.

I am pleased to state that the Chinese Giant Peppers have grown to a fine size, are rank and thrifty and are bearing a fair crop of large handsome fruit. The flesh of the peppers is tender and sweet, and I enjoy it very much.

WM. A. EARLS, San Dimas, Calif.

I have obtained very satisfactory results with Chinese Giant Peppers. They are the largest I have ever seen, having grown as long as six inches. I have always had good results from Germain's seeds.

W. S. WILLIAMS, Hemet, Calif.

I planted the Chinese Giant Pepper Seed and neighbors in front of me, left of me and right of me had all they wanted and then some. People passing my place were given of them and so far they are the best ever. My neighbors planted seed from my stock and there are quite a lot of them in San Bernardino.

L. B. YERXA., Seeley Flats, Calif.

GERMAIN'S RUBY KING PEPPER

Without fear of contradiction we can recommend Germain's Ruby King Pepper as being an ideal pepper for both home and market garden purposes. It is, in fact, one of the most popular of the many varieties.

We can absolutely recommend our strain for its many good qualities. The fruit grows to a size of four to five inches in length and three to three and one-half inches thick. The color is dark green when young, turning to a bright ruby red, and really ideal for pickling purposes. The flesh is thick, crisp, and tender, and the flavor is quite mild.

To our mind the two varieties Ruby King and Chinese Giant are by far the most desirable to be had. Price per packet **10 cents**; ounce **80 cents**; $\frac{1}{4}$ lb. **\$2.65**; 1 lb. **\$8.00**. Postpaid.

GERMAIN'S BANANA SQUASH

If you enjoy baked squash you will find Germain's Banana squash a dish fit for the gods. The flesh is solid and firm of a beautiful pumpkin pie shade and of very fine quality. The squash grows from one to two feet in length, the skin varying from a bright yellow to a light green shade. It is an excellent keeper and will last from one season to the next. It can also be used as a summer squash during the early stages of its growth.

Price, pkt. 10c, ounce 20c, ¼-pound 65c, pound \$2.00.

TRY THIS RECIPE

Cut squash into pieces about two inches square, removing the stringy portions and the seeds. Season with salt and pepper, and dots of butter. Place in dripping pan and bake in a moderate oven about fifty minutes or until soft. Serve in shell with butter, and season to taste.

Germain's
ZUCCHINI SQUASH

RECIPES FOR ZUCCHINI

FLORENTINE—Raw, cut in dice, about ¼ inch. Season with salt and pepper. Dip in flour, and then raw egg. Fry in skillet with olive oil and serve with drawn butter.

MORNAY—Cut in small squares about one inch. Boil for about one minute in salted water. Drain on a colander. Put in baking dish. Cover with cream sauce and a little Parmesan cheese and butter. Bake in oven until done.

JULIENNE—Cut in Julienne (like French fried potatoes), dip in milk, and then in flour. Fry in very hot grease. Season and serve.

Germain's
BANANA SQUASH

GERMAIN'S ZUCCHINI SQUASH

Zucchini belongs to the squash family, the other name for it being Italian Squash. For piquancy of flavor, tenderness, and general palatability I have never tasted its equal. It is truly a gastronomic wonder. We have prevailed upon Marcell's wonderful chef to give us his recipes for preparing Zucchini which we are reproducing on this page. It is easy to grow, just like any squash, and yields heavily. Try a packet of it at least and see whether or not we are right in the claims we make for it. The photograph shows a slight reduction from the actual picking size.

Pkt. 10c, oz. 25c, ¼lb. 85c, 1 lb. \$2.50, postpaid.

Santa Barbara, Calif.
I have had good results with Zucchini Squash. It has proved very prolific, and is fine cooked in the ways you recommend. I also had good results with other seeds purchased from you.
FANNY BOSLEY.

Santa Paula, Calif.
I got a package of seed of your Zucchini or Italian Squash last spring, and they are fine. They began bearing in July, and are still putting on young squashes. We have just two vines (or bushes), and have had all we could use.
J. T. RENFRO.

Falfurrias, Texas
I have raised squash all my life. The Zucchini is the super-squash.
BRECKINRIDGE SOUTH.

Bakersfield, Calif.
I will say I planted the Italian Squash and had very good luck with them, and consider them a very good squash.
P. S. SPRAGUE.

Summerland, Calif.
We found the Zucchini most satisfactory, and can highly recommend it for anyone desiring quality as well as a very prolific bearer.
W. F. SMITH.

The Zucchini Squash I find is a very toothsome vegetable, so much so that I praise it highly to all my friends. The plant is a vigorous grower and bears well.
JOHN W. LAWSON. San Ysidro, Calif.

Germain's Premium Globe Tomato

See Photograph to the Right

From all angles Germain's Globe tomato is probably the best grown. Primarily it gets its reputation from its shipping qualities, as it is undoubtedly the best shipping tomato known. During the past few months we have sent thousands of pounds of this variety into Mexico, where the vast majority of our winter tomatoes are grown. These come into the United States markets from January on, and provide the nation with winter fruit.

But as an all around tomato it is also equal to any and superior to most. For the home garden and for the market nothing better can be planted.

This variety is of a distinct globe shape, with a tendency to elongation, this resulting in a great number of slices being made from each fruit. The fruit is large, smooth skin, firm flesh, with few seeds. It is an early variety and ripens early. The color is rose with purple tinge.

Large quantities of fruit are borne by each vine, and as for quality it is unequalled by any, having a mild, pleasant taste and remarkably fine flavor.

Price: Packet 10c; ounce, 60c; ¼-lb., \$2.00; one pound \$6.00, postpaid.

Germain's Premium New Stone Tomato

See Photograph to the Left

Germain's New Stone Tomato is a beautiful bright red, of large uniform size and with very few seeds. All farmers demand it because of its extremely firm meat and because of its assured tonnage. It is a thoroughly dependable, proven tomato, as it may be planted from the earliest spring month when danger of frost is passed, and will bear right up to the first frost in the Fall.

The desirability of this tomato is greatly enhanced by its extreme smoothness and its hardiness. The one great requisite in a vegetable for private use is quality—first and always. The prime essentials are good flavor, the minimum of acidity, a tender skin, solid meat and flesh, few seeds and very little juicy pulp. Germain's New Stone Tomato meets all these requirements. It ripens evenly and in point of cost and labor in harvesting the chances of loss are minimized. Prices: Packet, 10c; ounce, 60c; ¼-lb., \$2.00; pound, \$6.00.

I had good success with the New Stone Tomato Seed, and have raised quantities of fine tomatoes even during the extreme warm weather. I am still getting fine tomatoes. We were bothered considerably with blight, but of course that has nothing to do with the seed. C. A. SCOTT, Delano, Calif.

Germain's Winter Queen

See Photograph to the Right

It is our business to find the best of everything for our customers. It is a policy that has made us a host of friends and built up a big seed and plant house.

One of our hobbies for years has been the tomato, and we have left no stone unturned in the development of this strain of **Winter Queen** to the high state of perfection which it now occupies.

Its compact bush is in striking contrast to the sprawling habit of other varieties—an appealing feature to the market gardener. It is a generous producer of even sized, finely colored fruit of remarkably firm flesh, which makes it a prime favorite with the shipper.

Another strong quality of **Germain's Winter Queen** is its hardiness, as it has been known to come through a frosty period in full vigor, where other varieties were entirely killed.

Prices: Packet, 10c; ounce, 50c; ¼-lb., \$1.65; pound, \$5.00.

Dixon, Ill.

I think the Winter Queen Tomato is one of the best on the market. I have tried seven or eight different kinds. In one way I like the Winter Queen the best; I have always had good success with it. I will have it as long as you will let me. It has proved to be everything you have said about it. I am sorry I have not time to tell you how it yields for me. I have the reputation of being a fine gardener especially tomatoes, and I buy the best seed I can find. I think you have one of the best. Excuse me for not saying more about this fine tomato. I am very busy selling them. All the seeds you have sent me have been very good.

R. E. BURKS.

VEGETABLE SEEDS

ALL PRICES ON THIS PAGE ARE POSTPAID

ARTICHOKE

Alcachofa Artischoke Artichaut

CULTURE—Sow any time except during hottest weather, when all seed beds require special care. Soil should be a free, moist loam and seeds should be planted an inch deep. Plant out when six inches high in rows four feet apart each way. Save offsets from best plants for new supply, as artichokes never come true from seed, some will prove inferior. When planting seedlings, reject those with spiniest leaves.

Germain **LARGE GREEN GLOBE.** The favorite garden Pkt Oz. ¼lb 1lb.
Plants of large Green Globe Artichoke, see page 16. 10 1 20 4 00 12 00

PALMETTO ASPARAGUS

ASPARAGUS

Esparrago Spargel Asperge

CULTURE—Soak seeds twenty-four hours before planting. Sow in February in beds broadcasted or in rows, covering about one inch. The following January transplant to rows three or four feet apart and a foot apart in the row, with at least six inches of soil over the roots. Light sandy soils are preferable.

NOTE: By planting two year old roots, much time and labor will be saved. See prices of roots, page 16.

ARGENTEUIL. The favorite in the Paris markets, and exceedingly popular wherever grown in the United States. The stalks grow to an enormous size, cook tender, of delicious flavor. Pkt Oz. ¼lb 1lb.
\$ 10 \$ 20 \$ 50 \$ 1 50

Germain **PALMETTO.** Standard among the asparagus shippers of California is the Palmetto, and Germain's have gone to a really unwarranted expense to get seed from the most perfect first growth stock. This strain grows to mammoth proportions, and very even in size, which makes it especially popular with shippers. The shoots are a light green, slightly tinted with pink, and are tender to an unusual length. No one will be disappointed with the productiveness and fine edible qualities of the Palmetto Asparagus.

BEANS

Note—Prices up to and including ten pound quantities include postage or expressage prepaid. When sent otherwise, deduct 10 cents per pound or fraction thereof. Prices listed for larger quantities, if desired sent by Parcel Post necessary postage should be added. See our Parcel Post Schedule on inside front cover page. If quantities are desired, write for special prices.

LIMA BEANS

Frijole Bohne Haricot Nain

CULTURE—Beans for the home garden should be a continuous summer crop, and sowings may be made from the middle of March to September. Plant two inches deep and two feet apart. Have drills one and one-half to two and one-half feet apart, according to variety; directions will be found on individual packets for the respective sorts. The average amount needed to plant an acre is fifty pounds. One pound will sow one hundred feet of drill. They will thrive in any good soil.

BUSH VARIETIES

FORDHOOK BUSH LIMA BEANS

The old fashioned name of "but'er bean" given to lima beans can best be appreciated when eating this delicious variety fresh from your own garden. There are from three to five beans in each pod, which grow in clusters of from two to five on long spikes, making the picking easy where the beans are eaten green. The bush is a vigorous grower reaching the height of two feet, erect and strong. Germain's have long recognized the Fordhook as a splendid variety and this year succeeded in getting a stock of seed which must be placed among the specialties, insuring the buyer of getting absolutely the best. Price, packet 10 cents; ½ pound 20 cents; one pound, 40 cents; ten pounds, \$3.50. Write for prices on 100 lb. lots.

FORD-HOOK BUSH LIMA BEAN

BEANS

See pages 58-59 for other varieties, such as Bayou, Black Eye, Castor, Mexican Pink, Small Navy, Lady Washington, Soja.

ALL PRICES ON THIS PAGE ARE POSTPAID

Note—Prices up to and including ten pound quantities include postage or expressage prepaid. When sent otherwise deduct 10 cents per pound or fraction thereof. Prices listed for larger quantities, if desired sent by Parcel Post, necessary postage should be added. See our Parcel Post Schedule on inside back cover page.

CULTURE—Beans respond very readily to good soil and cultivation. A light rich, well-drained loam is the most desirable. The use of manure is advisable but should be used sparingly as it might make the plant run too much to vine. There is no plant more sensitive to cold and wet than the bean. We therefore advise not to plant until the ground has become dry and warm. The largest returns will result in planting in drills from 2 to 3 feet apart. Cover the seed one and one-half inches deep and thin the young plants 3 to 6 inches apart in the row. If planted in hills, about 2 feet apart each way.

KEEP THEM COMING

For rotation, plant at intervals of from one to two weeks. The plants until time of blossoming should have frequent shallow cultivation, but any mutilation of the roots by cultivation after the plants come into blossom is likely to cause the blossoms to blast and so cut off the crop. Cultivation should always be very shallow and it is useless to expect a crop from a field so poorly prepared as to need deep stirring after planting.

BROAD BEANS

Germain **ENGLISH, OR BROAD WINDSOR.** The celebrated Pkt 1 lb 10 lb 100 lb
broad bean of England, growing on a strong stalk two feet high; beans eaten shelled. 10 \$ 30 2 50

DWARF OR BUSH GREEN POD

BURPEE'S STRINGLESS GREEN POD

Germain The Stringless Green Pod is recognized as being one of the best beans offered for market garden or general use. In point of earliness, it ranks among the first, and is excelled by none in bearing ability and in good quality. It is one of the greatest green pod beans to date. The pod is very brittle, long and round and is entirely without strings. It is about five inches in length, green in color, very tender, and of the highest and best flavor, remaining for a long time in edible condition, and bearing continuously for weeks.

Price, packet 10 cents, ½ lb. 20 cents, 1 lb. 40 cents, 10 lbs. \$3.50.

Germain **CANADIAN WONDER.** This is a strong growing bush variety, bearing large numbers of flat, handsome pods, long and very tender, and with excellent flavor. They are widely known as the best for winter use, and are valuable both to the market gardener and for the home garden.

CULTURE—Sow in a rich soil, in well manured hills, three feet apart each way covering to a depth of two inches. In each hill set a pole eight or ten feet long, around which plant five or six beans, afterward thin out leaving four strong plants to each hill.

INOCULATE THIS SEED WITH FARMOGERM

GERMAIN'S IMPROVED

WHITE KENTUCKY WONDER

A very popular and satisfactory type of the Kentucky Wonder Beans. It was introduced a few years ago and since then it has been growing in popularity by leaps and bounds until now it is a most desired variety.

Germain's Improved White Kentucky Wonder Bean is a pole bean of a tenderness that places it in the front rank of the bean family. Its productiveness is so exceptional that any one planting a bean garden should not be without it, and as for the market gardener, it will be impossible for him to find a bean that will yield greater returns per acre. It is earlier by two weeks than the other types of Kentucky Wonders and the Market Gardener, who is wide awake, realizes that the big returns are made by harvesting a heavy crop early.

Its tenderness, crispness and color make it very desirable. The pods average from eight to ten inches in length and are of a deep greenshade. The seeds when dry are of a snowy whiteness.

Prices: 10c per pkt., 1/2 lb. 20c, 1 lb. 40c, 10 lbs. \$3.50.

ASPARAGUS, OR YARD LONG. Interesting and popular among those who raise it, this bean is still a novelty to many gardeners. No more tender or finer flavored bean ever went into the pot. Every housewife will appreciate the entire absence of strings in the Asparagus Bean, and it should be grown in every home garden.

Germain **KENTUCKY WONDER BROWN SEEDED.** This bean is very early and enormously productive, the long green pods hanging in clusters on the poles. They are entirely stringless and very tender. It has long been known as a favorite, as it meets with a ready sale on the early market and is considered a delicacy in the home garden.

KENTUCKY WONDER WAX. Similar to above, yellow pods of a rich, buttery flavor as a snap bean; also a good white shell bean for winter. Of the finest flavor.

LONDON HORTICULTURAL, OR SPECKLED CRANBERRY. Vines vigorous, with large light-colored leaves; pods short, broad, pale green, becoming streaked with red as they mature; good either green or dry.

SCARLET RUNNER. Ornamental and useful. The vine is graceful; flowers of a brilliant scarlet, and the beans are of excellent quality, shelled or in a dry state.

CONTROLLING BEAN PESTS

Beans in California are troubled at various times with insect pests like Aphis, Red Spider, Weevil, and Fungous troubles such as mildew and rust.

Aphis can be controlled by a nicotine spray or with tobacco dust; Red Spider and Mildew by dusting with sulphur, and Rust by spraying or dusting with Bordeaux Mixture. See page 86

The most serious pest is the Bean Weevil, which only becomes apparent after harvesting. The only remedy is to fumigate the beans with Carbon Bisulphide at the rate of two ounces to 100 pounds. A simple method is to put the seed in a tightly closed room or in a small container and place the Carbon Bisulphide in saucers at the top, allowing it to evaporate. Be sure room or container is closed tightly.

BEETS

☛ Note.—Prices listed are postpaid.

TABLE BEETS

Remolacha **Rothe Ruebe** **Betterave**
CULTURE—This is one of few vegetables that can be grown the year round. A beet patch completes the garden. Seed planted at intervals of three weeks will keep beets coming in rotation. The seed should be sown in drills 15 inches apart and 1½ inches deep, and covered by hand unless following field culture. (The uses of a rake for this purpose disturbs the seed and often draws the seed out of the ground. The result will be an irregular row.) Thin out then 9 inches apart in the row. These young beets are excellent used as spinach. Frequent cultivation is essential to produce a successful crop.

CROSBY'S EGYPTIAN BEET

CROSBY'S EGYPTIAN BEET

Among all the table beets there is probably no other which has been so often featured by seed houses, where a first class stock of seeds can be obtained. A good purchase by one of our buyers causes us to put the Germain mark of approval on this variety this year by placing it among our specialties. Many experienced growers say "Crosby's Egyptian is the only beet worth planting," and while this may be somewhat of an exaggerated opinion, we will unhesitatingly recommend this lot of seed as being the best that money can buy. Crosby's Egyptian is a medium sized beet, very early and of small top. It grows smooth and the deep crimson flesh is sweet and tender. Price, Pkt. 10 cents; ounce 15 cents; ¼ pound 40 cents; pound \$1.25.

	Pkt	Oz.	¼lb	1 lb
BLOOD TURNIP. One of the best of the early table beets. Deep rich color and splendid quality	10	15	35	1 00
CROSBY'S EGYPTIAN. See special y above.				
DETROIT DARK RED. One of the best beets for either market or home garden. Very rich in color, being a dark red. We recommend this as specially desirable to plant for market gardeners on account of its attractive appearance. The root is medium sized, globular or nearly round, very smooth and of dark red color.	10	15	40	1 25
<i>Germain</i> EXTRA EARLY ECLIPSE. Eclipse is a well known variety of table beets. Nearly as early as the Egyptian. It is nearly round in shape and has a small top, while the flesh is fine grained and tender with bright red color	10	15	35	1 00
EXTRA EARLY EGYPTIAN. Very early, of dark blood color, rather flat shape.	10	15	35	1 00
<i>Germain</i> LONG BLOOD. A splendid variety of fine flavor and of long, symmetrical shape.	10	15	35	1 00
SWISS CHARD, OR SILVER. Cultivated for its leafstalks, which are served like asparagus, and for its leaves, cooked like spinach. Cut often, as new stalks will be produced.	10	15	35	1 00
LUCULLUS SWISS CHARD. A new variety. Leaves very crinkled of an attractive light green color and very thick and fleshy. Easily grown and furnishes a supply of good greens for a long period.	10	15	35	1 00

STOCK AND SUGAR BEETS

CABBAGE

Note—Prices listed are postpaid. Cabbage Plants are listed on page eight.

Col Repollo

CULTURE—Knowing the first essential of successful cabbage expert seed growers, and therefore we enjoy an enormous volume To raise cabbage successfully is not difficult, as it is comparatively rich texture at a depth not to exceed 1/2-inch; and the soil should be crowd one another before they are transplanted, but as soon as large

Kopfkohl

growing to be good seed, we have always obtained our seed from easily grown. We advise the planting of seed in beds or land of light, pressed firmly over the seed. The plants should not be allowed to be handled should be lifted out to their permanent place. For early varieties, such as Winnigstadt, plant in rows 3 feet apart, plants 1 foot apart in the row. The larger headed varieties, 1 1/4 feet apart in the row.

Chou Pomme

For the permanent field, soil of a firm, stiff, rich nature is preferred. Immediately after transplanting, the plants should be watered and constant, deep cultivation is very essential. A cool, moist climate seems to be the most suitable of all for the culture of cabbage which generally grows to greater perfection in the coast region, as heat and drought are injurious to them.

Sudden changes of temperature have a tendency to make cabbage go to seed and growers should watch them carefully to see that their field is moist but properly drained. Sudden check in growth is prevented by this care.

It is only logical that a climate that is good for man would be good for insects also. California has a greater variety of insects which live longer and reproduce more generally than any other State in the Union.

On that account we have found it advisable to maintain an insecticide department which devotes itself to garden troubles of all kinds. Write to this department at any time and tell us your troubles. Our experts will gladly advise you to the best of their ability.

The cabbage, for instance, is a vegetable that while not bothered with a great number of insects, nevertheless has two enemies which do considerable damage if not routed.

These are the cabbage worm and the cabbage aphid. The former is velvety green in color and when full grown is about an inch and a quarter in length. They are easy to detect and the parent of this worm is present from morning to night in the shape of the common white butterfly, which seems so harmless when flying around in the garden. The best remedy is dusting or spraying with Corona Dry.

The cabbage aphid, or as otherwise known the "cabbage louse," is a small insect of a greenish black color and similar in appearance to the green aphid found on rose bushes. Nicotine sprays such as Black Leaf 40, or Tobacco Dust, applied thoroughly, will effectively combat the ravages of this pest.

RED DUTCH OR PICKLING. Fine, solid, dark red heads.	10	35	1 20	3 50

CARROTS

Note—Prices listed are postpaid.

Zanahoria
CULTURE—Sow any time in deep, loose soil, preferably sandy loam about one-half inch deep, in rows eighteen inches apart and thin to three inches apart. Water freely at all times. The carrot is one of the most wholesome and nutritious of our garden roots, deserving to be more extensively used for culinary purposes and we urge our readers to give some of the early table sorts a trial. For feeding stock, especially horses and milch cows, the carrot cannot be surpassed, and it should be more largely grown by farmers for this purpose. One ounce of seed will sow about 150 feet of row. Four pounds to the acre.

OXHEART, OR GUERANDE, CARROTS

The common tendency of carrots to grow woody or pithy is least noticeable in this improved and popular strain. This variety may be left in the ground longer than any other without developing these depreciating qualities. The Oxheart is a short carrot growing about 4½ inches long and about 3½ inches thick at the shoulder, with a slight taper to the stump rooted bottom. For this reason it is especially desirable for heavy soils, which also grow the best carrots. The flesh is a bright orange, smooth grained and sweet, and it is equally fine for table use or stock feeding. We are pleased to include this variety in our specialties this year, and our selection of this season puts it among the stocks which we can guarantee. Price, packet 10 cents; ounce 20 cents; ¼ pound 45 cents; pound \$1.25.

<i>Germain</i>	Pkt	Oz.	¼ lb	1 lb
EARLY CHANTENAY. This is the best early carrot grown for market gardeners. Six inches long, stump rooted, smooth, deep red, fine grained and sugary, not apt to crack	10	20	45	\$1 25
EARLY FRENCH FORCING. The earliest variety, largely grown for forcing; globular-shaped root of orange-red color.	10	20	50	1 50
EARLY SCARLET, OR SHORT HORN. One of the most popular varieties for table use; color deep orange.	10	20	50	1 50
IMPROVED DANVERS HALF LONG. A first-class carrot for all soils; in form midway between Long Orange and Short Horn. Of a rich, dark orange color, very smooth and handsome; 20 to 30 tons per acre is not an unusual crop.	10	20	45	1 25
IMPROVED LARGE WHITE BELGIAN. Very productive; for stock-feeding exclusively; grows one-third out of ground. Roots white; green above ground.	10	20	40	1 10
IMPROVED YELLOW BELGIAN. Same as White Belgian, excepting in color.	10	20	40	1 10
IMPROVED LONG ORANGE. A well-known standard sort; roots long, thickest near the crown, tapering regularly to a point; color deep orange. Suitable for the table and main field crop.	10	20	45	1 25

CAULIFLOWER

Note—Prices listed are postpaid.

CULTURE: Prepare the seed-bed carefully, using only rich and thoroughly pulverized soil. Good results are obtained by keeping the plant in a healthy and rapidly growing condition. Broadcast the seed in the seed-bed prepared, sowing the early varieties from May 15th to July 1st; medium early varieties May 20th to July 5th; and late varieties any time from June 25th to Aug. 25th inclusive. When the plants are 40 days old, they are ready for the field. Transplant to 15 inches apart in rows 30 to 36 inches apart. Do not leave plants in the hot-bed over 45 days as the stems become hard and poor results follow. Keep the plants vigorous and growing. Due to different localities requiring a different time of planting of Cauliflower, we advise your writing us for specific planting information, which we will be glad to give. Two or three week's difference in planting means success or failure.

CAULIFLOWER PLANTS See page sixteen

GERMAIN'S SIX WEEKS CAULIFLOWER.

This new introduction in a cauliflower is a marvelous improvement over the other varieties for earliness and sure headed qualities. It is truly the "Earliest of the Early", and will mature a firm head of excellent quality in six weeks. It unquestionably will be a welcome addition to the home garden, and on account of its earliness will make rapid strides as a market garden variety.

SEE DESCRIPTION OF GERMAIN'S SNOWFLAKE CAULIFLOWER Page 18.

<i>Germain's</i>	Pk	½ oz.	1 Oz.	¼ lb	1 lb
EARLY SNOWBALL. It is a snow-white Cauliflower and its leaves have a tendency to over-lap at the top of the flowers. In this way, it protects from injury, exposure to frost, rain or heat. It is very essential that good Cauliflower be so protected on account of shipping, and in this, our strain is perfect. Our market garden trade is immensely pleased with this strain and our business on it has grown to very large proportions.	25	1 00	3 50	10 00	35 00
EXTRA EARLY ERFURT. Remarkably sure heading, early variety, dwarf habit; similar, not as early as Snowball.	25	1 00	3 50	10 00	35 00
GERMAIN'S DRY WEATHER. Produces large, solid and pure white heads. It is especially adapted for growing in dry locations where most varieties fail to produce good heads.	25	1 00	3 50	10 00	35 00
LARGE ALGIERS. A splendid late variety, eminently adapted for Southern California; heads large, white, solid. One of the best for market gardeners. Our stock is extra fancy.	15	50	1 50	5 00	15 00
VEITCH'S AUTUMN GIANT. A large, late sort of robust habit; heads compact, large outer leaves. Succeeds well in southern latitudes.	20	50	1 35	4 00	12 00

CELERY

Note—Prices listed are postpaid.

CULTURE—Sow from February to May in drills one foot apart. Later, usually in June, transplant to rows four feet apart and six inches apart in row. Rows should be furrowed out so plants may be set six inches deep. Later, soil may be banked against rows for blanching, even so-called self-blanching varieties; needing the cool, moist soil to render the stalks crisp and tender, but this should not be done until a few weeks before harvesting. One ounce of seed will produce 5000 plants.

GOLDEN SELF-BLANCHING, FRENCH STOCK. See specialty opposite.						
<i>Germain</i> WHITE PLUME. We offer a choice strain of this valuable and popular variety. Unsurpassed for fall and early winter use, requiring very little earthing up to blanch.	10	35	1 20	3 50		

GOLDEN SELF-BLANCHING CELERY SEED (French Stock)

The trial ground test in comparison with samples of seed from thirty growers should prove the selected lot to be as fine seed as can be produced. This is exactly the test we applied to this year's stock of this variety, and even at the present high price of celery seed we are satisfied we are offering the greatest value for the money in this tried and true sort. Celery seed has for many years been a strong item with Germain's for purity and high quality, but with the establishment of our testing grounds we are in a better position than ever to praise this item. It is a thrifty variety, growing 18 to 22 inches in height, very stocky, heavy, perfectly solid and a splendid shipper. It is mild but characteristically flavored, and from every point of analysis is entitled to the mark of approval of this house. Packet 15 cents; ounce \$2.00; 1/4 pound \$6.00; pound \$20.00; See page eighteen

CELERIAC

Note—Prices listed are postpaid.

CULTURE—It is grown in nearly the same way as common celery and like this vegetable, requires good rich, moist, mellow, and well-manured soil. It is generally sown in seed beds in February and can be planted until May. When about 4 to 6 inches high the plants should be removed from seed bed and planted 12 inches in the rows and the rows should be about 18 inches apart. Plants require no further attention than frequent watering and is necessary to have the ground well cultivated and free from weeds. See cut below.

CELERIAC, LARGE, SMOOTH PRAGUE. It is a turnip-rooted celery of a distinctive flavor similar to celery. It makes a wonderful salad when cooked and cut cold.

Pkt	Oz.	1/2 lb	1 lb
10	5	35	1 20 53 50

CHERVIL

Note—Prices listed are postpaid.

CULTURE—The seed may be sown throughout the entire year in open ground where the crop is to be grown, but in very hot weather it is better to sow in a shady position with a northern exposure. The leaves can be cut in from 6 weeks to two months from date of sowing. The leaves are aromatic and they are used for seasoning and in salads. This vegetable is used a great deal by the English. For further culture same as parsley.

CURLED Is a vigorous grower, handsome and ornamental. It has a pleasing flavor and is highly recommended for garnishing, also for flavoring soups. See cut below.

Pkt	Oz.	1/2 lb	1 lb
10	35	1 20	3 50

CHICORY

Note—Prices listed are postpaid.

CULTURE—Sow any time except hottest weather, though early spring is preferable, in rows eighteen inches apart and three or four inches apart in row. A deep-rooting plant requiring little care if soil is moist.

LARGE ROOTED MAGDEBURG. This variety is grown for its roots, which are dried or roasted and ground as a substitute or adulterant for coffee. The leaves can also be used but should be cut when fresh. They make a splendid salad. To secure large roots, soil should be light, rich and deeply worked. Plants should be thinned from 4 to 6 inches apart and the seed sown 1/2-inch deep, using 1 oz. to every 100 feet of row. See cut below.

WITLOOF OR FRENCH ENDIVE. Is used as a salad and is most delicious served with French dressing and eaten like lettuce. Seed should be sown in June, July and August in drills 12 to 18 inches apart and the seedlings should be thinned out to stand not closer than 3 inches.

In the fall, lift the plant, trim off the leaves and store in sandy soil in a cool place until wanted for forcing. The roots should be planted upright about 1 1/2 to 2 inches apart in a trench 16 to 18 inches deep. This brings the neck of the root within 9 inches of the level of the surface of the trench, which should be filled with light soil. It requires about one month to force the root. The heads are then cut off with a small portion of the neck of the root attached. We recommend this vegetable to those who enjoy a salad of exceptional flavor. It can be easily grown if these directions are carefully followed. See cut below.

Malz

Mais

Mais

CULTURE—Sweet corn should not be planted until in the spring when all danger of frost is past. The soil preferred is one rich and moist. Corn is not a lazy man's crop, as continual cultivation is necessary. Plant in hills 18 inches apart with rows 3 feet apart. Three or four seeds may be planted in each hill but not more than two allowed to stand. As "suckers" or excess shoots appear they should be removed as they take strength from the mother plant. Whenever soil presents an appearance of drying, irrigate. To prevent the Corn Ear Worm we recommend Corona Dry.

Note—Prices up to and including ten pound quantities include postage or expressage prepaid. When sent otherwise, deduct 10 cents per pound or fraction thereof. Prices listed for larger quantities if desired sent by Parcel Post, necessary postage should be added. See our Parcel Post Schedule on inside front cover. If quantities are desired, do not fail to write for special prices.

CORN—FIELD SEE PAGE 49

CORN SALAD

Canonigos Feldsalat Mache

CULTURE—This should be planted in early spring or late summer. It is a hardy plant having no enemies and only requires 60 to 65 days to mature; it however, will not succeed in hot weather but must have cool growing weather. One ounce of seed will sow a row 30 feet long. The small leaves are served like lettuce or for garnishing dishes in the same manner as parsley or cress.

<i>Germain</i> Feticcus, or Lamb's Lettuce.....	Pkt	oz	1/4 lb	1 lb
	10	30	1 00	3 00

CHIVES

Cebelleto Schnittlauch Ciboulette

CULTURE—The same methods of growing are used as for green onions. However, when the plant is about 2 inches high it should be transplanted to 3 inches apart in rows which are 12 inches apart. Chives are grown for the young leaves which are produced freely from early in the spring throughout the summer. It is a perennial of continuous growth and as the leaves are cut away, new growth comes on. The flavor is mild, resembling that of an onion and is used in soups and various other dishes if onion flavor is desired. For plants see page sixteen. Per packet 15 cents, oz. \$2.50.

CUCUMBERS

Note—Prices listed are postpaid.
 Pepino Gurke Concombre

CULTURE—Cucumbers should not be planted until all danger of frost is over and the ground is warm, because like all vine crops the seed is liable to rot unless proper conditions prevail.

Cucumbers should be grown in every garden, for slicing for the table and small fruits for pickling. In most sections two plantings can be made. First, as early as the weather permits, second, the latter part of July or first of August.

The early planting will produce cucumbers for table use and the late planting will give the best supply of young fruits for pickling purposes. Sow 6 to 10 seed in hills 4 to 6 feet apart. After all danger of pests are removed and you are sure of your plants, thin, leaving the three strongest. Cucumbers enjoy a light, sandy, rich soil. They should be planted one inch deep. One ounce will plant 50 hills; 2 pounds, one acre.

DAVIS PERFECT CUCUMBER. Every one who saw this crop last year says they never saw anything to equal it. Dark, glossy, green, slim and symmetrical, with an average length of ten to twelve inches. They hold over till nearly ripe, when they turn white without a yellow streak on them. Quality fine as seed are very soft when fit for table use. Very tender, brittle and of exceptional flavor. Early as earliest strain of White Spine and outyields all others. Price, pkt. 10 cents; ounce 25 cents; 1/4 pound 85 cents; pound \$2.50

CRESS, OR PEPPER GRASS

Note—Prices listed are postpaid.

Mastuerzo, Berro Kresse Cresson

CULTURE—There are many kinds of cress, all characterized by a more or less pungent taste. They are used in salads and for garnishing dishes.

Water cress is grown in almost any ditch, shallow stream, or moist earth and also under benches in greenhouses. It is a perennial and is propagated by scattering either seeds or freshly cut stems where the plants are wanted to grow.

Pepper grass or cress should be sown thickly in drills every few days if a succession is wanted. One ounce will sow 200 feet of row.

FINE CURLED (PEPPER GRASS). Grown very quickly from seeds sown thinly in drills. Leaves are finely curled and very ornamental but as the plant runs quickly to seed, frequent plantings should be made. The flavor resembles that of mustard. . . . Pkt. Oz. 1/4 lb 1 lb
 5 10 5 20 5 50 51 50

GERMAIN'S SEEDS ESTABLISHED

DAVIS PERFECT CUCUMBER

DANDELION

Note—Prices listed are postpaid.

Amargon Kuhblume Pissenlit

CULTURE—It is used for greens and is much prized by epicures. Sow seed in the spring in rows 1 foot apart and thin plants to stand 1 ft. apart in the row. Sandy loam soil is best suited.

IMPROVED. An early, large, broad-leaved variety Pkt | Oz. | 10 | \$1 50

EGG PLANT

Note—Prices listed are postpaid. For plants see page sixteen.

Aubergine Berengena Eierpflanze

CULTURE—The plants should be started under glass if wanted early. If later results are desired, seed should be planted in cold frames or in boxes where special care can be given.

Egg plant seed is very delicate and will not grow unless special care is given it. It is easily affected by cold weather. Seed should be barely covered and particular attention should be given to have well-pulverized soil of rich composition. Moisture is an important factor and care should be taken to have the soil in beds or boxes moist, as any check to growth is exceedingly difficult to overcome and invites failure.

Plants should not be set out permanently until all danger of frost is over, using plants 6 to 8 inches tall of vigorous growth for setting in the field.

Space plants 3 feet apart each way and cultivate thoroughly throughout the season.

NEW YORK IMPROVED. Non of this delicious vegetable has ever been brought to such a state of perfection as GERMAIN'S Strain of New York. An early variety, large, oval-shaped and the deep purple kind that tastes surprisingly like oysters when fried. It has an indescribably delicate and alluring flavor when stewed. This variety is a great producer, 50 to 60 pounds having been grown from one plant. It has been perfected beyond any tendency to pithiness or dryness.

BLACK BEAUTY.—This is a fine, extra early variety, which has proven very satisfactory.

10	75	2 50	7 50
10	75	2 50	7 50

NEW YORK IMPROVED

ENDIVE

Escarola o Endivia

Endivie

Chicoree

CULTURE—The same as for lettuce.

This plant is highly esteemed by the French people and is their popular salad plant. Those Americans who have used it are unanimous in their praise. There is not sufficient of it planted.

To produce it properly it should be blanched and this can be easily accomplished by drawing the leaves together in a head and tying them together in a head a month before using for the table. One ounce of seed to 100 feet of row.

BROAD-LEAVED BATAVIAN. Leaves are broad, thick, green and more or less twisted with white midribs. It forms large hearts which when blanched, makes one of the best winter salads. Pkt | Oz. | 1/4 lb | 1 lb

GREEN CURLED. Used very much in salads. Finds a ready market. Hardy, vigorous grower, with deep green leaves, midribs usually tinged with rose. 10 | 25 | 85 | 2 50

WHITE CURLED. A beautiful variety. The leaves are finely curled or massed and need no tying up to blanch as the coloring is naturally a pale golden yellow. This not only makes it very attractive but easy to grow, as plants can be gathered at any time. 10 | 25 | 85 | 2 50

HERBS IN COOKING

Every good cook uses herbs in the culinary art, but comparatively few housewives are acquainted with the delicious and appetizing flavors secured by the addition to many dishes of one or more of the old-fashioned herbs. Easily grown in the house yard and preserved for use simply by drying and placing in tight jars, no order for garden seeds should fail to include them.

LONDON FLAG LEEK

THOUSAND HEADED KALE

GARLIC

Ajo Knoblauch Ail

CULTURE—Garlic is a perennial plant with a bulbous root and belongs to the onion family. It has flat leaves and the bulb is composed of several parts or bulbs similar to those of a multiplier onion set. Garlic has a strong, penetrating odor and flavor and is highly esteemed for flavoring soups, stews, etc. We cannot offer seeds but can supply the bulbs or sets.

Prepare the ground as for onions, separate the sets and plant them in drills eight inches apart and four to six inches apart in the drill, covering two inches deep. Cultivate like onion sets. When the leaves turn yellow, pull bulbs and dry in the shade.

GARLIC SETS. Per pound 40 cents postpaid. Write for price when quantities are wanted.

Note—Prices listed are postpaid.

HERBS

POT, SWEET AND MEDICINAL

10 cents per packet.

A well assorted selection of the various kinds of herbs should have a place in every garden. Their value in seasoning and flavoring is well known and appreciated. Care should be taken to harvest on a dry day just before they fully blossom.

KALE, OR BORECOLE

Breton Blaetterkohl Chou Vert

CULTURE—This is a very popular boiling green and in Southern California can be grown the year around. It resembles cabbage in flavor, is a hardy plant and can be easily grown from seed. Plants are usually cut off when the leaves are 6 inches or more in length, but with the fine curled varieties the leaves can be gathered for use when of good size.

If the tall Scotch variety is planted, the lower leaves should be carefully pulled off so that the plants can grow on and furnish a continuous supply.

This is also true of Jersey or Tree Kale. One ounce of seed will produce 4000 plants. Seed should be sown thinly in drill and reset 12 inches apart in rows 3 feet apart.

<i>Germain</i> DWARF CURLED SCOTCH. Very hardy, excellent Pkt. Oz. 1/4 lb 1 lb	10	20	50	1	50
for spring use.					
<i>Germain</i> GREEN CURLED SCOTCH. The kind most commonly used; grows to a height of eighteen inches; spreads to three feet in diameter; leaves bright green and curled.	10	20	50	1	50
<i>Germain</i> JERSEY, OR TREE KALE. Of vigorous growth, grown for chickens and stock only.	10	20	45	1	25
THOUSAND HEADED KALE. An excellent food for poultry, an immense yielder. Crops are known to have gone as high as 60 tons of green feed per acre. Anyone having poultry should plant it.	10	20	45	1	25

Seed should be planted in drills 3 feet apart and the plants transplanted when from 6 to 8 inches high. The plants should be set three feet apart each way.

They grow about 4 feet high with a wide spread of leaves and a single plant often weighs 30 to 40 pounds.

KOHLRABI

Colinabo Kohlrabi Chou-rave

CULTURE—This vegetable is a cross between a cabbage and a turnip. The edible portion is the large bulb which forms on the stem above the soil. We advise successive sowing in order to obtain tender bulbs, which have a mild, delicate, cabbage-like flavor. It is a hardy plant and seed may be sown practically all the year around. Plant it like turnip and thin to six inches apart in row. One ounce seed will produce 2000 plants.

EARLY WHITE VIENNA. Flesh white and tender	Pkt	Oz.	1/4 lb	1 lb
	10	30	51	00 53 00

LEEK

Puerro Lauch Poireau

CULTURE—Leek is a very hardy plant with a sweet onion-like flavor. It resembles the young onion growth in the spring as it does not bulb.

The neck or stems are blanched by drawing the earth up about them as the plant grows in size or they can be transplanted to trenches and the trench gradually filled as the plant grows. They should be planted in drills or rows 16 to 20 inches apart and the plants 10 to 12 inches apart.

Plant seed in seed bed, broadcast or in drills, covered to depth of one-half inch, and when they are about as thick as a good sized goose quill they should be transplanted.

LONDON FLAG. A large and strong plant; hardy	Pkt	Oz.	1/4 lb	1 lb
Zucchini is Wonderful [35] See Page Twenty-three	10	35	51	15 53 50

LETTUCE

Note—Prices listed are postpaid.

Lechuga Salat Laitue

CULTURE—A world wide grown vegetable because it can be quickly and easily grown, is extremely palatable and very nutritious. Every garden deserves a lettuce plot. The quickest growing types are the loose leaf varieties and we suggest for the home garden a plot of loose leaf and a bed of the heading type. The loose leaf varieties will have matured and be used up by the time the heading types are matured.

The loose leaf Lettuce does not form heads but where the plants are grown a distance apart they make a large rounded cluster of leaves. Leaves are heavily crumpled and attractive in appearance, crisp and tender. We advise the planting of two ounces of seed for a 150 foot row and if the lettuce is too thick, thin after it has attained a size which can be pulled and used for salad or it can be thinned out when young and transplanted to another section of the garden. Lettuce needs considerable moisture, applied often but not too heavily and plenty of cultivation to obtain best results.

HEAD LETTUCE, is so called because of its extremely solid or compact formation. Such types as Los Angeles Market, Wonderful, New York, Big Boston and Iceberg, may be depended upon to satisfactorily mature a firm cabbage-like head.

Heading varieties should be sown the same as loose leaf except that it should by all means be thinned out when the fourth leaf appears leaving plants in the row 10 inches apart.

A rich pliable medium loam soil is best.

ICEBERG LETTUCE

Germain's
WHITE COS
LETTUCE

For Fertilizing Use [36] Nuvida Fertilizer

Germain RECOMMENDS
ICEBERG LETTUCE

A splendid Head Lettuce. For summer planting—compact, tender, crisp, creamy white heads.

Grows a solid head in midsummer and is highly praised by all users. Grow this large, crisp, tender and sweet summer heading lettuce when other varieties will not head. Germain's recognized the superb qualities of this Iceberg Lettuce long ago and with our recommendation it is grown more extensively than any other lettuce during the summer. Pkt. 10 cents; ounce 20 cents; ¼ pound 65 cents; 1 pound \$2.00.

CABBAGE OR HEADING VARIETIES

MUSKMELONS

Note—Prices listed are postpaid.

Melon Almizcleno

Cantalupen

Muscade

CULTURE.—Muskmelons must not under ordinary gardening conditions be planted until all danger of frost is past. This is usually March, and planting may continue until July 15th. Warm ground is essential to the germination of the seed, for if planted too early in the Spring it will rot. It is highly important that your soil should be in proper planting condition. First, it must be thoroughly soaked or irrigated. Second, as quickly as the moisture has thoroughly penetrated and the soil is in a tillable or workable condition, spade or plow the ground and see that it is thoroughly pulverized. Third, prepare furrows 6 to 8 inches in depth and 5 to 7 feet apart according to space you can spare. Fourth, plant the seed in the furrows about 6 feet apart, covering the seed not more than 1 inch deep and as the plant grows, gradually fill up the furrow about it with soil until level with surface.

Continuous cultivation is now necessary and where soil conditions require, systematic irrigation should be followed. Do not, however, irrigate close to the plant as it will cause dampening off, and other diseases. The roots of the plant being as long as the vine, close up irrigation is not necessary and in cultivating see that these roots are not disturbed as it would ruin the plant. Practice frequent shallow cultivation. Plant 8 seeds to the hill and when thoroughly established pull out all but three. Two to three pounds of seed is used to an acre.

THOROUGHBRED ROCKY FORD CANTALOUPE

GREEN FLESHED VARIETIES

THOROUGHBRED ROCKY FORD. This is considered an Pkt improvement on the Rocky Ford; our seed is selected with the greatest care. Oz. 1/4 lb 1 lb

GERMAIN'S "HONEY DEW" MELON

The color of Germain's Honey Dew Melon is a dull creamy white. The rind is very thin and close grained. The flesh is a rich green, very fine grained and exceptionally sweet and juicy. The flavor is indescribably delicious. It is a long keeping melon, remaining in good edible condition for several months. The size is about six to seven inches in diameter from top to bottom and about eight inches wide.

The fact that Germain's Honey Dew Melons may be selected by color when being picked for market enabled the grower to know in advance that his entire shipment is composed of first class melons such as will please the most fastidious trade. This feature makes this melon a very valuable type to grow for market. If you want the very last word in melon flavor, don't fail to plant Germain's Honey Dew. This is the melon that now commands fancy prices in every market. Prices, per packet 10c; per ounce 25c; per 1/4 pound 85c; per pound \$2.50.

Mushroom Spawn

Seta Schwamm Champignon

Cultural instructions for growing mushrooms given free to every purchaser of spawn.

LAMBERT'S PURE CULTURE. This spawn is specially prepared for us and produces results where the average spawn proves a failure. It is a strong strain of spawn thoroughly acclimated to California conditions and selected with reference to earliness, size, flavor, appearance, prolificity and quality of the mushrooms that it will produce. We highly recommend this spawn to those who intend to raise mushrooms for the market.

Bricks 40 cents each, 5 bricks \$1.75, postpaid.

Mustard

Note—Prices are postpaid.

Mostaza Senf Moutarde

CULTURE.—Sow any time in the year, though autumn sowing brings best greens for they revel in cool weather. Not particular as to soil, though a medium heavy one is best.

SALMON FLESHED VARIETIES

	Pkt	Oz.	¼ lb	1 lb
ROCKY FORD-POLLOCK No. 1025. The latest improved type of the popular Rocky Ford. Perfect shipping qualities. Very good flavor.	10	20	65	2 00
ROCKY FORD GOLD LINED. A perfect shipper due to the hard netted rind. Gets its name from the yellow tinge around the seed cavity. Has best flavor of all Rocky Fords.	10	20	65	2 00
PERSIAN. A new variety, yellow flesh, heavily netted but of smooth rind. Very sweet and of distinctive flavor. Splendid keeper—average weight about 7 pounds each—many much larger.	10	50	1 65	5 00
BANANA. Grows one and a half to two feet in length and three or four inches in diameter; flesh salmon, and exquisitely flavored, resembling banana. Brings a high price in eastern markets.	10	20	50	1 50
<i>Germain</i> BURRELL'S GEM. Asplendid new variety. Superior to Rocky Ford. Flesh thick, salmon in color and fine flavor; rind heavily netted.	10	20	50	1 50
GOLDEN HONEY. A salmon-fleshed Honey Dew. Recently introduced. Richest and sweetest of melons.	10	30	1 00	3 00
<i>Germain</i> HOODOO. A new and excellent variety; an ideal shipper of medium size; rind thin; flesh very thick firm and highly colored; of fine texture and delicious flavor.	10	20	60	1 75
EMERALD GEM. A small, very early melon; form globular, flesh salmon-colored, exceptionally fine flavor.	10	20	60	1 75
INDIANA. Rich yellow flesh.	10	30	1 00	3 00
MILLER'S CREAM, OR OSAGE. The fruit is large and round, with light green netted skin and thick, sweet, salmon-colored flesh.	10	20	50	1 50
PAUL ROSE. Handsome; oval, new variety; rich orange, flesh very sweet.	10	20	65	2 00
TIP TOP. A prime favorite for the home garden or nearby markets. Medium size, deeply ribbed slightly netted. Flesh salmon color, rich and sweet.	10	25	85	2 50

MISSION BELL

GERMAIN'S "MISSION BELL" CANTALOUPE

We consider ourselves very fortunate in being able to offer this splendid melon. The flesh is a full salmon color even up to the very rind, and is of unsurpassed flavor, bearing a high percentage of sugar. The rind is heavily netted and the melon is larger than medium size.

Mission Bell is a vigorous grower, early bearer, and if planted a bit late in the season is not so acutely susceptible to frost. An outstanding feature is the keeping qualities, both on the vine and after being picked. For an all round family melon, here is a crackerjack; and as for the market gardeners, we can say Mission Bell is grown by California's most extensive melon growers. You can't beat the Mission Bell. Pkt. 10c; oz. 40c; ¼ lb. \$1.35; lb. \$4.00.

CASABA MELONS

Note—Prices listed are postpaid.

CULTURE—The same as Muskmelon. Follow carefully.

CASABA POINTERS—The Casaba is an exceptionally fine melon if grown, picked and cured properly and to insure success follow our pointers.

1. For early Casabas plant as soon as weather will permit, usually March. For a late crop plant from middle of June to middle of July.

2. Picking at the proper time is very important. If desired for immediate use do not pick until the rind will give under pressure, using the thumb to determine this. If rind is firm the melon is not ripe and full flavor has not yet developed.

3. Casabas can be picked green and held in storage until ripe. Green melons are used for shipments of any distance. Do not pick for shipment until the melon has lost its shiny appearance.

EASTERN. Long oval-shaped, skin very thin and delicate; flesh extremely tender, rich and sweet.

Germain **GOLDEN BEAUTY.** A variety of Winter Pineapple which it resembles in every way except color.

IMPROVED HYBRID. A variety that ripens late and is a good keeper. Thick flesh of excellent quality.

Germain **SANTA CLAUS.** The latest melon grown. Thin, hard skin with yellowish brown markings, flesh light green and good flavor. Can be picked in September or October and will keep for several months.

Germain **WINTER PINEAPPLE.** A large, late melon, of unique appearance, corrugated skin, green flesh of pronounced pineapple flavor. Melons do not ripen on the vines. Flavor is greatly improved by being stored in a cool place.

WATERMELONS

Note—Prices listed are postpaid.

Sandia

Wassermelone

Melon d'Eau

CULTURE—The same culture as applied to the Muskmelon is employed in growing Watermelons. Furrows of about 8 inches depth are prepared and 6 to 8 seeds are planted about 1½ inches deep every 10 feet in the furrow; furrows about 8 feet apart.

This plant assumes a more rapid growth than Muskmelons, consequently, more frequent cultivation and care must be given while the plants are young. As the plants grow in the furrow, fill in the soil about them so as to establish roots well into the deeper soil and when the plants are securely established pluck out all but two of the most hardy and healthy ones. The furrows in which the plants are growing want to be filled gradually as the plants grow until level with the surface, and then in early cultivating throw the soil towards the plant until a slight knoll or hill is formed.

In irrigating soak ground thoroughly and follow by cultivation as quickly as practicable, in order to keep a permanent mulch and maintain the moisture. Use one and onehalf pounds of seed to an acre.

ALABAMA SWEET. A very popular variety in the south, especially in Texas, where they grow it in preference to any other. In shape it is long, color dark green, flesh red and absolutely stringless.

ANGELENO. A top notch melon; big producer, excellent shipper, oval shaped and fine color; medium size to large; pick only when green shades to gold. A prime favorite with all.

BLACK SEEDED ANGELENO. A combination of the unexcelled qualities of the famous angeleño and the favorite black seeded Chilian. Undoubtedly a melon of par excellence and a prime favorite for the market.

EXCEL. This is a new variety of black seeded melon that has proven very popular in the south and also in the San Joaquin Valley. Large size, extra good shipper, and heavy yielder.

FLORIDA FAVORITE. An old popular, long-stripe melon of good quality.

GEORGIA RATTLESNAKE, OR GYPSY. Standard southern variety, which possesses remarkable shipping qualities; oblong, scarlet flesh, crisp and juicy.

GERMAIN'S IMPROVED BLACK SEEDED CHILIAN. This melon possesses a rich, fruity flavor. It has all the good qualities of the white seeded melon but is a trifle sweeter and has a very thin rind. Home gardeners like this variety because of its moderate size and delicious flavor.

10	20	50	1 50

GERMAIN'S IMPROVED WHITE SEEDED CHILIAN. Another unusual melon of exceptional merit. It is extra solid, extra crisp and extra sugary—a great favorite with growers because of its remarkable eating and shipping qualities. Each melon contains but few seeds and the crisp deep red flesh looks as though frozen to a crystal-like iciness.

KING and QUEEN. See page 2.

KLECKLEY'S SWEET. This new melon is one of the best for the home market or family use. The melons are large, eighteen to twenty inches long and ten to twelve inches in diameter, dark green; rind thin, flesh scarlet and very sweet.

KLONDIKE. One of the sweetest and most prolific melons. Seeds one-half as large as in other melons. Although not a good shipper, good for local consumption. See page 21.

TOM WATSON. An exceedingly popular melon in the South. Fruit large, running at times as high as sixty pounds. Rind thin but tough, consequently a good shipper. A dark green in color with flesh a brilliant scarlet. Very large with small seed area. An early variety of delicious flavor.

YELLOW-FLESHED ICE CREAM. The melon grows very large, of oblong shape, the flesh is a beautiful yellow, and has a peculiar, delicious flavor, different from any other variety.

ONIONS

Cebolla

Zwiebel

Ognon

Note—Prices listed are postpaid.

CULTURE—Many different methods of planting onions are in practice but the one most practical to the general market grower is the following method:

Planting in this section usually starts in December, January and February unless the season is exceptional and then possibly earlier. The primary requisite is good seed and in this we excel, our seed being produced by experts who have been growing for us for years and our trade has been greatly increasing due to the excellence of our seed.

Sow onion seed with a seed drill in rows 14 inches apart, using on this basis from 4 to 4½ pounds of seed per acre. The land must be thoroughly plowed, disked, and harrowed when necessary. It is impossible to prepare your land too carefully in growing the onion as it responds readily and in order to get maximum yields, thorough preparations must be made.

As soon as the plants appear, hand weeding must start both in and between the rows. From this point on the plants must have a steady even growth as a check whether from disease or drought will cause them to go to seed extensively. When the onions are ready for harvesting the tops will be well ripened down. If, however, the tops are still green we would suggest running a light roller or plank over the field to press them down. In ten days after this operation the onions should be pulled and left in the field one deep to dry. When thoroughly dried the tops can be removed. However we do not recommend this until ready to ship to market. If the onions are to be kept any period of time they should not be sacked but put on a floor or in a bin where there is a complete circulation of air. In some localities the transplanting system is followed. If this is done the seed should be planted in beds during August and September and transplanted to permanent field during February and March. The seed should be sown broadcast in the bed about ¼ of an inch deep. When transplanted they are put in rows 14 inches apart and 6 inches apart in the row.

The land chosen for onions should be damp or easily irrigated, preferably loose sandy loam or peat and should always be kept well drained. Heavy adobe or clay soil is good but here irrigation must be carefully practiced.

On this latter soil onions do not color up as well nor are they as even in shape as on lighter soil. Never pick weedy land for onions and avoid lands just free of grain crops. Garden lands are always preferable. Repeated planting for more than two successive seasons on the same ground is not advisable as onion diseases are bound to appear.

AUSTRALIAN BROWN ONION

The first requirement of the market gardener in selecting an onion is its shipping quality. The producer for home use finds this feature of equal value, for it insures him a prime supply of the vegetable in the cellar bin at all times. In stocking the Australian Brown, Germain's are entirely satisfied that under the most adverse conditions the grower will be more than pleased with this variety. The flesh is pure white, close layered, juicy and tender, growing to a good size. This hardy variety does especially well in the South, and when planted in rich, sandy soil and given an abundance of water, will produce more to the acre than any onion that has come under our observation. Germain's customers will not regret planting the Australian Brown, and we are pleased to note that we are stocked to take care of all orders. Pkt. 10 cents; ounce, 50c.; one-fourth pound, \$1.65; one pound, \$5.00.

	Pkt.	Oz.	¼ lb.	1 lb.
AUSTRALIAN BROWN. The flesh is pure white, close layered, juicy and tender, growing to a good size. This hardy variety does especially well in the South.	10	50	1 65	5 00
<i>Germain</i> BERMUDA YELLOW ONION. This variety is more extensively grown for the early market than any other. Being ready for shipping when the storage supply is exhausted they bring the very highest price. Our stock of seed is from the Island of Teneriffe, grown by the most reliable seed grower in that celebrated district. A large, flattish onion, very mild and of a pale straw color.	10	60	2 00	6 00
<i>Germain</i> CRYSTAL WHITE WAX. A large white onion of the Bermuda type, becoming more popular every year. It is very early, mild in flavor. Excellent shipper and keeper. The seed is very generally sown in beds, and transplanted to the fields when partly grown. Our stock of seed is from the same Teneriffe grower that has supplied us with our fine strain of White Bermuda seed for years.	sold out			
GERMAIN'S GREAT BUNCHING ONION. See following page				
LARGE RED WETHERSFIELD. One of the leading varieties for many years. In color the skin is a deep purplish red. The flesh is white, tinged with red, and of good quality, crisp and solid. It grows to a large size and is both a good keeper and shipper.	10	60	2 00	6 00
<i>Germain</i> MAMMOTH SILVER KING. A large white onion with a silvery skin, flattened on top but quite thick.	10	50	1 65	5 00
NEW QUEEN.	10	50	1 65	5 00
<i>Germain</i> PRIZE-TAKER. The largest of the yellow onions—globular in shape, of a pale straw color. Produces enormous crops; bulbs frequently weigh as high as three pounds	10	60	2 00	6 00
<i>Germain</i> SOUTHPORT WHITE GLOBE. A great yielder, fine grained and firm; flavor mild.	10	90	3 00	9 00
SWEET SPANISH ONIONS. In this new onion you find all the good features of a perfect onion with none of the disadvantages of the common onion; no bite, no objectionable strength. Mild, sweet flavor, good firm meat, fine, tender texture.	10	1 00	3 35	10 00
<i>Germain</i> WHITE PORTUGAL, OR SILVER SKIN. One of the leading white sorts, of beautiful shape and very mild flavor. The bulbs are flat and mature early. Splendid variety for market garden. Bulbs average two to three inches in diameter	10	60	2 00	6 00
<i>Germain</i> YELLOW FLAT DANVERS. This is one of the very earliest varieties, a good shipper and keeper. Flat in shape, of straw color and mild in flavor.	10	50	1 65	5 00
YELLOW GLOBE DANVERS. A well known early onion of fine quality. Flesh white and firm. Color a bright orange; grows to a good size, hardy, a sure cropper and a good keeper.	10	60	2 00	6 00

ONION SETS

Chirivia **Pastinake** **Panis**

CULTURE—Sow any month in the year in drills of rich soil one and one-half inches deep and fifteen inches apart, and cultivate the same as carrots; thin to four inches apart. One ounce of seed will sow about 100 feet of row. Pkt. Oz ¼ lb 1 lb

<i>Germain</i> HOLLOW-CROWNED. Best parsnip grown either for table or stock.....	10	30	100	3.00
---	----	----	-----	------

GERMAIN'S GREAT BUNCHING ONION

This variety fills a long felt need for both the amateur and the professional gardener. It produces the long, tender and sweet green onions which are justly so popular on the table of those who enjoy good eating. It can be easily grown in every garden. Pull while medium sized before the bulb has formed. Price, packet 10 cents, ounce 50 cents, ¼ pound \$1.65, pound \$5.00. Prices are postpaid.

ONION SETS

HOLLOW CROWNED PARSNIP—

PEAS

Chicharos o Guisantes Erbsen Pois

Note—Prices up to and including ten pound quantities include postage or expressage prepaid. When sent otherwise, deduct 10c per pound or fraction thereof. Prices listed for larger quantities, if desired sent by Parcel Post, necessary postage should be added. See our Parcel Post Schedule on inside front cover page. If quantities are desired, do not fail to write for special prices.

CULTURE—We classify Peas into three distinctive types. First early, second or medium early, and late. Of the early peas, we recommend Nott's Excelsior, American Wonder and Gems. These planted in August and September will come into bearing for the early high price market. For the home garden first early the little Marvel should be used. The main market gardeners crop is of the second early type and we recommend the Stratagem and Admiral or Senator for this planting. Of the late peas the Telephone is to be preferred.

Peas may be planted in almost any kind of soil. In light soil during the warmer months they should be planted about 3 inches deep so as to be near moisture. In heavier soils or in fall months plant about 1 inch deep, that warmth may penetrate and help germinate the seed.

Excessive moisture will rot the seed, so do not irrigate after seed is planted until the plants are well out of the ground; this is an important point. Cultivate after each irrigation. Usual planting is at rate of 60 pounds per acre.

INOCULATE THIS SEED WITH FARMOGERM

Germain's
GRADUS PEAS -

Germain's
STRATAGEM PEAS -

FIRST EARLY VARIETIES

AMERICAN WONDER. This is an early wrinkled pea of dwarf habit, the vines generally being about a foot high. Especially good for the private garden. It is quite distinct from other peas, being very stocky and erect. Very prolific.

DWARF TELEPHONE. This is a dwarf growing strain of the "Telephone" variety.

GRADUS. An early wrinkled Pea of the finest quality, bearing large pods well filled with the sweetest peas you ever ate. It is not only large and of good quality, but it is also one of the very earliest sorts, and brings the best prices. The demand for these peas from the hotel and choice trade is never supplied. Market gardeners should plant a liberal acreage of this variety. Does best in loamy soil.

LAXTONIAN. A fine wrinkled pea, being the largest podded of the dwarf varieties. The pods are similar to Gradus in shape, color and quality.

Germain's **NOTT'S EXCELSIOR.** A splendid dwarf wrinkled sort, one of the best, hardy, vigorous, and will mature almost as soon as the smooth varieties, often ready to pick in fifty days. The pods usually contain from seven to nine peas. Tender and of fine flavor. This variety is rapidly growing in favor for early planting, as its hardiness and quick growth make it a very profitable market pea.

PREMIUM GEM. A fine early wrinkled pea with vines about fifteen inches high, pods long and produced in abundance. A profitable market variety excellent for private use.

1½	10	20	40	3 50
1½	10	20	40	3 50

SECOND EARLY VARIETIES

SENATOR OR ADMIRAL. A new sort introduced on our local market about three years ago. It is a good second early pea, has thick green foliage, and bears abundantly, large well-filled pods. We consider it one of the best peas for our local markets.

DWARF SUGAR or EDIBLE POD. A low growing vine bearing large sweet pods that can be cooked and used the same as stringless beans. Vines bear heavily of peas that have delicious flavor.

STRATAGEM. This variety has come into prominence on the Los Angeles due to the fact it is exceedingly prolific and sweet, and has a tendency to keep well after picking. The majority of peas purchased at the corner grocery or fruit stand are this variety. For the market gardener they are exceedingly profitable, and as it is profitable for him to grow them it is also for the home gardener. It is the main crop variety which grows without any supports. A plot planted to this variety will be very profitable.

YORKSHIRE HERO. Its strong, vigorous growth makes this pea especially valuable to the market gardener and in the home garden that is not too well taken care of, it will naturally be found the most healthy and productive of all the vegetables. It grows bushy, yields prodigiously, pods are filled with delicious peas.

2	10	20	40	3 50

LATE VARIETIES

Germain's **ALDERMAN.** A wonderfully well flavored Pea and one that is bound to be sold largely in this market. In habit, the vines are tall and branching, bearing large deep green, straight and handsome pods, averaging 4½ to 5 inches in length. When it is well known, this pea to our notion is bound to supersede the "Telephone". Do not fail to include the Alderman pea in your order, and if you are a market gardener and desire to grow a Telephone pea, specify Alderman. It will make you money.

Germain's **TELEPHONE.** A fine wrinkled pea growing about four feet high. The peas are large, and of a pale green color. It is very prolific and the pods are very large, containing eight or ten peas.

5	10	20	40	3 50

PEPPERS

Note—Prices listed are postpaid.

Pimiento

Pfeffer

Piment

CULTURE—For early market peppers, seed should be planted in hot beds during November and December, and when the plants are of proper size and the danger of frost is passed they should be planted in the open field or garden or the plants may be planted direct to the open ground before the frost period is over if they are given proper protection.

To harden off plants before setting out remove covering of hot bed during warmer part of the day, being sure to replace same as it starts to turn cool in the evening.

For main crop, plant in the hot bed during February, March and April; in later planting cold frames may be utilized. As pepper seed demands ideal conditions for growing, do not attempt to plant the seed in the open unless it be in the summer when the air and ground are warm. A loose sandy loam soil is best. One half pound of seed will produce enough plants for an acre. **PLANTS, see page 16**

GERMAIN'S PERFECTION PIMIENTO PEPPER

California is famous for her production of all kinds of peppers among which the Pimiento stands pre-eminent among the home garden types. All home gardens could include Germain's Perfection Pimiento Pepper which is unquestionably the most wonderful home pepper ever offered, by any seedman. It is of brilliant red color, fine texture, but of thick flesh, with a semi-sweet tasty flavor. The absolute absence of any hot tendency insures just the right delicate touch in making up salads, finishing appetizing steaks, or as a stuffed side dish. To those who know the eating qualities of an unexcelled pepper, we need say no more, and to those who have never known it, we can only say that you have missed a rare treat, and by all means should see that it has a place in your garden.

Price: Packet 10c; Ounce 60c; ¼ lb. \$2.00; 1 lb. \$6.00.

ROYAL KING. A splendid new early variety, very similar to the Ruby King. Though not as long as this type, it is larger in diameter. The meat is sweet and thick. Very popular for the market due to its exceptional shipping qualities. Large amounts of the Royal seed are grown yearly in Mexico for shipment to this country.

ANAHEIM CHILI. (Chili Caliente). The country around Anaheim is the greatest pepper growing section in the world, the shipments running over 100 car loads a year. Our seed is selected from the finest and most productive fields in that vicinity and is certain to produce splendid crops. This pepper is from 6 to 8 inches long and tapers from 1½ to 2 inches in diameter at the top to a point. When dried it is a brilliant scarlet.

BELL, OR BULL NOSE. Early, sweet and of good flavor.

CAYENNE. Pods small, long and tapering; coral red when ripe very hot and strong, best kind for seasoning pickles; the Cayenne Pepper of commerce.

CHINESE GIANT PEPPER. A pepper of exceptional merit. It's very mild in flavor and is an ideal variety for the home garden. Exceedingly popular for stuffing. See page 22.

MEXICAN CHILI. The pepper that has made the tamales of Mexico famous is becoming very popular in the Southwest. Our seed is obtained directly from Mexico. It is a medium size, pear-shaped pepper, and turns bluish black when dried.

PERFECTION PIMIENTO. See above

RED CHERRY. Tall plants with a number of bright red peppers about two-thirds of an inch in diameter. Very ornamental.

RED CHILI. A very pungent variety. Grows about 2 inches long, measuring from one-third to one-half inch at the base and tapering down to a point.

RUBY KING. A large growing sweet pepper of the Neapolitan type; strong grower and prolific. See page 22.

TABASCO. A tall, bushy variety producing many slender and fiery hot peppers about 3 inches long and ¼ inch thick.

PUMPKINS

Note—Prices listed are postpaid.

Calabasa Kuebis Courge

CULTURE—Pumpkins grow and thrive in most any soil. A well-drained soil subject to irrigation is best. Pumpkins like other vine crops, should be irrigated carefully, not allowing the water too close to the main stock. As the roots are long, irrigation can be made at the ends of the vine. When the fields are covered by vine, irrigate midway between the rows. Too much water is very detrimental to the vines. Plant hills 8 to 10 feet apart each way, placing 4 seeds to a hill and after established pull out all but the one healthiest plant. Use one pound of seed per acre.

WINTER LUXURY PUMPKIN

BOSTON PIE OR SMALL SUGAR. A very popular small variety. The skin is a deep orange yellow and the flesh sweet and fine grained. As famous in Boston as the Boston Beans . . .

CHEESE. Size large; reddish orange; flesh thick, fine and sweet; keeps well.

Germain's **CONNECTICUT FIELD, OR JACK O' LANTERN.** A fine variety for dairy ranchers, adding much to the quality and quantity of the milk and butter; an excellent keeper and can be strongly recommended.

CUSHAW, OR CROOK-NECK. Solid, fine, sweet; keeps well.

JAPANESE PIE. The flesh is nearly solid; the seed cavity being very small, fine grained, dry and sweet having much the taste and appearance of sweet potatoes. They ripen early, keep well and are fine for home use

KENTUCKY FIELD PUMPKIN. A heavy fleshed and remarkably sweet pumpkin. A splendid keeper and a fine sort for family or market use. Its large size makes it desirable for stock also. Especially adapted to Southern California conditions.

Germain's **MAMMOTH KING or POTIRON.** The best large pumpkin in use. Forms immense globular melons, flattened a little at the end. Skin reddish yellow in color and flesh rich orange. This is unquestionably the very best mammoth pumpkin we have. It runs very uniform in shape and color and all are of immense size.

Germain's **SWEET OR EARLY SUGAR.** This is the small, sweet pumpkin that has made the New England States famous for their pumpkin pies. Fine-grained.

RHUBARB OR PIE PLANT

Ruibarbo

Rhabarber

Rhubarbe

CULTURE—Rhubarb seed requires considerable care and is discriminating as to where it grows. A rich light sandy loam is its delight and seed planted in this type of soil, about ¼ inches deep in rows which are 12 inches apart, in the early spring say February will be ready to transplant in from 4 to 6 months time. When they are as large as one's finger transplant the roots to mellow soil as described above, in rows 5 feet apart and about 3 feet apart in the row. The roots should be set in ridges with the crown even with the surface of the soil. The ground should be kept well cultivated and irrigated the first season and stalks may be pulled early the next spring.

RHUBARB ROOTS, see page 16.

Germain RECOMMENDS

WAGNER'S GIANT SEEDLING RHUBARB

It is grown from the seed of the famous Giant Rhubarb. Our seed was secured from Mr. J. B. Wagner, the originator and most prominent Rhubarb expert in the world, and is the best that can be gotten. Wagner's Seedling will yield as high as 20 tons per acre, is a strong rapid grower, and very much more productive than the Crim-son Winter. It comes on soon after planting, and unless the ground is frozen it keeps on growing constantly. The stems are twice as large as the Crimson Winter, are hardy in any climate, and will grow and yield handsome returns where the common Crimson variety will be a failure. It is unsurpassed either in flavor, texture, size, or hardiness. Germain strongly recommends this variety as the most profitable that can be grown, and is proving itself a tremendous money maker. Price, packet 10 cents, ounce \$1.60, ¼ pound \$5.00, pound \$16 00.

We especially call your attention to the roots of Rhubarb, a description and prices of which will be found on page 16.

RADISHES

Note—Prices listed are postpaid.

Rabano

Radies

Radis

CULTURE—Sow any month of the year; will succeed in any good garden soil not over-moist or too heavy. For early and late crop a warm, sheltered situation should be chosen; for those sown in summer, a rather shady spot must be selected. For a succession, sow every two weeks. The ground where the sowing is to be made should be dug deep and rased fine. The seed is generally sown thinly broadcast, in beds four to five feet wide, with one-foot alleys between. One ounce of seed will sow about 100 feet of drill, or a bed forty square ft.

FRENCH
BREAKFAST
RADISH

Germain's Epicure Radish

You know the old saying, "What's in a name". Truly there's something in a name when you consider **Germain's Epicure Radish**. Nothing more epicurean has ever been offered than this select strain of scarlet, white-tipped Radish, which is one reason for its popularity among market gardeners. It is the quickest growing Radish we know of, maturing in eighteen days. Firm, very mild in flavor and never pithy, it is truly a joy to the planter in every sense.

Prices: Packet, 10c; ounce, 20c; ¼-pound, 70c; pound, \$2.00.

SALSIFY OR VEGETABLE OYSTER

Note—Prices listed below are postpaid.

Salsifi Blanco

Haferwurzeln

Salsifs Blanc

CULTURE—Sow in early spring, one inch deep, in drills one foot apart and thin young plants to three or four inches in the row. The soil should be deep and loose, and never allowed to get dry. General care same as for parsnips and carrots.

SANDWICH ISLAND SALSIFY. An improved type and the largest and most delicious salsify in cultivation, with long, white tapering roots

	Pkt	Oz.	¼ lb.	1 lb.
white tapering roots	\$.105	\$.35	\$1.20	\$3.50

SQUASHES

☛ Note—Prices listed are postpaid.

Calabasa Kuerbiss Courg

CULTURE—Sow after danger of frost is past. Light, warm soil is best. Plant in hills prepared the same as for pumpkins and melons, the bush kinds about four feet apart, and the running varieties from six to nine feet apart, according to their nature, as some will run more than others. Plant about one-half dozen seeds in each hill and thin to three best plants. The earth about the plants should be kept loose and clear from weeds until runners are well started. Cutting off the leading shoots of the running varieties is recommended as having a tendency to promote growth and early maturity of the fruit. One ounce of seed will plant from thirty to fifty hills.

HUBBARD SQUASH

SUMMER VARIETIES

SPINACH -

TOMATOES

Note—Prices Listed are postpaid.

Tomato Liebesapfel Tomato

CULTURE—Sow in hot bed or frame, about September 1, for winter crop in frostless belts, or in early spring for summer crop. Growth must never be checked or a shortened fruit crop will result. When the plants are two or three inches high, thin them out and set in pots or in another bed, to give them room and make them "stocky." When five or six inches high, if the weather be warm and settled, transplant them to open ground, selecting a rainy day if possible; in the absence of rain, water and protect till well rooted. Set plants four feet apart each way. One ounce of seed will produce 3000 plants. The tomato requires a rather light soil to ripen early, but if handsome fruit and a plentiful crop be desired very rich soil should be selected and good cultivation given. **PLANTS**, see page 16.

GERMAIN'S FIRST EARLY TOMATO

The early tomato is the one that gets the big money, but earliness alone does not do it. Quality, including size, smoothness, firmness, flavor and coloring, are all considered; and tomatoes of this type find a ready market even when prices are highest.

Germain's First Early Tomato embodies all these requirements and has found a warm spot in the energetic and prosperous growers' heart. For home gardening it is equally as valuable, for it requires no more care than other varieties and comes into maturity earlier. Running strong to foliage, it affords the fruit more protection than any other variety. Hence it is as hardy a tomato as can be found.

Packet, 10 cents; ounce, 50 cents; ¼ pound, \$1.75; pound, \$5.00.

	Pkt	Oz.	¼ lb	1 lb
<i>Germain's</i> BEEFSTEAK. This variety has been exceedingly popular with our customers and our sales have been enormous. It is one of the best, if not the best tomato grown. It is very prolific and its growth is a marvel. For the home garden it cannot be surpassed. Of a bright red color, with very firm, substantial meat and luscious flavor. We take pleasure in again presenting this favorite to our customers.	10	70	2 35	7 00
<i>Germain's</i> EARLIANA. Fruits are large and of fine flavor.	10	40	1 35	4 00
GERMAIN'S GLOBE. A very nearly round tomato of good quality. Vigorous and productive vines, large, purplish pink in color; an excellent shipper. Early maturing. See page 24.	10	60	2 00	6 00
<i>Germain's</i> GERMAIN'S WINTER QUEEN. See page 24.	10	50	1 65	5 00
<i>Germain's</i> GRAPE OR RED CURRANT. A small red tomato about the size of a small grape. Useful for ornamental vine, for preserving, and for table decoration.	10	40	1 35	4 00
<i>Germain's</i> GERMAIN'S NEW STONE. See specialty page 24.	10	60	2 00	6 00
<i>Germain's</i> PONDEROSA. Grows to enormous size, sometimes weighing from two to three pounds each; very smooth and solid.	10	70	2 35	7 00
SAN JOSE CANNER. A fine tomato used for canning purposes in the North, and we recommend it also for the same purpose locally. It is also a good Market Garden tomato to be planted for the main crop. It should be planted at the same time as the Stone variety.	10	75	2 50	7 50
<i>Germain's</i> SPARK'S EARLIANA. Early and prolific; very solid and noted as a good shipper.	10	50	1 65	5 00
STRAWBERRY OR GROUND CHERRY. A distinct species; grows enclosed in a husk; excellent for preserves.	10	75	2 50	7 50
YELLOW PEACH. Beautiful clear yellow color, for eating and preserving.	10	75	2 50	7 50
YELLOW PLUM. Fruit plum-shaped, of clear, deep yellow color. Flesh yellow, used for preserving.	10	75	2 50	7 50
YELLOW PEAR. A small early variety good for preserves.	10	75	2 50	7 50

TURNIPS

Note—Prices listed are postpaid.

Nabo

Ruebe

Navet

CULTURE—Sow during cool weather, from October to April. For early crops, sow the Early White Flat Dutch or Early Purple Top Milan during early winter; and for summer crops sow any of the other varieties at intervals of two weeks, in drills twelve inches apart; cover the seed lightly unless the season be very dry; thin out the plants to six or eight inches apart. For Fall or Winter use, sow the Golden Ball or Purple Top Strap Leaf. Success depends upon the selection of soil and its subsequent preparation. Stir deeply.

SNOWBALL TURNIP

Germain **RECOMMENDS**
EXTRA EARLY PURPLETOP MILAN TURNIP

This choice variety is not only a beautiful and unusually delicious vegetable, but pleases the grower by maturing a week earlier than the earliest of other sorts. It is of medium size, flat and thick, with a smooth, bright purple top, snow white flesh, and little given to leaves. It accommodates itself to either spring or fall maturity, and is a delight to those who appreciate the food value and fine flavor of a good turnip. A heavy cropper, it deserves the greatest favor from the market gardener, and is surely a top notcher for the home garden. Pkt. 10 cents; ounce, 25 cents; one-fourth pound, 85 cents; one pound, \$2.00.

	Pkt	Oz.	¼ lb	1 lb
COW HORN. This variety is pure white; in shape like a carrot, growing nearly half out of the ground, and slightly crooked. It is delicate and well flavored. Used also as a green manuring crop.	10	\$ 20	\$ 40	\$ 1 25
EARLY PURPLE-TOP MILAN. See Specialty above.				
EARLY WHITE EGG. An egg-shaped variety for spring and fall sowing; flesh firm, fine-grained, mild and sweet.	10	20	40	1 25
<i>Germain</i> EARLY WHITE FLAT DUTCH. White flesh, medium size, quick growth.	10	20	40	1 25
<i>Germain</i> RED TOP WHITE GLOBE. One of the handsomest and most salable turnips. Equally good for home or market. It is a large, rapid growing sort, flesh pure white and the best flavor of any turnip grown. The skin is white with red top. We have taken great care with this stock, and offer it with confidence that our friends will be fully satisfied.	10	20	40	1 25
GOLDEN BALL. Round, smooth English turnip of fine quality; yellow; good keeper.	10	20	40	1 25
PURPLE-TOP STRAP-LEAF. Very productive, matures quickly; flesh white and sweet.	10	20	40	1 25
<i>Germain</i> EARLY SNOWBALL. Some people may think that a turnip is a turnip, not realizing the great difference between the average stringy, pulpy vegetable and the sweet, mellow, crisp possibilities that have been achieved in the perfection of the Snowball. It was first introduced into this section by us several years ago, and our supply of seed this season is so unusually fine that we are strongly recommending it. <i>Germain's</i> Snowball will respond to any reasonable desire for early maturity; grows even in size and is most completely described by its name—pure white and round as a ball.	10	20	40	1 25
WHITE GLOBE POMERANIAN. A large round turnip, very sweet flesh, similar to Red Top White Globe, but pure white in color.	10	20	40	1 25

RUTABAGAS

RUTABAGA OR SWEDISH TURNIP

What others do, you can do. Plant lots of Rutabagas for your stock and cut down your feed bill.

CULTURE—Same as for common turnip, but if anything, less exacting in care.

Germain **IMPROVED YELLOW PURPLE-TOP.** The old, popular standard sort both for stock feeding and table use; flesh yellow, solid and sweet. Pkt. 10 cents, ounce 20 cents, ¼ pound 45 cents, 1 pound \$1.25.

BIG JIM CORN

Germain's Big Jim Corn has fulfilled our highest expectations. It has proven to be the greatest corn ever introduced in the Southwest. It has met with unanimous approval as is evidenced by the hundreds of testimonials that we are receiving—testimonials from men who have grown corn for years in the corn belt states. They say they have never seen anything to equal it. It has outyielded every other variety grown, some of the yields running as high as 100 bushels per acre. The ears of Big Jim Corn, usually borne two on each stalk, average from 10 to 14 inches in length and 8 inches in circumference. The kernels are a rich yellow and very large. The cob is proportionately small. The stalks attain an enormous height, bearing an abundance of large leaves.

For Ensilage

Big Jim Corn produces such an enormous growth of stalks and leaves that we are convinced that it is unsurpassed as an ensilage corn. It is not uncommon for Big Jim to produce from 35 to 40 tons of green corn per acre when sown thickly enough. Furthermore, the feeding value of this silage is greatly increased by the heavy yield of grain. Big Jim Corn for silage will insure the grower the greatest possible returns per acre.

Seed Selection

Special attention has been given to the improving of our Big Jim Corn. Only the best seed stock of this variety is planted, seed that came from perfect ears and high producing fields. The fields are given the most careful attention, they are regularly inspected by our corn experts, and the work carried out under their direction. The corn is carefully suckered, and any smutty stocks are quickly eliminated. The perfect ears, selected for seed, are dried on the cob, after which they are butted and tipped and shelled. The shelled corn is then carefully hand picked and put up in sacks for delivery. Every sack of Germain's Big Jim Corn, whether purchased direct from us or through one of our dealers, will have a red certificate of quality attached. None is genuine without this tag. While this work is somewhat expensive, adding slightly to the cost of the seed, the increased yield resulting more than offsets the increased cost.

1 lb., postpaid \$.30 10 lbs., postpaid \$2.50

SILOS, SILAGE AND ENSILAGE CORN

EUREKA ENSILAGE

Eureka Ensilage corn is without a doubt the heaviest yielding ensilage corn adapted to California climatic conditions. It grows to an average height of 14 feet, has very leafy stocks bearing one to three ears to the stock, and has established a record of an average production of 30 to 35 tons per acre. This when cut and put in the silo furnishes a feed that is very succulent and of the highest feeding value and is relished by all kinds of stock.

Our seed stock of Eureka Ensilage corn for this season is of exceptionally fine quality and selected for size uniformity for both ear and kernel.

Price per pound 25 cents, 10 pounds \$2.00, postpaid. Write for quantity prices.

ORANGE COUNTY PROLIFIC

Orange County Prolific is a California product of the white dent variety. It is also an exceptionally heavy yielder and highly recommended for ensilage purposes. We consider it next on the list following Eureka ensilage corn. What we have said regarding the selection of our seed stock for Eureka corn also applies to this variety.

Price per pound 25 cents, 10 pounds \$2.00, postpaid. Write for quantity prices.

CORN—FIELD

CHAMPION WHITE PEARL. This stalk is short and thick. The ear grows low on the stalk, from seven to twelve inches in length, almost parallel throughout, of medium size, averaging sixteen rows of grain. 1 pound 25 cents, 10 pounds \$2.00.

HICKORY KING, White. This corn is entirely distinct from all other varieties, having the largest grain with the smallest cob ever introduced in a white corn; 1 pound 25 cents, 10 pounds \$2.00.

IMPROVED LEAMING CORN, Yellow. 1 pound 25 cents, 10 pounds \$2.00.

IOWA GOLD MINE, Yellow. 1 pound 25 cents, 10 pounds \$2.00.

IOWA SILVER MINE, White. 1 pound 25 cents, 10 pounds \$2.00.

KING OF THE EARLIES. This is one of the very earliest of the Yellow Dent varieties.

It is a good yielder but not to be compared with Big Jim Corn. 1 pound 25 cents; 10 pounds \$2.00.

KING PHILIP, Yellow. This is a hard yellow flint corn and is generally referred to as ninety-day corn. It is drought resisting and will give a fair yield where most corns are a failure. 1 pound 25 cents, 10 pounds \$2.00.

MEXICAN JUNE CORN, White. Very early and hardy, stalks grow to an average height of 7 or 8 feet and produces 30 to 60 bushels of corn per acre. This corn is also used for roasting purposes in many sections of California. 1 pound 25 cents, 10 pounds \$2.00.

WISCONSIN WHITE DENT; 1 pound 25 cents, 10 pounds \$2.00.

CORN—POP See Page 32

Write for our Bulletin [49] on Field Corn

BIG JIM CORN

SUDAN GRASS

THE WONDER CROP

GERMAIN'S FANCY DWARF MILO MAIZE

HAND SELECTED

Sudan Grass is the most drought resisting annual ever introduced. In 1915, when it first came into notice, we sold seed on the basis of \$2.50 per lb. Since then its popularity has increased regularly and it has now come to stay. It grows in a wide range of soils from sand to clay, and produces from four to six cuttings of highly nutritious hay per acre. As a pasture crop it is unexcelled and we might say unequaled, for it will succeed where others fail.

Sow 15 to 20 lbs. of seed per acre in the early spring after all danger of frost is past, and you will be assured of a bountiful supply of forage until late fall.

SUDAN GRASS

Germain's select strain of Fancy Dwarf Milo is an entirely different type, growing to a uniform height of 4½ to 5 feet, its stocks being a mass of leaves overlapping each other and under average conditions yielding from 2 to 2½ tons of threshed grain per acre.

This wonderful strain of Dwarf Milo originated in the South River Valley of Arizona. It has been grown in the Imperial Valley for the past season where it has out-yielded every other grain.

It is drought resisting, a vigorous producer, easy to harvest and it is the finest grain we know.

Plant six pounds per acre in rows 3 feet apart and plant six to twelve inches apart in a row. Planting should be done in the spring, after all danger of frost is past and when the ground is warm.

The price is: ½ lb. at 20c, postpaid; 1 lb. at 30c, postpaid; 10 lbs. at \$2.50, postpaid. | Prices: 25c per lb., postpaid; 10 lbs., \$2.00, postpaid; 100 lbs., \$8.00, f.o.b. Los Angeles.

CLOVER SEEDS

Inoculate this
Seed with
FARMOGERM

(QUANTITY PRICES AND SAMPLES ON REQUEST)

HUBAM CLOVER

We have obtained a very limited supply of this new Annual White Blossom Sweet Clover. We believe the discovery of this plant is to be a great factor in the improvement of our soils. It was discovered in 1916 by H. D. Hughes of the Iowa State College and since that time has made wonderful strides. We are as yet not prepared to say that it will supplant other forage and cover crops used in California. But we do feel that the discovery is important enough to warrant the mental work being done in this section. Hubam is a very heavy yielder, very drought resistant, and furnishes a good quality crop for hay or cover crop purposes.

Three pounds of seed will plant an acre of land and give maximum returns. In 1916 at the Iowa Experiment Station, Hubam made the remarkable growth of 4½ feet in 3½ months from seeding, while in 1920 the clover grew 9 feet in the same period. Its drought resistant qualities are remarkable. In one instance, without irrigation and with less than one inch of rainfall after seeding, it grew to a height of 7 feet. Hubam is a very heavy seed yielder also, producing as high as ten bushels per acre.

Price per pound, .60c; 10 lb. lots \$5.00, Postpaid.

INCREASE YOUR TONNAGE. Expense, time and labor is the same whether your crop be large or small. At a cost of only \$1.00 per acre you can get a fifty per cent. larger tonnage (in clover crops, by inoculating your seed, which we strongly advise. For particulars, see page 87.

ALSIKE (*Trifolium hybridum*). Very hardy, resisting cold and drought and is also well adapted for sowing on cold wet land. It yields a large amount of hay or pasture and makes a good bee plant; 50 cents per pound, 10 lbs. \$4.50, postpaid.

BURR CLOVER. Strongly resembling alfalfa. It is a great nitrogen-gatherer. Orchardists regard it with great favor as a green fertilizer, thriving in shady places where peas fail. Hulled, solid seed, free from burr. Fifteen pounds per acre. Per lb. 50 cents, 10 lbs. \$4.50.

MELILOTUS ALBA

Melilotus Alba Clover has for the past few years been recognized as one of the leading summer cover crops, especially in orange and lemon groves, but today hundreds of tons of Melilotus Alba Clover Seed are being sown in California as a general soil renovator. The large Beet Sugar Companies of the State are using it to reclaim their alkali soils so as to put the land in shape for further plantings of sugar beets. Melilotus Alba White Blossom Sweet Clover is a biennial and therefore lives only two years. It stands excessive moisture and also extreme drought. The flowers of the plant furnish excellent food for the bees and the plant itself furnishes excellent pasturage for all kinds of live stock. It will grow on any kind of soil, from light sandy soil to heavy clay soil, and when once established requires very little water, in fact in some of the foothill sections of California the plant grows wild, reseeding itself every two years and depending entirely on the annual rainfall for its growth. In California the seed is generally sown in the Fall of the year for the first rains, using on an average of 20 pounds of seed per acre. The seed can be sown with a nurse crop of grain or alone. The seeds should be covered very lightly in a well prepared seed bed for best results.

Prices: Per lb., .35c; 10-lb. lots, \$3.00, postpaid. Write for prices in larger quantities.

JAPANESE (*Lespedeza striata*). Makes a fine pasture plant for barren land, where it will grow eighteen inches high; on good soil it grows thirty inches. Stock of all kinds relish it. 70 cents per pound, 10 pounds \$6.50, postpaid.

MAMMOTH RED, OR COW GRASS (*Trifolium pratense* perenne). Very vigorous grower. 60 cents per pound, 10 pounds \$5.00 postpaid.

MELILOTUS INDICA (Sweet Clover). See page 53.

RED CLOVER (*Trifolium pratense*). Should be in all pasture mixtures; per lb. 60 cents, 10 lbs. \$5.00, postpaid.

WHITE CLOVER (*Trifolium repens*). See page 3. Pound \$0.90, 10 pounds \$8.00, postpaid.

SORGHUMS, SACCHARINES AND NON-SACCHARINES

WRITE US FOR QUANTITY PRICES AND SAMPLES OF FIELD SEEDS

EARLY AMBER. Furnishes a large yield of most nutritive forage, which can be fed either green or cured and will yield two or three cuttings a year, stooling out thicker each time it is cut. It grows ten to twelve feet high. Sow broadcast for forage at the rate of 60 pounds per acre. When sown in drills, sow at the rate of 10 pounds per acre in drills three and a half to four feet apart. Per pound 25 cents, 10 pounds \$2.00, postpaid.

HONEY SORGHUM is the prize variety without a doubt. We have seen it growing in Imperial Valley, San Diego County, San Joaquin Valley, and in the vicinity of Los Angeles. All growers every year are loud in its praise.

HONEY SORGHUM is a selection from one of the earliest introductions, and has been regarded with special favor for ensilage and for syrup purposes. It is the best variety for silage purposes, slender leafy stalks, varying in height from eight to twelve feet. It is medium, late maturing and has decidedly tender stalks, and is important from a forage standpoint.

Imagine an average of twenty-seven tons or over per acre.

The method of seeding will be determined largely by the purpose for which they are grown. When the crop is to be used for fodder or silage, it is usually planted in rows 3 to 3 feet apart, using up to 4 pounds of seed per acre.

Price per lb. 25c, 10-lb. lots \$2.00, postpaid. Write for special prices in larger quantities.

ORANGE SORGHUM. In habit of growth it is very similar to Early Amber Sorghum, but does not stool quite so closely nor does it grow quite so thickly. Per pound 25 cents, 10 lbs. \$2.00, postpaid.

SILVER TIP. Some manufacturers of Sorghum syrup prefer this variety to others for this purpose. On account of the fact that it is later in maturing than other varieties it is only possible to use the first cutting for syrup. However, succeeding cuttings can be used for pasturage or ensilage. Per lb. 25c, 10 lbs. \$2.00, postpaid.

DWARF MILO MAIZE. See page 50.

EGYPTIAN CORN. This is also one of the drought resisting non-saccharine crops. The grain is produced in large compact

heads and the seed is flat and pure white. The picture at the top of this page is that of 100 acres of Egyptian Corn from which our seed was selected this season. This seed is used very extensively as a chicken feed and also ground into flour which is used for edible purposes. Per pound 25 cents, 10 pounds \$2.00, postpaid.

FETERITA. This sorghum was recently secured from Sudan, where it is commonly grown under the name Feterita, an early maturing plant valued both for grain and forage. It resembles Milo in habit, except that the heads are uniformly erect, seeds bluish white in color. In drought resistance it compares favorably with any sorghum yet introduced. Sow 8 pounds to the acre. Pound 25 cents, 10 pounds \$2.00, postpaid.

SHALLU OR EGYPTIAN WHEAT. Is one of the most drought resisting grain crops known. Especially suited to dry land farming operations and localities where the normal rainfall is limited. Under irrigated conditions it grows to best advantage. The grain is claimed to possess all the feeding values of wheat, and is especially valuable as a feed for hogs, chickens and cattle. Pound 25 cents, 10 pounds \$2.00, postpaid.

KAFFIR, WHITE. Unsurpassed for dry alkali land, on which no better fodder and grain crop grows. A prolific member of the sorghum family, having more foliage and smaller stalks than the other varieties, and harvested very easily. Its great root system enables it to produce wonderfully in drouth sections and breaks up new ground for other crops. Cattle relish the stalks, while the grain is a very valuable food for poultry. Pound 25 cents, 10 pounds \$2.00, postpaid.

HAGARI. This is one of the most recent introductions. Some experiments have been made on this crop in Arizona and it is claimed that it is a little sweeter than Kaffir Corn or Feterita. The seed is round and white and does not shatter very readily. The heads grow very erect. It is drought resisting and stands some alkali. Per pound 25 cents, 10 pounds \$2.00, postpaid.

SUDAN GRASS. See page 50.

GERMAIN'S GOLDEN WEST BRAND HAIRY PERUVIAN ALFALFA

Sold only in sealed bags bearing this trade mark

This wonderful variety of alfalfa has taken the place of all other varieties in the States of California, Arizona, Nevada, Oregon and Washington. It is the plant that has created a big sensation among alfalfa growers. **Germain's Golden West Brand Hairy Peruvian Alfalfa** is the hardiest type ever introduced here successfully and has the longest producing season. It produces a greater abundance of leaves than any other variety, thus creating the highest feeding value. Results obtained by practical ranchers show an average increase of 2½ tons of hay per acre per season over common varieties. After each cutting it recovers very quickly, giving additional cuttings per season over other varieties. We successfully introduced this seed in this section—and we stand solidly back of it. All our seed is sold in sealed and labeled bags with the name Germain's Golden West Brand Hairy Peruvian Alfalfa—and in order to insure perfect results we advise you to buy only the proven Germain variety. Prices, per lb 40c; 10 lbs. \$3.50, postpaid. Write for quantity prices.

A Field of Our Hairy Peruvian Alfalfa

SMOOTH PERUVIAN ALFALFA

This variety of alfalfa is next to Hairy Peruvian in production and quality. Our stock of this seed is also especially selected, re-cleaned and of the highest quality. Per lb., 40c; 10 lb. lots, \$3.50 postpaid. Write for quantity prices.

GERMAIN'S PREMIUM BRAND CHILIAN (COMMON) ALFALFA

This is the old type of Alfalfa seed used extensively before the introduction of the Hairy Peruvian. It is a long lived type of alfalfa seed and produces a very fine grade of hay. Germain's "Premium Brand" Chilian Alfalfa seed is thoroughly re-cleaned over special types of machinery so that practically all weed seeds, dirt and foreign matter are eliminated. Seed packed under this brand also is harvested only from fields that have undergone a rigid inspection for trueness to type and freedom from weeds. To prevent any possibility of misrepresentation Germain's Premium Brand Chilian Alfalfa seed is packed in sealed bags branded with the trademark at the right.

Prices per pound, 40c; 10 pounds, \$3.50, postpaid. Write for quantity prices.

Use Farmogerm [52] for Alfalfa. (See Page 87)

COVER CROP OR SOIL RENOVATORS

WRITE FOR QUANTITY PRICES

Note.—Prices on half pound and up to and including ten pound quantities include postage or expressage prepaid. When sent otherwise, deduct 10 cents per pound or fraction thereof. Prices listed for larger quantities, if desired, sent by Parcel Post, necessary postage should be added. See our Parcel Post schedule on inside front cover page.

CANADIAN PEAS

This small round smooth yellow Pea is generally grown for cover crop purposes in this section. Per lb 25 cents, 10 lbs. \$2.00.

WHIPPOWILL COW PEAS

Cow Peas are becoming more popular as the years come around. We predicted sometime ago that California would become a great user of Cow Peas and the time is now coming for this prediction to come true. The planting of Cow Peas for a Summer or early Spring cover crop is going to become more popular every year, and this variety is the best adapted for that purpose. The vines are large and spreading and if planted correctly will cover the entire ground of the orchard, which is so much desired by the orchardists.

This variety is especially recommended for its quick growing habits and therefore, is an ideal variety as a cover crop to counteract the June drought. Per pound 25 cents, 10 lbs. \$2.00.

MAMMOTH YELLOW SOY BEANS

This is another variety of early Spring or Summer cover crop seed which is also quite popular. They do not cover the ground as well as the Whippowill Cow Peas. However, as a nitrogen gathering plant they are hard to surpass and we strongly recommend them if you desire to obtain nitrogen for your soil. For years the Soy Beans used in California have been imported from Japan and has been inferior seed. We are offering this year the Mammoth Yellow Soy Bean which is far superior to all other varieties and will run true. 25 cents per pound, 10 lbs. \$2.00.

BLACKEYE BEANS (See page 54)

BRABHAM COW PEAS

This is a very popular variety of a soil renovator in the South. It is bound to become a favorite here. It should be planted the same as any variety of Cow Pea. 25 cents per pound, 10 lbs. \$2.00.

SMALL WINDSOR (New Zealand Horse Bean)

Analogous to the Broad Windsor variety, only smaller in size, but will yield the same amount of foliage. Pound 25 cents, 10 lbs. \$2.00.

RYE (See page 55)

BARLEY (See page 55)

FENUGREEK

In the past this was one of the most popular varieties of cover crop seed, but it has lately, become more or less obsolete, due to the advantages of the other crops over it.

VETCH (Spring)

This is the variety used by the Orchardists in Southern California as a cover crop, and large quantities are handled by us. The name "Spring" as applied to this sort is misleading, for it should be planted in the Fall to obtain the best results. The best time to plant is from the first of August to the first of January. Per lb. 25 cents, 10 lbs. \$2.00.

MELILOTUS INDICA

The most popular Cover Crop in Southern California. We handle hundreds of tons of it, and due to our new facilities for re-cleaning and scarifying this seed we are enabled to offer a quality of seed that is far superior to that which is ordinarily sold through out the country. We have tested out hundreds of samples, this year of different lots that have been sold in this section. One cannot tell by the appearance of this seed as to whether or not it is of good germination. The seed may look extra fancy and still may be of poor germination. We have made a study of this seed and find that by putting it through a certain machine, that we can raise the germination twenty to twenty-five percent on the ordinary seed that is sold on the market. We have prided ourselves on the quality of this seed and this year none of our seed showed a lower germination than ninety percent, and a purity test of ninety-nine and one-half percent. Per pound 25 cents; 10 lbs. \$2.00.

HORSE BEANS

This is the Broad Windsor Bean which is being used as a cover crop and is becoming quite popular in this section. The seed is about an inch to an inch and a half long, and about half as wide. They are flat in appearance. Per pound 25 cents, 10 lbs. \$2.00.

PURPLE VETCH

Since the introduction of this super cover-crop nearly five years ago, the supply of seed has never been sufficient to warrant its introduction to the ranchers. We would advise that all interested in this wonderful cover-crop place their orders at once for future delivery. It makes the heaviest growth of any leguminous cover-crop known, and contains more pounds of nitrogen per ton of green manure than any other cover-crop. It makes the quickest growth of any cover crop and can be planted later than any other cover crop. **Purple Vetch will practically do as much good in one year as any other crop can in two years.** Price per lb. 25 cents, 10 lbs. \$2.00.

GRASSES

The following varieties of Grass Seeds are those used in this section of the country. However, there are, from time to time various new varieties, and also there is a desire by many of our customers to try out new sorts. If you do not find listed herein the variety you are especially interested in and you desire information concerning some unlisted varieties, write us, and we will be glad to give you what information we have on it, and if you desire the seed, we will obtain it for you. We have experts with us who understand Grass Seeds and we are, therefore in a position to advise with you.

BERMUDA GRASS (Cynodon Dactylon). Suitable only for climates where the winters are not below the freezing point. It stands the hottest and driest season. Sow six pounds per acre. Pound 75 cents, 10 lbs. \$6.00.

KENTUCKY BLUE GRASS (Poa Pratensis). One of the best grasses for permanent pasture, furnishing a constant supply of the most nutritious feed during the greater part of the year. Sow 28 pounds per acre. For prices, see page 3.

CRESTED DOGS TAIL (Cynosurus Cristatus). A perennial grass with short, narrow leaves; valuable for lawns or pastures on dry, light land. Pound 75 cents.

CREeping BENT GRASS (Agrostis Stolonifera). Well adapted for sandy pastures near the coast, and good for pasture on low lands. If sown alone, use 25 pounds per acre. Excellent for lawns. Use 12 to 15 pounds per 50-foot. Pound \$1.75.

ITALIAN RYE (Lolium Italicum). A quick-growing grass; attaining a height of 2 1/2 to 4 feet; very desirable for temporary meadows or pastures. Thrives best on soils that are slightly moist, and will even stand considerable overflow. Grows easily and bears an abundance of foliage that makes the best and sweetest hay imaginable. Sow 40 pounds per acre. Pound 35 cents, 10 lbs. \$3.00.

AUSTRALIAN RYE GRASS (Lolium Perenne). A strong growing, hardy perennial grass, noted for its nutritive qualities. Is equally valuable for both grazing and hay. Forty pounds per acre.

For Lawns this is used and recommended by many gardeners. If sown thickly it makes a fine lawn, and for large grounds and parks it is very successful. Pound 35 cents, 10 pounds \$3.00, postpaid.

PACIFIC RYE GRASS. Used for lawn mixtures, also valuable as a green forage plant for growing on lands not easily cultivated. Per pound 35 cents, 10 lbs. \$3.00.

RED TOP (Agrostis Vulgaris). A good perennial grass. Generally sown for permanent pastures. Does best on moist or even marshy land. If the ground is not overflown land mix with Meadow Fescue, Orchard Grass or Alsike Clover. Sow 14 pounds hulled. Pound 60 cents, 10 lbs. \$5.00.

CHEWING FESCUE A most valuable grass for golf courses. Commonly used with clover and Red Top for pasture. Pound 75c; 10 pounds 6.00. Postpaid.

FESCUE RED (Festuca Rubra). Forms a close rich sod, thrives well in dry, sandy and acid soils. Roots creep extensively. Valuable in lawns and should be included in putting green mixtures. Pound 60 cents.

MEADOW FESCUE. A valuable species for permanent grass lands; relished by live stock both in hay and pasture. Per pound 50 cents, 10 lbs. \$4.50.

ORCHARD GRASS or COCKSFOOT (Dactylis glomerata). Valuable alone or mixed with other grasses. Very often mixed with white clover, red clover, and rye grass. Per lb. 50 cents, 10 lbs. \$4.50.

VARIOUS LEAVED FESCUE (Festuca Heterophylla). Grows 2 to 3 feet high, valuable for permanent meadows, either for mowing or grazing. It is especially valuable as a lawn grass for shady places. Pound 75 cents.

RHODES GRASS. An Australian grass which grows readily on sandy or light soils. Grows thickly producing from 5 to 10 tons of fine quality hay. It is very palatable to stock, easy eradicated when desired and very highly recommended by farmers who have grown it. 1 lb. 85 cents, 10 lbs. \$7.50.

RHODE ISLAND BENT (Agrostis Canina). Resembles Red Top. Makes a close sod valuable for permanent pastures and meadows. Twenty-eight; pounds per acre. For lawns, use 12 to 15 pounds per 50-foot lot. Gives good results. Pound \$3.00.

SWEET VERNAL (Anthoxanthum Odoratium). Valuable to put in pasture mixtures and lawn grass on account of its earliness. Twenty-eight pounds per acre, but this grass is recommended only for use in mixture. Pound 85 cents.

TIMOTHY (Phleum Pratense). This is the most valuable of all grasses for hay. Thrives best on moist, loamy soil. Sow early in the spring or fall. Sow 15 to 20 pounds per acre. Pound 30 cents, 10 lbs. \$2.50.

WOOD MEADOW GRASS (Poa Nemoralis). As a lawn grass its creeping roots soon form a good turf. Of early growth and thriving well under trees where other grasses will not grow, most valuable lawn mixture, especially for shady places. Pound 85 cents.

AWNLESS BROME GRASS. (Bromus Inermis) withstands drought that kills other grasses. Unexcelled under such condition. Price, pound 60 cents, 10 lbs. \$5.50.

FIELD BEANS AND PEAS

WRITE FOR PRICES

We have itemized on this page, by cuts and descriptions, the most popular beans raised in districts west of the Rocky Mountains. Owing to the fact that most of these beans are planted in quantities, we have not stated any prices, as they are subject to fluctuation due to the influence of season and of conditions in the commercial market. You can always depend upon our field beans being of selected, true-type varieties; and we are in position to furnish any quantity when the season will permit us to lay in large stocks.

GARBANZA OR CHICK PEA. Grown very extensively in California, preferably in the drier sections. It stands almost as much cold weather as horse beans or cowpeas, and can be planted as late as June, which makes it practically an all year round crop. The majority of the crop is exported to Spain for edible purposes.

TEPARY BEAN. The most drought-resisting bean grown in California. Suitable for planting on dry soils and in dry seasons. Very sensitive to cool climate and excessive moisture. Matures in ninety days, and by careful management two crops can be raised on the same soil in one year.

SMALL WHITE BEAN (NAVY). This is grown extensively on truck soils. It is especially adapted to coastal valleys as the intense heat of the interior valleys is somewhat detrimental to its growth.

LADY WASHINGTON. Commonly known as Large White bean. It might be known as an all round bean, especially adapted to bottom lands, and where moisture is easily obtained. It is also freer from attacks of mildew than the other common varieties of beans.

PINK BEAN. Very common variety. Will grow almost anywhere, provided it has plenty of moisture. It is more particularly adapted to bottom lands. Will also withstand very hot weather, and ripens early in the season.

RED MEXICAN. Grows like the Mexican Pink bean, but is a much heavier yielder under extreme heat, and for that reason is gradually replacing the pink variety.

SPOTTED RED MEXICAN OR PINTO. (With the exception that the spots are red instead of brown, as in the Colorado and New Mexico Pinto bean). It is grown very extensively in California and Arizona.

CRANBERRY. Will grow under almost every condition that the pink bean will stand. Is raised more extensively on river bottom land. Hot, moist climate.

FRENCH WHITE. Resembles very closely the Lady Washington, but does not produce a trailing vine, and has a much larger bush. Also ripens earlier in the season than the ordinary small white bean. It is gaining favor each year.

LEWISMA. Commonly known as the Ventura Lima. Used for commercial purposes, and is grown on all land which is subject to heavy fogs, such as the Coast district.

BROAD WINDSOR (HORSE BEANS). A hardy winter crop, planted from October up to February and March, so that the harvest can not take place before the hot Summer months. Used extensively as a green manure cover crop in orchards. See cut.

SMALL WINDSOR (NEW ZEALAND HORSE BEAN). Analogous to the Broad Windsor variety, only smaller in size, but will yield the same amount of foliage.

RED KIDNEY. Becoming very popular in the lower moist sections. Can be planted very early as it is a bush variety. The pods all grow so that they do not touch the ground, and therefore suffer a minimum of discoloration due to contact with the ground moisture. At harvest the leaves fall off, leaving the bean-pod exposed to the sun therefore curing very rapidly. May be planted in 18 to 24 inch rows and cultivated by hand. Splendid for table purposes; also becoming very extensively known commercially.

BAYOU. Rather difficult to raise except on river bottom land, and cannot be successfully forced by irrigation. Rather difficult to get to set properly, as it is somewhat susceptible to red spider pest.

BLACKEYE (COWPEA.) A dry land bean adapted to early planting in hot, dry districts. Matures too late on irrigated soil to be of advantage; also with excessive moisture it puts forth long runners which are very detrimental to quick harvesting. Very susceptible to cold weather, as the pods fail to set properly, and the plants are dwarfed. Grows splendidly on semi-alkali soil.

HENDERSON'S BUSH LIMA. This variety is commonly known as the Baby Lima, being very small; but is a particularly fancy bean for table use. Is very much in demand by the large hotels. It is unlike the large Lima bean in growth, as it can be raised on the interior dry sections and does not require the fog for moisture, as the large Lewis Field Lima variety.

ROOT CROPS

ALL PRICES ON THIS PAGE ARE POSTPAID

WRITE FOR QUANTITY PRICES

STOCK BEETS

Stock Beets are one of the finest fat and milk-producing crops we have today and when fed in conjunction with grain they are worth nearly as much, pound for pound, as the grain itself. This statement may seem a little strong, but experience has shown that Stock Beets aid digestion and assimilation by keeping the animals in extra good condition. By feeding the same in conjunction with grains it increases the feeding value of the grains.

CULTURE

Stock Beet seed should be sown about one-inch deep, in well-cultivated soil in drills eighteen inches to three feet apart (depending upon the method of cultivation). When the plants are sufficiently large, thin out to stand ten to twelve inches apart in the rows. The seed is generally sown at the rate of eight to ten pounds per acre. Beet seed is very hard and does not germinate as easily as other seeds, therefore, the soil should be very moist at the time the seed is planted. If the soil should be dry it is advisable to soak the seed in lukewarm water for twenty-four hours before planting.

VARIETIES

Germain's Prize Mammoth Long Red

There is no other root crop grown which produces so large a tonnage per acre as the Germain's Prize Mammoth Long Red Beet. Our strain of Mammoth Long Red is exceptionally fine and expressly grown for our own trade from selected well-shaped roots.

This Beet has a distinct appearance; roots are massive, straight and uniform in size, broad shouldered, free from coarseness and of most excellent feeding and keeping qualities. Packets 10c, 1 lb. 60c, 10-lb. lots \$5.50, postpaid.

Giant Half Sugar Mangel

This variety is one of the favorites among the dairymen and hog raisers. It is very sweet and nutritious, as it has a larger sugar content than the ordinary mangel. It is a cross between a sugar beet and a regular mangel wurzel, therefore its name. It is also a splendid yielder and good keeper. Packet 10c, 1-lb. 60c., 10-lb. lots \$5.50, Postpaid.

Golden Tankard

This is also a very popular variety. The roots are large, ovoid, but filled out at top and bottom, terminating with a small tap root; flesh deep golden yellow, solid, crisp, sweet and rich. Does not keep quite as well as the two above mentioned varieties. Packet 10c, 1-lb. 60c, 10-lb. lots \$5.50, postpaid.

Sludstrup

While this Beet is one of the favorites in Europe, its popularity in America is not to be compared with the Mammoth Long Red. The roots are very solid, large at the top and gradually tapering to a point. The part of the root growing above the ground has a greenish tinge, while the part growing in the ground is white. Packet 10c, 1-lb. 60c, 10-lb. lots \$5.50, postpaid.

SUGAR BEETS

This is a variety that can be planted for stock food purposes. The tonnage per acre will not be as great as above mentioned varieties, but the sugar content will be much higher. Packet 10c, 1-lb. 60c, 10-lb. lots \$5.50, postpaid.

STOCK CARROTS

It is a well known fact that Carrots are mighty good farm food and analyses made by a National Chemist showed the Carrot content as follows:

Albuminous Compounds	7
Fat	2
Pectine	1
Cellular Fiber	3
Sugar	6
Ash	9
Water	87

For description and prices of the varieties we refer you to page 30. The varieties we recommend are White Belgian and Yellow Belgian.

ARTICHOKES (JERUSALEM)

See page 56.

GRAINS

WRITE FOR QUANTITY PRICES

To rid your grain crops of smut and rust, we recommend dipping your seed in a weak solution of "Blue Stone." The dilution is one pound of Bluestone to five gallons of water. Soak the seed for ten minutes. The same solution can be used over and over again.

BARLEY

Sow 65 to 100 lbs. to the acre

HULLESS OR BALD. This grain is sown about the same as wheat, in the fall of the year. The Hulless or Bald sort thrashes entirely clear of the hull, and is therefore a very valuable grain for the feeding of stock and poultry.

BEARDLESS. We have a perfect strain of this variety, produced from a single head of superlative type. The present crop is the sixth successive re-production from the original planting from the selected head, and is now producing perfectly without a single head of bearded type.

COMMON. This seed is selected from good, average-weight grain, free from foreign grain and weed seeds.

MARIOUT. This variety of barley is one that has just been introduced by the University of California after experiments conducted at their experiment station. It yields more prolifically than any other variety which has ever been tried on California soils. It is sown the same as other barleys.

BUCKWHEAT

JAPANESE. The most prolific variety with large grains, brown to dark brown in color. Sow after danger of frost is over either in drill or broadcast. The plant ripens early and stands well in the field. Price per pound 25 cents, 10 lbs. \$2.00.

OATS

RED RUST-PROOF, Texas grown. This seed is from selected Texas stock, thoroughly re-cleaned, giving you a higher percentage of plump oats than you can ordinarily buy from the mills. It is all graded according to the State standards of Texas, and we are so situated that we obtain the best seed which that great State is able to produce.

RED RUST-PROOF, California grown. These are the Texas oats after they have been grown in California two years, thoroughly acclimated, somewhat lighter in color than the Texas-grown but in every way satisfactory for re-planting in California.

RYE

COMMON OR WINTER. Our seed is obtained from Utah fields, as this produces better in California than that which has been grown here, and yields larger kernels. It is used extensively for cover crop purposes.

SPELTZ

SPELTZ OR EMMER. This is of the same family as wheat. For semi-arid regions this species is very hardy and drought-resisting. It is valuable for stock feeding, both as grain and forage, and produces well on soils of poor character and little moisture. It is sown here in the fall or winter, in the same manner as wheat and barley.

WHEAT

It is not good practice to grow many different varieties and we have therefore selected only those most successfully grown in this section.

DEFIANCE. A rust-proof variety, a heavy yielder, hard and splendid for milling purposes; large heads, plump kernels.

SONORA. A popular variety in California, especially in the southern counties; matures early and yields heavily; will stand more drought than most; soft; suitable for blending in the manufacture of flour.

TURKEY RED. A hard red wheat, very high in gluten, valued for milling purposes.

EARLY BAART. This is a bearded variety of spring wheat, large white grain, of exceptional milling quality; will average two or three weeks ahead of ordinary sorts of white wheat; and produces a larger crop. Was planted extensively last season, and is continually increasing in popularity.

MISCELLANEOUS FARM SEEDS

(QUANTITY PRICES AND SAMPLES ON REQUEST)

 **Note.**—Prices on half pound and up to and including ten pound quantities include postage or express prepaid. When sent otherwise deduct 10 cents per pound or fraction thereof. Prices listed for larger quantities, desired sent by Parcel Post, necessary postage should be added. See Parcel Post Schedule on inside front cover page.

ALFILARIA

ALFILARIA (*Erodium cicutarium*). One of the most nutritious of plants; cattle, sheep, horses and hogs alike prefer it to any other natural product of the plains. Sow twenty pounds to the acre. Pound \$1.00, 10 lbs. \$9.00.

ARTICHOKE

ARTICHOKE, JERUSALEM (roots). The greatest hog food known, yielding over one thousand bushels to the acre. It can be grown without a great deal of cultivation and no harvesting is necessary. When the roots are full-grown, turn the hogs into the field and they will help themselves by rooting. We can supply the tubers from November until May. Per pound 25 cents.

BROOM CORN

STERLING DWARF. Per pound 30 cents, 10 lbs. \$2.50.

STANDARD TALL. Per pound 30 cents, 10 lbs. \$2.50.

COTTON

CULTIVATION—Prepare the land by having it thoroughly ploughed. Lay off into rows about four feet apart; sow the seed along the center in a straight furrow made with a small plough or opener. It can also be sown in holes twelve to eighteen inches apart. Sow in March. The young shoot appears above ground in about ten days, and is subsequently weeded and thinned. Blooming takes place about the beginning of June. As a general rule cotton is a dry weather plant. For ploughing, the planter requires just sufficient moisture to give the soil a spongy texture. Give plenty of water in the early stages—but too much is productive of wood, at the expense of wool, and a severe drought will produce a stunted plant. From the blooming to the picking season, warm dry weather is essential.

DURANGO; 10 cents per ounce, 50 cents per pound.

EGYPTIAN. Originated in Egypt; erect and larger size than other cottons, producing an abundance of cotton; 10 cents per ounce, 50 cents per pound.

FLAX

FLAX. When grown for seed, plant forty pounds to the acre. One of the principal things to attend to when growing flax is to see that the ground is well cultivated. Price per pound 30 cents, 10 lbs. \$2.50.

LENTILS

LENTILS. Used for the table; growth and habits similar to the pea. Quite a favorite in California. Per pound 35 cents.

MILLET

LIBERTY OR GOLDEN (Formerly German). Few other grasses or forage plants have been able to produce the enormous yield of this plant; it has produced 4 to 5 tons of hay to the acre, and from 70 to 80 bushels of seed. It can be sown on newly broken ground in the spring, and as late as July leaves the ground in excellent condition for following crops. Pound 25 cents, 10 pounds \$2.00, postpaid.

PROSO MILLET (Hog Millet or Broom Corn Millet). Grown very extensively in Europe and Eastern Asia for food purposes. In America it is very commonly used for hog food. The culture is the same as for the Liberty Millet. Sow 70 lbs. to 80 lbs. to the acre. Pound 25 cents, 10 pounds \$2.00.

PEANUTS

Plant when weather is warm. A warm, porous, sandy soil, put into a good friable condition and freed from weeds, is most suitable. Remove the pods without injuring the kernel, and place contents in bags or baskets, a small quantity in each, where there is a free circulation of air, until needed for planting. Reject all shriveled kernels. It requires thirty-five pounds of peanuts in the hull to an acre. Plant in rows three feet apart and one foot apart in the row. Cultivate often and keep the ground loose, as after the blossoms drop, the peduncles enter the soil at the base and form the peanut.

VIRGINIA. The best variety for roasting; 30 cents per pound, 10 lbs. \$2.50.

SPANISH. In addition to their value for nuts, these are very largely used in the South as a forage and fattening crop for hogs and other stocks. They are early to mature, very productive, and in the far South, where they can be planted in April, two crops can be made in a year, the second crop being planted

early in July, the tops making a hay crop and the nuts a grain crop. In harvesting, the nuts hang to the vine and tops and nuts are fed together to hogs, cows and horses as a whole grain ration. Spanish Peanuts grow in more compact form than the Virginia Peanuts, making it possible to grow them closer, making the cultivation easier. 35 cents per pound, 10 lbs. \$3.00.

Bigger yields of Peanuts are obtained by Inoculation
Read page 87, it tells all about it.

RAPE

DWARF ESSEX. This crop is very highly recommended for pasturage for sheep and cattle, furnishing most rich and nutritious pasturage within six to eight weeks from the time of sowing. The fattening properties of Rape are said to be very much better than those of clover. It also makes splendid green feed for poultry. Rape is best sown in drills, at the rate of three to five pounds per acre, or it can be sown broadcast, when from six to eight pounds per acre should be used. Per pound 30 cents, 10 lbs. \$2.50.

SALT BUSH

AUSTRALIAN (*Atriplex semi-baccatum*). Will grow on alkaline soils. Much relished by stock, supplying the necessary salt. One pound of seed to the acre if sown broadcast; four ounces if transplanted. In cutting fodder be careful not to injure the crown of the plants. Ounce 15c, pound 55c, 10 lbs. \$7.50.

AUSTRALIAN "OLD MAN." A distinct species different from the *Atriplex semi-baccatum*. It succeeds on alkali land as well, and withstands drought. Plant in hills six feet apart each way, several seeds to a hill thinning out the two strongest plants. Packet, 10 cents, ounce 30 cents, pound \$3.00.

SUNFLOWER

MAMMOTH RUSSIAN. Makes heads double the size of the common kind. The yield is enormous from this variety. It has produced as high as 125 bushels to the acre. Per pound 25 cents, 10 lbs. \$2.00.

TOBACCO

Tabaco Tabak Tabac

Cultivation of Tobacco is comparatively easy and a warm climate suits it best. The best time for starting the seed is January. Sow in seed beds of rich soil, and as the seed is extremely minute, it is first largely mixed with sand and wood ashes to assist in spreading it thinly. One ounce of seed will sow twenty-five feet square and produce plants for one acre. After the beds have been sown, cover the seed slightly and protect from light frosts. Remove covering as soon as can be done with safety, and the plants will then grow rapidly and are ready for transplanting about the first of June. Wet or foggy weather is the best for transplanting. The plants must be carefully raised from the seed bed and planted in the fields in rows three feet apart and leaving five feet between the rows. The crop needs much careful attention in weeding, and a watchful eye to prevent the ravages of various insect enemies. As soon as the plants begin to throw up the flower-shoot, it is clipped off; otherwise it would weaken the plant.

CONNECTICUT SEED LEAF. Grows to a height of about five feet, with leaves two and a half to three feet in length and from fifteen to twenty inches broad, one of the best varieties for cigar wrappers. Per packet 10 cents, \$1.00 per ounce.

HAVANA. Bearing a fine colored leaf, varying from straw color to dark brown or black; it surpasses all other varieties in flavor for cigars; heavy cropper, fine texture, and the earliest variety to mature and ripen.

Big Havana (Vuelta de Abajo). Per packet 10 cents, ounce \$1.00.

SUMATRA. Per packet 10 cents, \$1.50 per ounce.

WHITE BURLEY. Per packet 10 cents, per ounce \$1.00.

GERMAIN'S SEED POTATOES

WRITE FOR PRICES

EARLY WHITE ROSE

We are equipped to give you information as to the variety to plant and when. Our experts will be pleased to answer any question in order to help you produce a better and bigger crop.

The hill or row system may be used in planting. If in hills, they may be three feet apart each way or thirty inches one way and thirty-six inches the other way. The rows are usually three to three and one-half feet apart. The distances between the hills in the row varies from 12 to 16 inches apart for early varieties and 17 to 20 inches for late ones according to the soil. On light soils early varieties may be planted four inches deep and late varieties five inches deep. Early varieties are planted any time after the middle of January, but there is danger of their being caught by frost if planted before February first. Usually it is best to plant the main crop of potatoes about the middle of February, as early planting usually gives better results than late planting. The cut seed should be as blocky in shape as possible. Long thin pieces are more likely to rot in the ground. A good method is to begin cutting of pieces at the stem and diagonally across the tuber until just enough is left at the blossom end to make two pieces, when this part should be cut in two so that all the eyes on the end will not be left on one piece.

When the rows are three feet apart and the space between hills is 15 inches, 800 to 1000 lbs. of seed potatoes are required per acre, if the seed pieces are cut 1 to 2 eyes. This is about the average rate per acre for this region.

NORTHERN GROWN POTATOES

PACIFIC WHITE ROSE

Formerly known as *British Queen* or *White Rose Purple Blossom*

A uniform potato of the rounder type, yielding more heavily than the white blossom White Rose, but requiring a much richer and stronger soil. The vines grow rank, covering almost the entire ground. The tubers do not form in clusters as in the case of the white blossom, but are scattered, sometimes reaching as far as the center of the row. They mature about two weeks later than the white blossom but the yield where the soil conditions are suitable is so much heavier that it easily makes up for being somewhat later. It is an excellent market potato, and those who have grown it for the past two years recommend it highly.

EARLY RED ROSE

A Truly Wonderful Variety

The well known and popular pink skinned potato, bearing many qualities common to the White Rose. A real early maturing potato, excellent for first planting. Tubers are medium size, smooth and white meated—an elegant cooker.

AMERICAN WONDER POTATO

Selected Stock

A medium sized, smooth and heavy producing white potato, wonderfully well adapted to rapid growth under California conditions. Matures in a very short period being extremely healthy and vigorous. The American Wonder potato produces large quantities of perfect tubers in each hill and responds very readily to conditions meant for forcing. This variety is widely planted and many carloads are shipped from California every year.

EARLY WHITE ROSE

Oregon Grown

This seed is grown especially for us in Oregon of pedigree stock. It is hill selected for yield and quality and has regular field inspection for vine diseases. We consider it by far the best potato to plant in California.

Send for leaflet that tells how to prevent scab on potatoes. It's free to those who ask for it.

CALIFORNIA GROWN POTATOES

WRITE FOR PRICES

GERMAIN'S CERTIFIED WHITE ROSE

White Blossom Type

These potatoes are grown under our supervision and inspected by us all through the growing season. They are subjected also to several examinations by the State Department of Agriculture. Every bag carries the State Inspector's tag certifying that the contents have passed his rigid test for freedom from disease and trueness to type and variety.

EARLY WHITE ROSE

We have secured a very fine strain of this well known and heavy producing potato which will be suitable for planting in almost any section.

Most of these have been grown by us at our Trial Grounds being true to type and of excellent quality.

SWEET POTATOES.

We will be able to supply potatoes of such varieties as Yellow Nansemond, Nancy Hall and Jersey Red during fall and winter up to February. Write for prices. Plants after March. **SWEET POTATO PLANTS.** See page 16.

FLOWER SEED DEPARTMENT

A FEW CULTURAL SUGGESTIONS

Few people are aware of the great number and variety of flowers that can be raised from seed. In this glorious Southland, the time taken to obtain fine flowering specimens is not nearly so long as in colder climates, while varieties grow to splendid perfection, if given a reasonable amount of care. We have followed the usual course of catalog makers in classifying into hardy, half-hardy and tender annuals, biennials and perennials, but this need not be taken too literally in California, for many things tender in the east, middle west and north, are perfectly hardy here and will grow outdoors the year around without protection of any kind.

HARDY ANNUALS may be sown in the open air at any time. The name "Annual" indicates that they live only one season.

HALF-HARDY ANNUALS should be sown in a frame or given some protection until the seed germinates if needed early. By the middle of April, it is quite safe to sow in the open.

TENDER ANNUALS is a term used to distinguish those plants usually grown in greenhouses or frames. Speaking generally, they need more skillful treatment than the hardier kinds, though it is getting quite common now to see such plants as Cyclamens, Cinerarias and others flourishing outside in Southern California.

HARDY BIENNIALS are those that flower in the second year from sowing the seed.

HARDY PERENNIALS are among the finest of our border plants. They do not usually flower till the second year after sowing, but may be relied upon to produce larger clumps of flowers year by year for many years.

HALF-HARDY PERENNIALS are those which require some protection during the coldest weather, as they will not stand frost.

TENDER PERENNIALS are those species that require greenhouse or other protection during the greater part of the year. See also tender annuals.

HARDY ANNUALS. The best time to sow is in the fall months, as they will make much stronger plants and flower much more abundantly when wintered over. They may be sown in any fine y-prepared shady border, and transplanted when large enough, to where they are to flower. Do not cover the seeds too

deeply. A good rule is to cover each seed its own depth with soil, at the same time taking care to water carefully. Never water so much that the soil gets "soggy," i. e., saturated; nor ever let the top get dry. Most varieties will germinate within ten days.

They may also be sown at any time during the spring months for summer blooming, care being taken to shade the young plants after transplanting, in hot weather.

HALF-HARDY ANNUALS may be sown in April out-of-doors, or in boxes, in March or earlier. If sown in boxes, the boxes should have an inch of rough soil or gravel at the bottom for drainage; the remainder of the box should be filled within an inch of the top with sifted, light, rich soil, firmly pressed, and watered.

TENDER ANNUALS should be sown in pots as follows: Take a five or six-inch flower pot, put an inch of drainage in the bottom, then two inches of finely-sifted soil, firmly pressed, with a sprinkling of sand on top. Then sow the seed, and do not cover, but press into the soil. Water with a very fine sprinkler, and cover the top of the pot with a sheet of glass. Remove the glass for an hour daily to dry up the damp.

HARDY BIENNIALS and **PERENNIALS** should be sown in September. Many varieties, if sown then, will flower the next year. If sown in spring they will not flower till a year later. They may be sown in a shady border, and, when large enough, transplanted to where they are to remain.

HALF-HARDY and **TENDER PERENNIALS** should be sown in boxes, and treated as recommended for Half-hardy Annuals till plants appear, when they should be transplanted to two inch pots, and shifted afterwards when necessary.

We have arranged our list of flower seeds according to the various classes: Annuals, including separate lists of Everlasting Flowers and Ornamental Gourds; Climbers, Annual and Perennial; Biennials and Perennials; Ornamental Grasses, Annual and Perennial.

ABBREVIATIONS. Hh means Half-hardy, Annual or Perennial; T means Tender, Annual or Perennial. When no abbreviation is used, the variety will prove hardy in this climate. The letter B affixed to a variety means that it is useful for bouquets and cut flowers.

Novelties and Specialties for 1926

GERMAIN'S NEW GIANT NON-LATERAL BRANCHING ASTERS

The New Giant Asters are so distinct and so beautiful in their character that we unhesitatingly recommend them to our customers with confidence that they will not only please them, but all who may have the pleasure of seeing them.

New Giant Aster—Peach Blossom—The photograph shown on this page conveys but a very inaccurate idea of the size and beauty of this particular type. The blossoms attain a diameter of 5 inches, individual stems fully 2 feet long. The blossoms in the opening buds are almost white; as the flowers mature they turn to a beautiful flushed peach blossom pink. Per packet 50c.

New Giant Aster—Light Blue—A splendid companion to the foregoing variety, the shade of blue to be noted in the flower of this superb sort is one of the richest conceivable. Price per packet 50c.

New Giant Rose—An exquisite shade of rich dark rose; the flowers are composed of long, narrow, twisted and curling petals. Per packet 50c.

New Giant Purple—Deep rich purple, a telling shade well displayed in the enormous sized blossoms. Splendid in stem, form and substance. Per packet 50c.

New Giant Asters Mixed—A well balanced mixture, including the above four varieties. Per packet 50c.

THE CALIFORNIA POPPY

Distinctly a native California flower, it has spread throughout the world on the strength of its beauty. In England and other European countries this wild-flower has been grown to such an extent that it has become one of the favorites.

Orange Flame—Admirably suited for borders. Very erect and compact, not over nine inches high. The flowers, slightly smaller than the ordinary *Eschscholtzia*, are of the brightest orange scarlet.

Ballet Girl—Beautifully frilled. The petals are an intense cochineal carmine outside and creamy white inside. These widely contrasting colors are startling in the same flower yet form a most pleasing combination.

Tango—Bronzy red overlaid terra cotta, the tango color recently so fashionable.

Mauve Beauty—A pure Mauve. A new color.

Purple Glow—Bright reddish purple, darkest shade obtained so far.

Lovely—Bright satiny rose pink suffused with salmon. A lovely flower indeed.

Scarlet Beauty—A deep scarlet with the bearing and appearance of a scarlet tulip.

Mixed—A superb mixture, rich in shades of crimson, pink, orange and scarlet. Pkt. 25c; ½ ounce, 50c.

All the above varieties per packet 25 cents. The full collection of seven varieties \$1.25.

For other varieties see page 81.

NEW GIANT SNAPDRAGONS (*Antirrhinum Maximum*)

This wonderful new group of Giant Snapdragons far surpasses anything yet introduced. The flowers, closely placed on tall spikes, are of magnificent size—Invaluable for garden decoration, they are also incomparable cut flowers of exceptional quality.

Apple Blossom —Rosy Pink.....	\$0.25
Cattleya —Lilac.....	.25
Old Gold —Rich Golden Yellow.....	.25
The Rose —Rich Rose Pink.....	.25
Copper King —Velvety Copper Scarlet.....	.25
Collection of five separate varieties.....	1.00
Choice Mixture —All Colors.....	.25

GERMAIN'S KING ASTERS

The King or needled type Aster is a favorite with cut flower growers. Its erect growth, long keeping qualities and heat resisting ability place it in the lead as an early-aster for this climate.

In addition to sterling cut flower qualities, the King Aster presents a very distinct and attractive appearance. The long petals are narrow and fold so much as to make them appear quilled.

Peach Blossom Aster

The large well-filled flowers are borne on strong stems of good length.

King Crimson.....	\$0.15	King Shell Pink.....	\$0.15
King Lavender.....	.15	King Violet.....	.15
King Rose.....	.15	King White.....	.15
Collection of 6 colors.....	.75	King Mixed.....	.15

NEW HOLLYHOCK "ALLEGHENY ROSE"

The plant is a vigorous, tall grower and an abundant bloomer. The flowers are large and showy. Made up of broad frilled or ruffled petals. More artistic than the ordinary double kind, but larger, fuller and much more effective than the single. Per packet 25c.

DIDISCUS COERULEUS (Blue Lace Flower)

This charming introduction from Australia has immediately gained favor with the florists. A basket of these delicately formed blossoms possesses a grace not equalled by any other. The flowers are a light azure blue in color and their dainty globe-shaped construction reminds one of the art of lace-makers. The plant grows to a height of two feet. Pkt. 25c.

VERBENA LUCIFER

A new mammoth Verbena, in color an intense brilliant scarlet with no eye. It is a great improvement on the popular Scarlet Defiance and as a bed or border plant this brilliant subject will prove most satisfactory. Pkt. 25c.

VERBENA HYBRIDA GIGANTEA

Immense trusses, the individual florets measuring an inch in diameter. Mixed colors. Pkt. 25c.

LARKSPUR "EXQUISITE"

Charming new double Larkspur of a beautiful soft pink, the shade that is highly desired by all lovers of flowers. Price, per packet, 25c.

Novelties and Specialties for 1926

GERMAIN'S DAHLIA FLOWERED ZINNIAS

Zinnias are among the most uniformly successful flowers that can be grown in the Southland. The new double dahlia flowered type originated at the very gates of our city and is now known the world over.

In size the flowers compare favorably with a well grown dahlia and the colors are particularly rich in the glowing yet subdued shades for which the Zinnia has long been famous.

Exquisite. Truly dahlia-flowered. Exquisite in form and coloring. A light Tyrian Rose with deep rose center, 35c

Golden State. Glowing orange-yellow, 35c.

Crimson Monarch. A variety of extraordinary merit. In size and color it is unsurpassed, 35c.

Dream. Beautiful deep lavender. A new and desirable shade in Zinnias, 35c.

Illumination. Similar to Exquisite but a deep rose throughout, 35c.

Old Rose. A very attractive shade, 35c.

Polar Bear. Very large pure white, of true dahlia form, 35c.

Canary Bird. A delicate shade of primrose, 35c.

Scarlet Flame. A large, beautiful, bright scarlet, 35c.

Collection of nine separate colors, \$2.75.

Special Mixture. From named varieties only. 3 pkts. for \$1.00, 35c each.

GERMAIN'S NEW GIANT IMPERIAL STOCKS

This new type of stock is much superior in every respect to all former strains. The plants are more vigorous, the flowers larger and very double. They are tall branching, with an abundance of long stemmed laterals starting near the base of each plant. This new habit of growth makes it possible to gather an entire bouquet of flowers with fine stems from a single plant.

	Pkt.
Blush Pink. Light silvery pink.....	\$.025
Fiery Blood Red. Bright and showy red.....	.25
Chamois. Ivory tinted old rose.....	.25
Dark Blue. Rich deep blue or purple.....	.25
Lavender. A fine shade in stocks, a light lavender blue.....	.25
Rose. Beautiful deep salmon rose.....	.25
The Collection of six beautiful colors.....	1.25
New Giant Imperial Stocks in mixtures.....	.25

GEUM LADY STRATHEDEN

In Lady Stratheden we have a welcome addition to the well known border plants, the Geums. This new Geum is similar in form to the popular Mrs. Bradshaw, but the color is a fine, clear, golden yellow. A constant bloomer and a valuable plant for any perennial bed or border..... 25c

GERMAIN'S AFRICAN MARIGOLDS

(Fistulosa Type)

These vigorous sun-loving flowers thrive in our California summers. The two varieties listed here are the favorite shades and are unsurpassed in quality.

Orange Prince. Extra large quilled, the finest golden orange Pkt. 15c
Lemon Queen. Equal to the above, but a luminous lemon yellow..... 15c

MARIGOLD ORANGE PRINCE

GERMAIN'S DOUBLE BLUE CORNFLOWER

Good blue flowers are not plentiful and it would be hard to find a more attractive shade than this improved Cornflower. Our strain is specially selected for color as well as size and fullness of the flowers. Useful for cutting and garden use.

Blue, Germain's Extra Double, 10c.

GERMAIN'S NEW GIANT PLUMED CELOSIAS

A lovely new class of feathered coxcombs of the Pyramidalis type. The plants attain a height of 3 feet and over and during the months of August, September and October are crowned with immense, gracefully feathered plumes. Colors range from yellow to the various shades of rose, carmine, crimson, bronze, etc. From seed sown in March beautiful specimens may be had in full flower by the time above noted. Per packet, 35c; 3 packets. for \$1.00.

GERMAIN'S FIVE FAMOUS ZINNIAS

Germain's Mammoth Strain. Mixed from separate giant varieties, 25c.

Dahlia Flowered Mixture. (For separate varieties see this page), 25c.

Giant Picotee. Petals all edged and tipped with contrasting colors. Distinct and effective, 25c.

Giant Victory. Quilled. The best quilled strain. Rich in shades of old rose, russet, burnt orange and other autumn tints, 25c.

Mexicana Hybrida (Haageana). The ideal border Zinnia. Dwarf compact and covered with small very double flowers of unusual shades, 15c.

One packet each of the Five Famous Zinnias, \$1.00.

TWO SPLENDID CALENDULAS

Calendulas are especially valuable for winter cut flowers but they are also splendid garden flowers at all times. The two varieties offered here are exceptionally good.

"The Ball." A glowing orange throughout and very double, Pkt. 25c
Orange King. Bright orange red with dark center. Not a new variety but a favorite with many..... 10c

ANNUALS

Our Selection Twelve fine varieties of Annual Flower Seeds, \$1.00.

Our Selection Six Fine Varieties of Annual Flower Seeds, 50c.

The quickest and cheapest way of making a good display of color in the garden is by sowing annuals. But to sow them thickly as is frequently done and then leave the little plants alone to fight for a position—eventually running straight up, flowering once and then dying—is not the right way to treat them. Each plant must have room to develop its branches as they are produced, and in order to obtain this, they must be thinned severely and often, so that each stands at from 6 inches to 1 foot apart, according to the kind sown. Some, as noted under the separate headings, are better sown in boxes or pots and transplanted. Others do well sown where they are to flower. But in all cases, prepare the ground well by deeply spading and incorporating, as the work proceeds, good, well prepared manure. If natural manures cannot be obtained, we have the best commercial fertilizers always in stock, and these are equally effective. But give the plants room to develop, allow plenty of moisture, and the display that these pretty plants make will delight and surprise the grower.

All 10 cent packets at \$1.00 dozen; 15 cent packets \$1.50 dozen; 25 cent packets \$2.50 dozen.

COLLECTIONS

ONE PACKET OF EACH OF THE HARDY ANNUALS LISTED BELOW FOR \$1.50. REGULAR VALUE \$2.10

- ALYSSUM SWEET. White, height ¼ ft.
- ARCTOTIS GRANDIS. White with blue disc, height 2 ft.
- BALSAM (Lady's Slipper). Height 2 ft.
- CALENDULA (Prince of Orange). Brilliant Orange, height ¾ ft.
- CANDYTUFT. Pink, height 1 ft.
- CANDYTUFT. Empress white, height 1 ft.
- CENTAUREA IMPERIALIS. Finest mixed, height 2 ft.
- CHRYSANTHEMUM. Choice mixture, height 2 ft.
- CALIFORNIA POPPY. Golden yellow, height 1 ft.
- CORN FLOWER (Ragged Sailor). Blue, height 2 ft.
- GOSETIA. Extra fine mixed, height 1½ ft.

- GYPSOPHILA ELEGANS. Very graceful for bouquets, height 1½ ft.
- LAVATERA TRIMESTRIS. Rose color, height 2½ ft.
- LINUM (Scarlet Flax). Beautiful Crimson Scarlet, height 1 ft.
- MARIGOLD FRENCH. Mixed beautiful bronzed and yellow shades, height 1 ft.
- MIGNONETTE. All sorts mixed, height 1 ft.
- NASTURTIUM TOM THUMB. Finest mixed, height 1 ft.
- PHLOX. Finest mixed, height 2 ft.
- POPPY. Mixed all sorts, height 2 ft.
- SCABIOSA (Morning Bride). Finest mixed, height 2 ft.
- ZINNIA (Youth and Old Age). Mammoth mixed.

ABRONIA

- ABRONIA UMBELLATA (Sand Verbena). Delicate rose. Pkt. Beautiful native trailer. Height ¼ ft. \$0.10

ADONIS

- ADONIS FLOS (Pheasant's Eye). Crimson, with black eye. A beautiful showy, free-flowering plant. Hgt. 1 ft.. .10

AGERATUM

- AGERATUM MEXICANUM. Fine for bedding or mixed borders.
- Imperial Dwarf Blue. Height ¾ ft.10
- Imperial Dwarf White. Height ¾ ft.10
- Imperial Dwarf Mixed. ¾ oz. 30c10

ALYSSUM COMPACTUM
ALYSSUM

Fragrant and pretty. Nothing better for borders or parkways. Sow thinly at any time of the year and thin the plants to 3 inches apart.

- Compactum. Dwarf, White. Height ½ ft. ½ oz. 40c. \$0.10
- Lilacinum. Pure lilac, fine for borders. ¼ oz. 30c.25
- Sweet. White. Height ¾ ft. 1 oz. 40c.10

AMARANTHUS

Hh. The Amaranthus are splendid plants to give a tropical effect in mixed borders and shrubbery. Plant in sunny places and poor soil.

- Caudatus (Love-lies-Bleeding). Flowers in long drooping panicles, bright crimson. Height 2 ft.10
- Melancholicus (Ruber). Blood-red leaves. Height 1 ft.10
- Salicifolius (Fountain Plant). Leaves variegated. Purple crimson and gold. Height 3 ft.10
- Tricolor (Joseph's Coat). Foliage red, green and yellow. Height 1 ft.10

ANAGALLIS

- ANAGALLIS (Pimpernel). Mixed various colors. Free-blooming, attractive plant for borders. Height ½ ft.. .10

ARCTOTIS

This plant is not sufficiently grown. The beautiful flowers have a steely blue sheen, reflected from the back of the petals that gives them a delightful and unique appearance which no other composite possesses. It is one of the finest annuals for cutting. Try it this season. Sow early in order to get large plants and sheaves of flowers.

ARCTOTIS GRANDIS

- ARCTOTIS GRANDIS. Plants are of easy culture, flower abundantly from early summer till fall. Height 2 to 2½ ft. \$0.10

ARGEMONE

- ARGEMONE (Mexican Poppy). Mixed, white and yellow. Very showy. Height 2 ft.10

ARNEBIA

- ARNEBIA CORNUTA (Arabian Primrose). B. Yellow, spotted with black or maroon. Height 1¼ ft.15

Due to market conditions, all prices [61] are subject to change without notice

ASTERS

GERMAIN'S GIANT COMET BRANCHING ASTERS

Even with the most expensive reproduction process it is difficult to convey the real beauty of the splendid development of the good old Aster. The iridescent coloring of these great chrysanthemum-like flowers nearly as large as a saucer, with beautiful curved petals, makes a brilliant display in the garden, and the fact that they will keep well as cut flowers for a week or ten days is especially appealing to the busy housewife. The Giant Comet is the finest among the loosely formed or ostrich feather type. The plants grow to a height of about 2 feet, are of full foliage and droop just enough for a graceful appearance. Planted from February to May, the Aster will furnish a continuous reward of gorgeous bloom from July to October. It grows easily, likes sunshine and a moderate amount of water.

ANNUALS

BALSAM

IMPATIENS BALSAMINA (Ladies' Slipper)

Good for flower beds, for mixed borders or for pots in the window garden or green-house. There is nothing that quite takes the place of the Balsam, as it is distinct from everything else in cultivation. Sow in February or March for use inside and in April in the open ground. Our strains are the finest selections from European and home grown varieties and cannot be excelled.

Nankeen. Cream flushed apricot.10
Mixed. Oz. 25c.10

CALIFORNIA POPPY

(Eschscholtzia) See pages 64, 88.

CALLIOPSIS

If the varieties of Calliopsis were rare and high priced, people would rave about their beauty, but as they are so cheap and easily grown, they are often passed by unnoticed. The lovely combinations of yellow and brown are not excelled in any other plant and they have an elegance and grace all their own. Sow at any time of the year and in any position or soil.

CENTAUREA

Everyone knows and likes the old fashioned "Sweet Sultans". Known also as Bachelor's Buttons, Blue Bottle, Ragged Sailor, Bluet and Ragged Robin. In a variety of colors, they are great favorites of the florists, and they are also fine for the home garden, treated like any hardy annual. While they do fairly well in poor soil, no plant responds better to liberal treatment. The common Cornflower, Centaurea Cyanus, is decidedly the finest of all blue flowered annuals and a favorite wherever grown. Too good to miss and of the easiest possible culture. Sow anywhere at any time.

CATCHFLY

See *Silene Armeria*.

CELOSIA

This is the botanical name of the well-known cox-comb or Prince's Feather. The former, *C. cristata*, is a stiff, formal plant, bearing immense "combs" of brilliant colors. The latter, *C. pyramidalis*, is more graceful and equally bright. Raise the seeds in a gentle heat if possible in early spring and extra large plants will result. Any kind of soil suits them and plenty of sun.

Chinese Wool-Flower (<i>Celosia Childsii</i>). A remarkable floral novelty. The immense blooms resemble large globes of crimson wool.	.25

CHRYSANTHEMUM

(ANNUAL) Painted Daisy

The annual Chrysanthemums must not be confounded with the autumn flowering Chrysanthemum or Pyrethrum Sinense of botanists. They are showy, effective plants of the easiest possible culture, requiring only to be sown in the position where they are to flower and thinned to 9 inches apart. They make a fine display all the summer.

<i>Segetum</i> , Eastern Star. Yellow with brown disc.	.10
<i>Segetum</i> , Evening Star. Yellow, light center.	.10

CINERARIA

Although in this favored southland, the *Cineraria* thrives outdoors in semi-shaded positions, it is as a greenhouse or window plant it is best known. Continental hybridists have been for years working on this flower and we annually add the best from these raisers to our own well known strain. Our seed plants are raised under the strictest surveillance of experts who are quick to note anything not up to the high standard set. The *Cineraria* dislikes heat at any time and must be always in a cool, moist atmosphere with plenty of air. Green fly or aphid is its worst insect enemy and must be destroyed on sight by light fumigation or dipping in one of the nicotine preparations sold by us. Sow at various times from May to August for winter and spring flowering.

	Pkt.
CINERARIA HYBRIDS, mixed.	.25

CLARKIA

A fine annual of easy culture, growing 2 ft. high with leafy racemes of double flowers in a wonderful range of color. Lasts well when cut and all buds open in water. Succeeds in sun or shade.

CORNFLOWER (See *Centaurea*)

COSMOS

Cosmos is one of the most popular flowers for table decoration. The Mammoth varieties keep up a succession of bloom for a long period, and as they are fall flowers it is almost impossible to have flowers of the late variety in early spring. The early varieties can be had in bloom in early spring by fall sowing.

ANNUALS

MIGNONETTE

MIGNONETTE

CULTURE—This well known plant, is in fact a small annual shrub and grows wild on the sandy shore of Algiers. The name Mignonette is French and stands for "Little Darling." No garden should be without this sweet little plant. Sow in any good garden soil, deeply spaded, covering the seed its own depth and keeping moist.

- | | |
|--|----------|
| Machet, Extra Select. An improved form of this large flowered, sturdy variety. Deservedly the most popular for the size and substance of its flower stalks and the intense fragrance of its flowers. ½ oz. 50c | Pkt. .10 |
| Golden Machet. Splendid Golden Yellow. | .10 |
| Victoria, Giant Red. Shows a brilliance of color which is truly surprising in this class of plants. | .10 |
| White Goliath. (New). This new mignonette has very large spikes of flowers which might well be called double as the individual florets are larger and much fuller than in older varieties, presenting almost solid columns of white. It is excellent for cutting and rich in fragrance. | .25 |
| Odorata. The sweet-scented favorite of old-time gardens. | .10 |
| Mixed. Oz. 30c | .10 |

NEMOPHILA

(Love Grove). Charming California annuals for borders.

- | | |
|--|-----|

| Affinis (Ornamental Tobacco). White and fragrant. Height 3 ft. | .10 |
| Sanderæ. Pink. Large flowering hybrids, very showy, profuse bloomer, easily raised from seed. | .10 |
| Mixed. All colors. | .10 |

NIGELLA

(Love-in-a-Mist or Devil-in-the-bush). B. Singular flowers, the upper petals being reflexed to resemble horns.

- | | |
|---|-----|
| Damascena, Miss Jekyll. Double rich deep blue, contrasting well with the light green feathery foliage. | .10 |
| Damascena, Double White. | .10 |
| Damascena, Double Mixed. Blue and white. Oz. 45c. | .10 |

NASTURTIUM

Singularly suitable for growing on poor sandy soils where few things thrive. The dwarf kinds will make a glorious display on a sand bank or any comparatively useless patch of soil, while the climbing or vining varieties run a wild riot over anything unsightly in the garden or are good for temporary summer shade on porches and verandas. Beside the showy blossoms, the foliage makes a piquant salad much liked by many people, while the seeds, if gathered green, are fine for pickling. A plant of so many points can hardly fail to be popular. Sow the seed an inch deep, where the plants are to remain, as it is not an easy subject to transplant.

- | | |
|--|-------------|
| NASTURTIUM, TOM THUMB (See page 88) | Pkt. \$0.10 |
| Bronze. Distinct golden bronze. Height 1 ft. | .10 |

Dutch Bulbs

Afford the richest field for beautiful decorative effects for the least labor. Any woman will enjoy the care of these aristocratic plants and revel in the beauty of the waxy flowers and richness of perfume. We are the largest importers in the West. Special Bulb Catalog is usually ready about September first. Write for it.

ANNUALS

PHLOX

CULTURE—Phlox is an extensive and interesting genus of invaluable hardy annuals, producing fine clusters of flowers in a variety of colors which includes white, pink, rose, purple, and scarlet. Some of the scarlets have pure white eyes and each year new varieties are added to the list. The only treatment required is to sow the seed where the plants are wanted to grow, and for perfection of flowers, thin out to one foot apart each way.

ONE OF OUR FIELDS OF PHLOX

PHLOX DRUMMONDII. Showy bedding plants.	Pkt.
Bright Scarlet. Height 1 ft	50.10
Pink. Height 1 ft10
Chamois Rose. Height 1 ft10
White. Height 1 ft10
Large-flowering. Fine mixed. Height 1 ft. ¼ oz. 45c	.10
Very Dwarf, Extra Fine Mixed. Height ½ ft.10
Cuspidata (Star Phlox). Mixed. Height 1 ft.10

PORTULACA

For exhibiting a display of dazzling brilliancy the Portulaca is unrivalled. It revels in sunshine, and will stand quite a degree of drought.

CULTURE—The Portulaca may well claim a prominent place in our garden. A large bed or border presents a gay appearance of dazzling brilliancy. They are best sown in February and March, as they grow with great rapidity in warm weather. Sow the seed very shallow in a sunny situation. Keep moist but never over water.

Single. Crimson. Height ½ ft10
“ Scarlet. Height ½ ft10
“ White. Height ½ ft10
“ Yellow. Height ½ ft10
“ Mixed. Height ½ ft. ¼ oz. 45c10
Double. Golden. Height ½ ft10
“ Pink. Height ½ ft10
“ Scarlet. Height ½ ft10
“ White. Height ½ ft10
“ Mixed. Height ½ ft. ¼ oz. 75c10

POPPY

CULTURE—There can be no stronger and better proof of the beauty of this flower than the extent to which the varieties are grown. No other flower will produce such gorgeous brilliancy for bedding purposes. Sow the seed in beds where it is required, as it does not transplant easily. Cover it its own depth. Keep moist and thin out to six or eight inches apart. Height, except where noted, 2 to 3 feet.

See also list of Perennials.

SINGLE ANNUAL POPPIES.

Admiral. Glistening white, with a broad band of bright scarlet round the smooth edged petals10
Danebrog. (Danish or Victoria cross poppy). Scarlet with white blotch at base of each petal, forming a perfect cross10
Miss Sherwood. The flowers are from 4 to 5 inches across, pure satiny white, tinged with chamois rose10
Shirley, American Legion. For complete description of this new, striking Flanders' poppy, see List of Novelties. 3 Pkts. for 60c25
Shirley, Blue Shades25
“ Rose Pink25

- Sanguineus.** Blood-red foliage. Height 6 ft.10
- Zanzibariensis.** Mixed. Very large leaved.10

SALPIGLOSSIS

(Painted Tongue)

SALPIGLOSSIS GRANDIFLORA

Not one amateur gardener in a hundred knows this splendid annual, one of the most magnificent of all. The throat of the flower is beautifully lined and marked with rich velvety tints like an exquisite Gloxinia, but the plants are so free flowering that armfuls of blossoms can be gathered daily from a small bed or border. They are graceful and exquisite, especially suitable for table decoration. Sow thinly where they are to bloom and thin to 1 foot on poor soil and 18 inches on good. Try them this season. They like plenty of sun, which does not spoil the color as in some other flowers.

- SAPONARIA CALABRICA** (The Calabrian Pink or Soapwort). Pink. Height ½ ft.10

SILENE

- Used as a carpeting for bulbous plants in spring. There is no other annual plant so effective as *Silene pendula compacta* for this purpose. Sow in August or September. For summer blooming, sow in March.
- Armeria, Catchfly.**Pkt.
 - Compacta.** Double red. Height ¼ ft.10
 - Pendula compacta.** Red. Height ¼ ft.10

SCABIOSA

(Mourning Bride or Pin Cushion Flower)

CULTURE—No "old fashioned" flower bed is complete without this sweet and dignified flower; and alone it is a worthy addition to any garden. Free blooming, hardy double annual. It succeeds in any ordinary garden soil. Handsome flowers growing to a height of two feet and fine for cutting. Sweet scented. An excellent border plant. Sow the seed ¼ inch deep, keep moist, never water so much that soil becomes soggy.

SCHIZANTHUS

The Schizanthus has been greatly improved by selection and hybridizing in recent years, and when gardeners awake to its many merits, it will increase rapidly in popularity. Not only are the flowers bright and telling, but the foliage is deeply cut and serrated like a fern, each plant forming as it were, a complete bouquet. It has been aptly termed the "Poor man's Orchid" as it closely resembles some of these aristocratic flowers. Sow in pots or boxes and transplant to good soil in the open, from February to May. Also fine for pot culture in the greenhouse.

A California plant, cultivated in Europe for many years. Of the easiest culture, producing in great profusion flowers not unlike those of the canterbury bell.

Grandiflora. Violet. Height ½ ft. 10
Gloxiniodes. White and blue. Height ½ ft. 10

STOCKS

These popular flowers are unrivalled for garden display and our strain of Giant Perfection is without doubt the finest obtainable, growing to a height of 2 feet, and producing long spikes of highly fragrant flowers and a larger percentage of double than any other strain grown.

CULTURE—For a splendid display in summer, sow in February and March, continuing to sow at intervals for a succession of bloom. Sow in June and July for winter cutting and even later than this in warm localities. The soil should be carefully prepared, three parts of light loam to one each of leaf mold and sharp sand, being an ideal mixture, though any good garden soil will do. Sift this and put the rougher parts in the bottom of the flats or pans. Then fill up with the finer part, allowing room for watering. Sow the seed thinly as a pinch of seed produces hundreds of plants. As soon as sown, cover with about one-eighth of an inch of fine soil and over this place a piece of burlap or old gunny sack and keep moist. Watch closely and remove the covering at once when the seedlings appear and gradually shift to sun to harden. In a few weeks, the little plants will be large enough to transplant.

Germain's
 ZINNIA
 DOUBLE
 GIANT PICOTEE

ZINNIA

(Youth and Age)

The Zinnia is so easily grown that it is apt to be left alone after sowing, to look after itself, and this it will do to an extent that is quite surprising. But give it the same attention that is given to other and less valuable flowers and there is nothing that can equal it for gorgeous beauty. Our Mammoth strain produces flowers as large as the finest Dahlias, magnificent in petalage and of the brightest imaginable coloring. To get this splendid effect, prepare the soil with care and use plenty of well decayed manure which must be well incorporated as the digging proceeds. Then sow the seeds where they are to flower. The finest Zinnias are always from plants that have not been transplanted. Thin to 18 inches apart or less, if the soil is poor. Cultivate the ground between the plants regularly, give water in abundance in dry weather and grand results will be obtained. The flower lasts a long time looking cheerful until the seed is quite ripe. The fact of the flowers remaining so long perfect has given the plant one of its common names "Youth and Old Age."

There is no better strain of Zinnias in existence than that offered.

SEEDS OF CLIMBING PLANTS

Nothing lends such a charm to the home as vines and climbers. A vine clad porch or veranda on a hot day is a pleasant place. Vines soften ugly, hard lines in architecture, hide unsightly things in the garden, are beautiful in or out of flower and cannot be too freely planted. Many of the dwarfier kinds are nice for hanging baskets or for clothing parkways. Others are good for scrambling over old dead trees or posts. In short, there is no garden, no matter how small, in which vines do not play an important part in the scheme of decoration.

A—Annual P—Perennial

COLLECTIONS (Our Selection) 12 Beautiful Varieties, Climbing and Trailing Plants \$0.75
6 Beautiful Varieties Climbing and Trailing Plants \$0.35

ADLUMIA

ADLUMIA CIRRHOSA. P. The graceful Allegheny Vine; Pkt. also Mountain Fringe. Pink. Height 8 ft. \$0.10

AMPELOPSIS

This is the well known Boston Ivy, a plant known from coast to coast. It clings with great tenacity to anything within reach of the little tentacles, produced from the stem. In summer, the foliage is deep green; in autumn it turns to the most delightful tints. The seed may be sown at any time of the year.

AMPELOPSIS. Veitchii (Japan Ivy). P. Height 50 ft.10

ANTIGONON

Planted in a sunny location, where it can ramble at will, there is not a more beautiful plant in existence than the Mexican Rosa de Montana. Nearly always in flower; the blossoms are like those of a rosy pink Begonia, but borne in the greatest profusion all over the plant. Will not thrive in a shady position.

ANTIGONON LEPTOPUS.15

ARISTOLOCHIA

A. elegans is the newer of the two and is a twiner with small leaves and gorgeously colored flowers, freely produced. It has none of the unpleasant odor complained of in the older *Aristolochias*. *A. Siphio* is not so remarkable for its flowers, but the foliage is grand, its great leaves of the deepest green being among the finest things known in horticulture.

Elegans. Hhp. Chocolate and purple. Height 30 ft.10

Siphio. (Dutchman's Pipe). P. Very odd-looking and interesting. Yellow and brown. Height 40 ft.10

AUSTRALIAN PEA VINE

See *Dolichos lignosus*.

Radicans. Orange-scarlet. Height 15 ft.10

Twediana. Bright Yellow; evergreen. Height 20 ft.10

CALAMPELIS

(*Eccremocarpus*)

Scabra. P. Deep Orange. A valuable climber to cover trellises. Height 6 ft.10

CANARYBIRD FLOWER

CANARYBIRD FLOWER (*Tropaeolum peregrinum*). Hha. A charming annual vine with delicate foliage. Flowers yellow. Height 8 ft.10

CARDINAL CLIMBER

Ipomea Hybrid. It is one of the most striking climbers yet introduced. Grows to a height of 30 feet with attractive green foliage covered with a blaze of bright cardinal red flowers. A warm, sunny locality is best. Soak the seed in hot water over night, sow in boxes and transplant.15

CLEMATIS

The beauty of the Clematis or Virgin's Bower is well known, but the plants are not as freely used as they ought to be. The new hybrid forms give a variety of color and size, some magnificent things having appeared among them, but there is not a single Clematis of any sort or kind that is not well worth its place in any garden. The seed takes a long time to germinate.

Jackman's New Hybrids. Mixed. Height 10 ft.25

Among the newer strains of large flowering clematis there are none to surpass these famous hybrids. The flowers are of enormous size, in a wide range of colors especially rich in dark purple and blue.

Paniculata. Hardy perennial, massed with sweet scented white flowers.10

CLIANTHUS

CLIANTHUS PUNICEUS (New Zealand Parrot's Bill). P. A very handsome climber. Bright scarlet. Hgt. 6 ft.15

COBAEA

P. Rapid-growing bell-shaped flowers.

Alba. White. Height 20 ft.10

Scandens. Purple. Height 20 ft.10

WISTARIA

WISTARIA SINENSIS. P. A charming old-fashioned hardy climber, producing its pale blue flowers in large clusters in early spring. Light blue. Height 50 ft.....	Pkt. \$0.15
---	-------------

SWEET PEAS

GIANT WAVED SPENCER SWEET PEAS

The character of these flowers is of healthy and vigorous growth and quite distinct from the standard sorts. They are very large measuring from 2 to 2½ inches across with large frilled and wavy standards. Three and four of these beautiful flowers are borne on one good long stem, making them unsurpassed for vases and other decorative flower work.

CULTURE—Sweet Peas should be sown about three inches deep, but cover the seed only half that depth at the start and fill in when the young plants appear. They require an abundance of water—but do not sprinkle the vine. Keep the flowers picked and do not allow them to run to seed or they will soon stop flowering.

NEW GIANT SPENCER SWEET PEAS

DEFIANCE. A new scarlet, large, vigorous and absolutely burnless.	Pkt. .25	Oz.
HEBE. Large bright pink. A rich clear color. Long stemmed. A splendid variety.	.25

The Momordicas are very handsome. The fruit bursts when ripe, exposing bright orange-scarlet interior, which resembles a handsome flower.	

PERENNIALS

Our Selection 12 Fine Varieties of Perennial Flower Seeds. \$1.00

Our Selection 6 Fine Varieties of Perennial Flower Seeds. \$0.50

The very word "Perennial" conjures up old time memories of old fashioned plants, lovely old gardens with borders, semi-neglected, perhaps, but always overflowing with flowers; gardens where one can cut sheaves and armfuls of flowers without their being missed, where every day in the year, there is something new. Giant blue Larkspurs look over garden walls or fences; Lilies invite one into the garden by their grateful perfume, while in the spring, the tender shoots pushing through the soil are almost as beautiful and equally interesting as the flowers. In autumn, Chrysanthemums, Dahlias, Asters and Foxgloves brighten the shortening days, while even the decaying foliage of those which have been so glorious during the summer is not without its charm. This is not the place for the tidying up gardener. It is "Grandmother's Garden", a garden of sweet things, of memories, of beauties unknown to those who only look for glaring displays and hard color outlines. And all these can be had by anyone who will take the little trouble to plant a few seeds, for nearly all these precious plants can be raised from seed, as easily as a pansy. Especially in the Southland, is this phase of gardening neglected, just where it ought to be most popular.

COLLECTIONS

ONE PACKET OF EACH OF THE HARDY PERENNIALS LISTED BELOW FOR \$1.75. REGULAR VALUE \$2.25

ANEMONE CORONARIA. Mixed. Height 1½ ft.
ANTIRRHINUM (Snapdragon). Mixed colors. Height 2 ft.
AQUILEGIA (Columbine). Mixed best varieties. Height 2 ft.

ACONITUM

MONK'S HOOD or WOLFbane. For shady corners. Blue flowers. Three to five feet high. .10

AGATHAEA

COELESTIS (Blue Marguerite). Excellent border plant, producing almost continually an abundance of daisy-like flowers. The color is a beautiful blue, known as "Mazarine blue" .15

ALYSSUM

Must not be confounded with the Sweet Alyssum. A lovely plant with golden yellow flowers. Grows anywhere. Pkt. \$0.10
ALYSSUM SAXATILE. B. Beautiful yellow. Hgt. ¾ ft. \$0.10

ANCHUSA

ANCHUSA CAPENSIS (Cape Alkanet). B. Azure-blue, free-blooming biennial. Height 1½ ft. .10
ITALICA DROPMORE VARIETY. A handsome perennial plant 3 to 5 ft. tall. Flowers rich gentian blue. .15

ANEMONE

ANEMONE CORONARIA (Windflower). Beautiful, early spring-flowering plants. Mixed. Height ½ ft. .10

ANTIRRHINUM

The old-fashioned Snapdragon, one of the hardiest and best perennials, flowering the first year from seed.

LARGE FLOWERING SEMI DWARF. The best for bedding or borders. Pkt. .10
Black Prince. Nearly black; small dark leaves. .10
Cottage Maid. Delicate pink tinged salmon; white throat .10
Crimson King. Rich deep crimson .10
Defiance, Scarlet .10
Golden Queen. Large golden yellow. .10
Queen of the North. Pure white. .10
Rose Queen. Bright rose pink. .10
Silver Pink. An exquisite shade of light pink. .10
Large Flowering Semi-dwarf Mixed. ¼ oz. 40c. .10
Collection: 1 Pkt. each of 12 colors. 1.00

GIANT VARIETIES. 2 to 3 ft. in height.
Defiance. Fiery Scarlet. .10
Delila. Carmine Rose, white throat. .10
Fire King. Scarlet and orange. .10
Galathea. Crimson, white throat. .10
Pink. Clear pink. .10
Ruby Rose. Rose, tinted ruby red. .10
White. Tall snow white. .10
Yellow. Golden yellow, lighter throat. .10
Tall Giant Mixed. ¼ oz. 30. .10
Collection: 1 Pkt. each of 12 colors. 1.00
Two dozen collection: 1 Pkt. each of every variety listed. 1.75

ARABIS

One of the first flowers of spring, better known as "Snow on the Mountain". Comes easily and freely from seed and produces a white sheet of flowers, fragrant and delightful. Fine for rock-work.
ARABIS ALPINA White. Height ½ ft. .10

AQUILEGIA

The old-time Columbine, a delightful plant in every respect, native to America, but much improved by cultivation and selection. Our Rocky Mountain Columbine is one of the finest of all, with its long caudate spurs and charming coloring. Every color is represented in such lovely combinations as to win the admiration of all.
Chrysantha. Yellow. Height 2 ft. .10
Coerulea (Colorado State Flower) blue .25
Long Spurred Pink .25
Long Spurred Hybrids. Mixed .25
Double Mixed Hybrids. Very fine. Height 2 ft. .10
Single Mixed. Height 2 ft. .10

ARMERIA

ARMERIA. The Sea Pink, an edging plant without an equal; fine foliage even after the flowers are gone, always attractive. .10

ASPARAGUS

Sorengeri. A fine ornamental plant for hanging baskets. .10
Plumosus. A fine pot-plant; 100 seeds 85 cents. .10

ASPERULA

ASPERULA ODORATA (Woodruff). Very fragrant. Ht. ½ ft. .10

AURICULA

AURICULA. Finest English hybrids; from the finest collection. Fine deep colors, variously margined. Good for pot culture. Height ½ ft. .25

BEGONIA

The tuberous rooted Begonia is one of the finest greenhouse plants. Sow in early spring, in fine sterilized soil, leaf-mold and sand. Cover the seeds very slightly and place a sheet of glass over each pan or flat until the young plants are up. Prick off singly as soon as large enough to handle and place in small pots when ready, potting into the larger sizes as they fill the smaller with roots.
Tuberous-rooted. Double mixed (see page 73) .50
Tuberous-rooted. Single mixed .50

BEDDING OR BORDER BEGONIAS.

Easily grown from seed. The bedding begonias thrive and bloom admirably in shady locations. The seed is very small. Sow in boxes in sifted soil and do not cover but press lightly into the surface.
Luminosa, fiery dark scarlet. Dark foliage .25
Prima Donna. Pink. Fine for pot plant .25
Erfordia. Bright Rosy Carmine .25
Vernon. Bright Orange Carmine flowers, deep red foliage .25
Semperflorens Alba. White. .15
Semperflorens Rosea. Pink. .15
Semperflorens Mixed. .15

PERENNIALS

Rose	Rose
White	White
Mixed . ¼ oz. 40c.	Mixed . ½ oz. 30c.

CALYCANTHEM . (Cup and Saucer)	
Blue	White
Rose	Mixed . ½ oz. 35c.

CARNATION

Our seed is saved from the finest kinds selected, especially for bright coloring, size and fragrance. The Marguerite forms are smaller but flower in a shorter time from seed.

PERPETUAL, or TREE . Height 2 ft.	
Purple25
Rose25
Scarlet25
White25
Yellow25
Collection of 5 colors	1.00
Mixed, all colors25

MARGUERITE. Very fragrant, high percentage of doubles, the quickest to bloom from seed, flowering in 4 or 5 months.

Rose Pink	White
Red	Mixed . ¼ oz. 60c.

DOUBLE BORDER CARNATIONS. A good hardy strain of dwarf habit, excellent for beds or borders, being free and continuous bloomers compact in growth.

Red	White
Rose	Mixed
Violet	Collection of 4 colors

CENTAUREA

Dusty Miller . Fine plants for borders.	
Candidissima . White foliage. Height 1 ft.10
Gymnocarpa . Height 1 ft.10

CERASTIUM

CERASTIUM TOMENTOSUM (Jerusalem Star). White leaves; trailer; useful for edging and rockwork.15
---	-----

CHRYSANTHEMUM

Frutescens . (Paris Daisy or Marguerite). B. White, yellow eye. Height 2 ft.15
Leucanthemum hybrid (Shasta Daisy); White, yellow center; flowers four inches in diameter; valuable for cutting. Height 2 ft.10
Indicum (Chinese). Mixed. Height 3 ft.25
Nanum (Pompone). Mixed. Height 2 ft.25
Japonicum (Japanese). Mixed. Height 3 ft.25

CINERARIA

CINERARIA MARITIMA CANDIDISSIMA . Silvery foliage, very useful for ribbon beds and borders. Height 1 ft.10
--	-----

CLIANTHUS

CLIANTHUS DAMPIERI (the Australian Glory Pea). A magnificent flower, scarlet, with black center. Water sparingly after sowing. Height 4 ft.15
---	-----

COLEUS

Gorgeous leaved plants, suitable for bedding out or indoor use. The coloring in our large leaved varieties is not excelled by even the finest Caladiums, while the variety in tints is remarkable. The Coleus likes plenty of sun, ample moisture and rich, light soil to bring out its best points. Sow in March.

New large-leaved . Very fine. Height 2 ft.	Pkt. \$0.25
Finest Mixed . Height 2 ft.15

Germain's
COREOPSIS
LANCEOLATA

See page 76

PERENNIALS

COREOPSIS

The best golden yellow composite, fine for cutting or for garden decoration. It comes easily and quickly from seed and flowers very freely. Sow several times in the year for a succession of bloom. See page 80. Pkt.

Lanceolata, B. A beautiful plant, with lance-shaped leaves and showy bright flowers 2 or 3 inches in diameter. Yellow. Height 2 ft. Oz. 60c. .50.10

CUPHEA

CUPHEA PLATYCENTRA (the Cigar Plant). Pretty tubular flowers. Scarlet and black. Height 2 ft. .10

CYCLAMEN

One of the most popular of greenhouse plants and deservedly so. The seed should be sown in autumn, any time from August to November, and again in the spring for a succession of flowers. During the last ten years, the strains have been greatly improved by European hybridists. We constantly add the finest varieties and there is nothing better than our strain in existence. The seeds should be dibbled in half an inch deep and 1 inch apart. Hh. Pkt.

Persicum giganteum. Fine mixed. Height ¾ ft. .25

DAISY See Bellis.

DAISY, SHASTA. See Chrysanthemum above.

DAHLIA

While Dahlias are more frequently raised from tubers than seed, there is great interest in growing some seedlings, as there is always the chance of getting something novel and distinct among them. Both single and double, also the Pompon and Cactus forms can be grown this way. Sow in February and March, under glass, or in April in the open ground. Watch carefully for slugs and small snails, as these will ruin hundreds of the young plants in a night, if allowed to. Something in the Dahlia is very attractive to these pests. Hh.

Large-flowered double, best quality mixed. Height 5 ft. Pkt. .50.15
Cactus. Mixed colors. Height 5 ft. .25
Pompon. Small bouquet, mixed. Height 4 ft. .25
Single, Mixed. Height 5 ft. .10

DELPHINIUM

The perennial larkspur is possibly the finest herbaceous plant in existence, rivaling even the Peony. The plants thrive in any soil and situation, withstand frost and heat and are always the central attraction in the hardy perennial border. The blue forms are superb, while the scarlet, though not quite as hardy as the others, is extremely showy. Sow in autumn and again in spring.

Cardinale (Scarlet Larkspur). Bright scarlet. Height 3 to 5 ft. Pkt. .50.10
Bella Donna Clear turquoise blue .25
Elatum (Bee Larkspur). Mixed. Height 3 ft. .10
Formosum. Bright blue. Height 4 ft. .10
Hybridum. Double, extra choice mixed. Height 3 ft. .15
Gold Medal Hybrids. The finest strain of mixed hybrids. The plants are of strong vigorous habit and produce large spikes of delicately shaded flowers mostly in the lighter blue tints. .25

DIANTHUS

Belongs to the same family as the Carnation. Pretty and easily grown plants, coming freely from seed and liking a light, sunny position. Sow at any time. Pkt.

SINGLE PINKS. **Crimson Belle.** Velvety crimson. .10
Queen of Holland. Pure white. .10
Hedewigii (Single Japan Pink). Finest Mixed. ¼ oz. 30c .10
Hedewigii Laciniatus (Single fringed pink) mixed. .10
Plumarius (Single Florists. Pheasant's eye or Hardy Garden Pink). Delightful odor. Fringed edged flowers of many colors. .10
DOUBLE PINKS.
Fireball. Rich glowing red. .10
Mourning Cloak. (White Frill). Dark velvety crimson, margined white. .10
Purity. Beautiful double white. .10
Hedewigii fl. pl. (Double Japan Pink) double mixed. ½ oz. 45c .10
Chinensis fl. pl. (Double China or Indian Pink) very double, colors varied and bright. ½ oz. 45c .10
Diadematus Albus, fl. pl. Double white. .10
Diadematus, fl. pl. (Double Diadem Pink). Finest mixed .10
Laciniatus, fl. pl. (Double Fringed Pink). Large double fringed, all colors, mixed. .10
Imperialis, fl. pl. (Imperial Pink). Double mixed. .10
Mixed Hybrids. Single and double in all varieties, mixed. .10
Collection of 10 choicest varieties. .75

DODECATHEON

DODECATHEON MEDIA (American Cowslip). Lilac. Fine for rockwork, etc. Height ½ ft. .10

DELPHINIUM DIGITALIS

The Foxglove is one of the oldest garden plants and a favorite everywhere. Produces tall, showy spikes of pretty, showy flowers in a great variety of color. Pkt.

DIGITALIS GLOXINOIDES (Foxglove). Fine mixed. 3ft .50.10

ERIGERON

ERIGERON. Bluish lilac daisies. Producing a mass of flowers nearly all the year around. Good winter flowers. Height 2 ft. .10

ERYNGIUM

(Sea Holly)

PLANUM. Can be dried for winter bouquets. Produces handsome thistle-like heads of gray-blue flowers. .10

ERYTHRINA

CRISTA-GALLI (Coral Tree). Dark red. A handsome decorative plant for shrubbery. Hgt. 6 ft. .25

EVENING PRIMROSE See Oenothera

FERNS

All species mixed; choicest varieties. ½ to 2 ft. .15

FORGET-ME-NOT See Myosotis

DICTAMNUS

The Fraxinella or Burning Bush possesses the peculiar property of giving off a volatile oil or gas that ignites and flashes up for a second or so when a lighted match is applied, without injury to plant. A pretty, herbaceous plant, worthy extended culture. **FRAXINELLA** (Burning Bush). Red; handsome. The Pkt. seed is slow to germinate. Height 2 ft. .50.10

FREESIA

FREESIA REFRACTA ALBA. B. Well-known bulbous plants, blooming in one year from seed. White. Height ¾ ft. .50.10
RAINBOW MIXTURE Many beautiful shades. .25

FRENCH HONEYSUCKLE

FRENCH HONEYSUCKLE (Hedysarum coronarium). Red and white mixed. Hardy, profuse-blooming. Succeeds well near the seaside. Not to be confounded with the climbing Honeysuckle. Height 3 ft. .10

PERENNIALS

GAILLARDIA

- (Blanket Flower). B. Showy border plant. Pkt.
Grandiflora. Splendid mixed. Height 1½ ft. ½ oz. 45c. \$0.10
Maxima. Golden yellow. Height 2 ft. .10
Lorenziana. Double, mixed colors. Height 1½ ft. ½ oz. 45c .10
Picta. Red and yellow. Height 1½ ft. ½ oz. 30c. .10

GENTIANA

- GENTIANA ACAULIS.** An alpine plant of great beauty; fine for borders and rock work; intense blue. Height ¼ ft. .10

GERANIUM

- B. Seed saved from best varieties of all kinds
Zonale, Single. Finest mixed. Height 5 to 6 ft. .10

GERBERA

The original form of this fine composite was bright red, but we have now almost all colors. Comes rather slowly from seed, but well worth waiting for. Sow at intervals all through the spring and summer. See adjoining engraving.

- Jamesoni** (Transvaal Daisy). The Scarlet Daisy of Pkt. South Africa. .50.25
Hybrids. Mixed Colors. .25

GEUM

- Mrs. Bradshaw.** The double Mrs. Bradshaw is undoubtedly the finest Geum produced. The flowers are large and full, of a beautiful orange scarlet color, blooming from April to September. A hardy perennial. Height 18 inches. .10

- Lady Stratheden.** This new geum is the exact counterpart of the popular Mrs. Bradshaw except in color. The shade is a clear golden yellow harmonizing admirably with the deep orange of the older variety. .25

GLOXINIA

- GLOXINIA HYBRIDA.** T. A beautiful greenhouse perennial bulb. Seed saved from the finest erect and drooping varieties. Finest mixed. Height 1 ft. .25

GOLDENROD See Solidago.

GYPSOPHILA

- GYPSOPHILA PANICULATA.** B. Very graceful, flowering in panicles, and excellent for cut-flowers. White. Height 1½ ft. See also Annuals. .10

HELIOTROPIUM

- HELIOTROPIUM** (Cherry Pie). Deliciously fragrant, also fine for pot culture. Finest mixed. Height 6 ft. .10

HEUCHERA

- B. Allied to the Saxifragas; very graceful valuable for cut-flowers.
Alba. White. Height 1 ft. .15
Sanguinea. Crimson. Height 1 ft. .15

GEUM MRS. BRADSHAW

GERBERA JAMESONI

HIBISCUS

- Well-known showy perennial shrubs with brilliant flowers. Pkt.
Coccineus. Scarlet. Height 5 ft. .10
Roseus grandiflorus. Pink. Height 4 ft. .10
Mallow Marvels. Robust Perennials. 3 to 5 feet high, bearing profusely, flowers of the largest size, in all the shades of crimson, rose, and white. .10

HOLLYHOCK

The Hollyhock comes fairly true from seed and will flower the first year if the seed is sown early and transplanted to rich soil. Sow again in the fall and transplant in the spring. One of the few herbaceous plants that are effective in landscape work. Pkt.

- Allegheny.** Semi-double, fringed, mixed. Height 5 ft. \$0.10
Single Mixed .10
Double Crimson. Height 5 ft. .10
Double Maroon .10
Double Newport. Pink. Height 5 ft. .10
Double White. Height 5 ft. .10
Double Yellow. Height 5 ft. .10
Double Mixed. Height 5 ft. .10

HONESTY

- HONESTY.** B. Interesting in a dried state, the membranous lining of the seed-pod making a handsome ornament for winter bouquets. Purple. A biennial. Height 1½ ft. .10

HUNNEMANNIA

- HUNNEMANNIA FUMARIAEFOLIA.** A showy plant belonging to the Poppy family. Yellow. Height 2 ft. .10

HYACINTHUS

- HYACINTHUS CANDICANS.** A bulbous plant, throwing up a spike bearing 20 to 30 yucca-like flowers; pure white and fragrant. Height 3 ft. .10

IMPATIENS

- SULTANI.** (Sultan's balsam) charming plants producing freely brilliant waxy-looking flowers. .25

IPOMOPSIS

- IPOMOPSIS** (Texas Plumes). Showy scarlet and gold pyramidal blossoms and feathery foliage. Fine mixed. Biennial. Height 3 ft. .10

LANTANA

- LANTANA.** B. White, rose and yellow particolored fragrant flowers, like heliotrope in form. Finest mixed. Height 4 ft. .10

- LANTANA DWARF.** Excellent bedding plants about 1 ft. in height. Many delicate shades mixed. .25

LAVENDER

- LAVENDER SWEET.** Blue; a hardy shrub, well-known and esteemed for its delicious fragrance. Height 3 ft. .10

LINARIA

- LINARIA CYMBALARIA** (Kenilworth Ivy). White and purple; very pretty for rock and hanging-baskets; trailer. .10

PANSY or HEARTSEASE

CULTURE—To have pansies in perfection, sowings should be made every month from the end of July to the end of April. Young, vigorous stock always gives the best results. Sow in pans or frames and transplant when large enough to a border of rich soil. Water must be given freely in bright weather and the flowers gathered as soon as they begin to wilt in order to keep up a succession and prevent running to seed, which injures the plants and tends to small flowers.

GERMAIN'S GIANT PRIZE PANSIES

What could be more interesting to any lover of flowers than a bed of Pansies fresh with the morning dew, some clad in their rich velvety petals and others turning their smiling faces upward asking only to be appreciated in their brief effort to make the world a little more beautiful!

GIANT PURPLE. Very showy.	Pkt.
Velvety Royal Purple.....	\$0.25
GIANT KING OF THE BLACKS.25

OXALIS (Shamrock, or Wood Sorrel). Delightful little plants for edging, hanging-baskets and rockwork.

Rosea. Pink. Height 1/2 ft. .10

Tropaeoloides. Yellow. Height 1/2 ft. .10

PETUNIA

Culture—The Petunia is a hardy Perennial, producing the most showy flowers in the greatest profusion. For bedding purposes or garden decoration, it is indispensable. It succeeds best in sunny location. Sow the seed very shallow and keep moist. The Single Petunia is of the easiest culture—seeds itself when once planted and grows in any soil that will sustain plant life.

Germain's Select Bedding. Large flowering Single Petunias in a wonderful range of colors. 1/4 oz. 50c. Pkt. \$0.10

Giants of California. Very large, ruffled and fringed, extra fine mixed. Height 1 ft. .25

Howard's Star. Crimson, with a five-pointed white star in center. Very free flowering. For bedding, baskets, etc., it is exceptionally good. .15

Balcony Petunias. Large and free flowering. Mixed. .25

BUXUS SEMPERVIRENS (Evergreen Box). Oz. 40 cents, pound \$4.00.
CALLISTEMON RIGIDUS (Bottle Brush). Ounce \$1.50.
CAMELLIA JAPONICA. Packet 25 cents.
CAMPHORA OFFICINALIS (Camphor Tree). Oz. 35 cents, pound \$3.50.

- CASUARINA**
Equisetifolia. (Beefwood). Ounce \$1.00
Stricta (She-Oak). Ounce 75c.
CEDRUS DEODORA (Himalayan Cedar). Oz. 50 cents, pound \$5.00.
COPROSMA BAURI. Ounce \$1.25.
COTONEASTER PANOSA. Red-berried Evergreen. Ounce \$1.00.
CRATAEGUS (Hawthorn). **Pyracantha.** Ounce 75 cts.
CRYPTOMERIA JAPONICA (Japan Cedar). Ounce 40c, pound \$4.00.

- CUPRESSUS**
Arizona (Blue Cypress). Ounce 50 cents, pound \$5.00.
Macrocarpa (Monterey Cypress). Ounce 50 cents, pound \$5.00.
Sempervirens (Italian Cypress). Ounce 40 cents, pound \$4.00.

- CYDONIA JAPONICA** (Japanese Quince). Pkt. 15 cents, oz. \$1.00.
EVONYMUS JAPONICUS. Evergreen evonymus. Ounce 50c.
FICUS MACROPHYLLA (Moreton Bay Fig, or Long-leaved Rubber Tree) Height 100 ft. Ounce \$1.50.

- GENISTA CANARIENSIS.** Ounce 75 cents.
GREVILLEA ROBUSTA (Silky Oak, or Australian Fern Tree). Height 150 ft. Ounce \$1.00 Pound \$10.00.

- JACARANDA OVALIFOLIA** (Brazilian Jacaranda). Pod 5 cents.
LEPTOSPERMIUM LAEVICATUM. Packet 25c; ounce \$1.50.
LIBOCEDRUS DECURRENS (California Red Cedar). Ounce 50 cents, pound \$5.00.

- LIGUSTRUM JAPONICUM** (Japan Privet). Ounce 30 cents, pound \$3.00.
LIGUSTRUM NEPALENSE (Small-leaved Privet). Oz. 30 cents, pound \$3.00.

- LIGUSTRUM VULGARE.** (English Privet). Oz. 25c; lb. \$2.50.
MELALEUCA HYPERICIFOLIA. Red. Pkt. 15 cts
METROSIDEROS TOMENTOSA. Pkt. 25 cts.
MORUS ALBA. (White Mulberry). Leaves are favorite nutriment of silk worms. Ounce 75c.

- NANDINA DOMESTICA.** Ounce \$1.00.
PARKINSONIA ACULEATA. Ounce 75c.

- PINUS**
Canariensis. (Blue Pine). Ounce 50c.
Coulteri (Big Cone Pine). Ounce 60 cents, pound \$6.00.
Insignis (Monterey Pine). Ounce 70 cents, pound \$7.00.
Lambertiana (Sugar Pine). Ounce 50 cents, pound \$5.00.
Maritima (Seaside Pine). Ounce 20 cents, pound \$2.00.
Torreyana. Ounce 50 cents, pound \$5.00.

- PITTIOSPORUM**
Nigrescens. Height 10 ft. Ounce 75 cents.
Tobira. Ounce 75 cents.
Undulatum. Per pkt. 15c. Per oz. 75c.

- POLYGALA GRANDIFLORA.** Packet 25 cents.
PRUNUS ILLICIFOLIA. (California Cherry). Ounce 20c.
PRUNUS INTEGRIFOLIA. (Catalina Cherry). Ounce 20c.
SCHINUS MOLLE (Mexican Pepper Tree). Ounce 20c, pound \$2.00.
SCIADOPYTTIS VERTICILLATA (Japan Umbrella Pine). Very ornamental. Height 60 ft. Ounce 75c.

- SEQUIA**
Sempervirens (California Redwood). Ounce 75 cents, pound \$7.50.
SPARTIUM JUNCEUM. (Spanish Broom). Ounce 50c.

- STERCULIA**
Diversifolia (Brachychiton populneum). Oz. 60 cents, pound \$6.00.
Platanifolia (China Parasol Tree). Ounce 50 cents, pound \$5.00.
TELOPEA SPECIOSISSIMA. (New South Wales Waratah). Pkt. 25c.

- THUJA**
Orientalis (Chinese Arborvitae). Ounce 40 cents, pound \$4.00.
Orientalis Aurea (Golden Arborvitae) Ounce 50 cents; pound \$5.00.
VIBURNUM TINUS (Laurustinus). Ounce 50 cents, pound \$5.00.

- EUCALYPTUS**
Citriodora (Lemon scented Gum). Per ounce \$2.00.
Corymbalax (Sugar Gum). Ounce \$1.00, pound \$9.00.
Ficifolia (Scarlet flowering Gum). 25 seeds 25 cts, 100 seeds 85 cts.
Globulus (Tasmanian Iron Gum). Ounce 75 cents, pound \$9.00.
Leucosylon (Victorian Ironbark). Per ounce \$1.00.

Try the Persian Muskmelon. You'll [82] Vote it the Best You Ever Tasted

GERMAIN'S CHOICE DAHLIAS

The Dahlia needs no introduction to any one interested in gardening. Like the Chrysanthemum it has come to be "Everybody's" flower. There have been great improvements made, however, in Dahlias during recent years, and in the following list will be found a collection second to none.

FOUR NEW AND RARE VARIETIES

AMUN RA (The Sun God). A decorative of great size in the richest of coppery bronze.....	Each 2.50
MEPHISTOPHELES (Decorative). Color ruby-red. Very large and of extraordinary vigor.....	2.00
MARIPOSA (Hybrid Cactus). One of the gigantic California introductions. Immense flowers on tall firm stems. A true pink intensified by a deeper center.....	4.00
MONTECITO. Beautiful hybrid cactus. The color is a pleasing shade of salmon pink and gold.....	1.50

EIGHT WONDERFUL DAHLIAS

PINK TRIUMPHANT. A new dahlia of outstanding merit. A vigorous grower of perfect habit. The stems are long and rigid holding the flower erect at all times. The flower itself is a Triumph with broad, well-rounded petals tapering abruptly to a point. The shade is the rarest among dahlias, a true pink. There is no trace of purple. The flowers are pure pink throughout, deepening slightly at the center. A gem for your garden and unsurpassed as a pink cut flower variety.....	Each 2.00
ROSA NELL (Decorative). Splendid new California introduction. Charming rose pink, perfect flower.....	1.00
JEAN CHAZOT (Hybrid Cactus). Capucine-red with golden suffusion, frequently tipped with golden yellow. A splendid flower.....	1.00
PRIDE OF CALIFORNIA (Decorative). A splendid dark red of enormous size.....	.50
GEORGE WALTERS (Cactus). One of the most magnificent Dahlias ever introduced. In color a delightful shade of crushed strawberry rose with a suffusion of bronze.....	.50
MABEL B. TAFT (Decorative). A giant yellow Dahlia, suffused with pinkish apricot.....	.50
KING OF THE AUTUMN (Decorative). Large, erect and perfectly formed flowers of a pleasing burnt amber, beautifully tinged with buff and old rose.....	.50
GLOIRE DE VERDUN. A most perfect flower of giant size; in color a most intense cardinal red; one of the most effective high colored varieties.....	.75
The set of Eight Wonderful Dahlias (including Germain's new Dahlia Pink Triumphant) for.....	6.00

DECORATIVE DAHLIAS

This well-known type is one of the best for cutting. The flowers are regular in form and of great size and substance.

BONNIE BLUE. Near blue.....	Each .35
DELICE. Bright rose.....	.25
DR. TEVIS. Salmon rose, suffused with old gold shading to apricot.....	.50
EL CAMINO REAL. Gorgeous velvety Spanish crimson. Immense flowers on strong stems.....	1.00
EMPRESS EUGENIE. Rosy purple or mallow. A new and pleasing shade. Certificate of Merit. A. D. S.....	1.00
GUSTAVE DOAZON. Orange red.....	.25
MILLIONAIRE. Lavender shading to white.....	.50
MINA BURGLE. Crimson.....	.25
MISS QUALITY. Amber buff.....	.50
MRS. CARL SALBACH. Mauve pink shading lighter to the center.....	.75
MRS. FANNIE HIDDEN. Clear lemon yellow.....	.35
PATRICK O'MARA. Orange buff.....	.75
PAUL BONYON. Bronzy salmon and gold.....	.35
QUEEN MARY. Free flowering rose pink.....	.25
RALPH BALL. Splendid deep yellow with gold center. Certificate of Merit A. D. S.....	1.50
SUNSHINE. Brilliant scarlet, faintly tipped yellow.....	.50
SYLVIA. Bright pink.....	.25
TRYPHINNIE. Bright shell pink, lighter tips, with golden sheen at the base and throughout the petals.....	2.00

PAEONY-FLOWERED DAHLIAS

Informal in make-up and exceedingly decorative in character. We recommend these very highly for use as cut flowers.

RISEING BEAUTY. The color is similar to the popular variety geisha but more pronounced. Flowers larger and fuller.....	Each \$1.50
SHANTUNG. A brilliant scarlet, splendid for cutting.....	1.00

SUNSET DAHLIA COLLECTION. We will send twelve splendid tubers of twelve beautiful standard varieties of decorative, cactus and paeony-flowered dahlias, no two shades alike (our **Sunset Collection**) for.....

CACTUS DAHLIAS

The Cactus Dahlia needs no introduction. The large, graceful flowers are admired by all. Chrysanthemum-like, their petals are long and pointed and frequently also quilled or interlaced, in-curved or reflexed according to the variety.

BALLET GIRL. English type cactus. Orange with white edge, but decidedly variable, shading from pure orange to white edged orange.....	Each \$1.50
BERTHA HORNE. Orange yellow, tinted apricot.....	.50
FERNAND OLIVET. Crimson maroon.....	.50
GOLDEN WEST. Yellow and orange buff.....	.25
GUSHER. A striking new hybrid cactus introduced last year. The color is a rich scarlet with a delicate golden suffusion.....	4.00
MISS NANNIE B. MOORE. Lavender pink.....	.35
MRS. EDNA SPENCER. Lavender shading to white.....	.75
MRS. W. E. ESTES. A fluffy pure white.....	1.00
NIBELUNGENHORT. Amber shading to salmon pink.....	.35
PIERROT. A true cactus of unusual color. The petals are deep amber boldly tipped white.....	.75
RHEINISCHER FROHSIN. Rich crimson carmine, white at base of petals, a pleasing contrast.....	.50
SNOWDRIFT. Pure white.....	.50
TARANTULA. Burnt orange.....	.75
U. S. A. A mammoth flower. This magnificent dahlia is a true deep orange. The stems are long and straight and it is constantly in bloom.....	1.00

POMPON DAHLIAS

The elegant miniature-flowered forms have become very popular of late. The twelve varieties listed are chosen from a large collection and are among the best of this type.

ALEWINE. White flushed pink.....	Each \$0.35
AMBER QUEEN. Amber shaded apricot.....	.35
ANNA VON SCHWERIN. Clear light Pink.....	1.00
ARIEL. Deep orange buff.....	.50
CARDINAL. Fiery red.....	.35
CATHERINE. Yellow.....	.35
GRETCHEN HEINE. Creamy white edge pink.....	.35
IDEAL. Pure yellow.....	.50
JOE FETTI. Pure White.....	.35
JOHNNIE. Crimson maroon.....	.50
PRINCE CHARMING. Lavender, tipped purple.....	.35
SUNBEAM. Crimson red.....	.35
The Collection of Twelve Complete for.....	4.50

GLADIOLUS

(Sword Lily)

The gladiolus is invaluable as a summer flower, and its popularity has increased tremendously in the last few years. Our list contains only the best sorts, varieties which have been tried and proven to give the most satisfactory results both as cut flowers and for garden display. When cutting, do so as soon as one or two flowers are expanded. The rest of the buds will open in water if care is taken to remove faded flowers, changing water daily and cutting a piece off the stem each time.

Culture—The bulbs should be planted from three to five inches deep in any good light or sandy garden soil. They flourish best in an open sunny situation. Gladiolus bulbs ready in January.

CINNAMON VINE

DIOSCOREA BATATAS

A rapid climber with bright, glossy heart-shaped leaves. It derives its name from the peculiar fragrance of the delicate white blooms. 2 for 25c..... \$0.15 \$1.50

CANNAS

Cannas are the most easily grown and most useful bedding plants we have. They thrive in any soil, but respond quickly to good treatment. Spade the Canna bed to a depth of 2 feet, incorporating any fertilizer that may be handy, and keep the plants well watered. The results will be surprising. The following varieties have proved successful in every way:

METEOR. The rich crimson-red flowers form immense trusses of great beauty. They are borne well above the foliage and are produced in the greatest profusion. Green leaves. 5 ft. \$0.20 \$2.00

LA FRANCE. A beautiful shade of La France rose with a touch of cream in the throat. Green leaves. 4 ft.20 2.00

QUEEN HELENE. Immense flowers of a rich golden-yellow spotted with vermilion. Green leaves. 4½ ft.20 2.00

MRS. ALFRED CONARD. A popular variety, producing freely large trusses of exquisite shell-pink flowers. Green leaves. 4 ft.20 2.00

KING HUMBERT. Perhaps the most widely grown of all cannas. The great orange-scarlet flowers surmount beautiful bronze foliage.25 2.50

SAN DIEGO. A true orange without red suffusion. Rich and velvety. Bronze leaves. 4½ ft.25 2.50

THE PRESIDENT. The greatest red canna. It is neither a crimson nor a scarlet but a glowing pure red which colorists call vermilion. Green leaves. 4½ ft.35 3.50

RANUNCULUS

Fair Maids of France

Surprisingly bright and cheerful flowers in many shades of rose red, salmon, yellow and white. They grow about 15 in. in height and are splendid for cutting or bedding.

STIM-U-PLANT

AN ALL-THE-YEAR FERTILIZER FOR GARDEN AND HOUSE PLANTS

These tablets increase production, heighten color and improve quality immediately. Many professional and amateur growers use them extensively all the year round—from early spring until late fall outdoors, during the winter for pot plants, hot-house benches, etc. They are as fine for evergreens and other trees as for all garden and potted plants.

EASY TO USE

Simply insert tablets in soil near plants, or dissolve in water at the rate of four tablets to the gallon and apply as liquid manure. Complete directions with every package.

Order Stim-U-planT tablets with your seed and plant order. Price, trial size, 15 cts., small size, 25 cts., 100 tablets, 75 cts., 1000, \$3.50.

GO-FOR-GOPHER

Ready and easy to use. No mixing, no waste, never loses strength. Guaranteed to do the work or your money refunded. The only thing that will get a pocket gopher, and will kill ten where a trap will get one.

Go-For-Gopher is manufactured expressly for the Germain Seed Company and we guarantee its effectiveness.

Not mailable.

20 oz. can \$1.00 10 oz. can..... \$0.50

POISONED BARLEY

Extensive experience with this type of Poisoned Barley has shown an efficiency far ahead of any other type of poisoned grain tested. The percentage of squirrels destroyed is far higher than with any other type of poisoned grain used.

The bitter taste of the strychnine is delayed for several minutes and squirrels can place in their cheek pouches a considerable quantity before any bitter taste is noted; it is then too late for the squirrel to get rid of the poison, as enough has been absorbed to kill the animal.

Prices, 1 pound can 40 cents; 5 pound ca \$1.50; 50 pound drum \$9.00; 100 pound dru \$16.00 **Not mailable.**

Be Rid of Ants Once For All

Antrol

ANTROL, unlike many other preparations, attracts the ants outside your home. The correct installation of the **ANTROL** system places an **ANTROL** jar outside your doorstep and at the various points where the ants normally enter your dwelling. As **ANTROL** itself is more attractive to the ants than almost any other food, it speedily draws a crowd of workers who quickly start carrying the

ANTROL syrup from the jar to the colony as food. In this way the entire colony is poisoned. No other method has proved so satisfactory or offers such beneficial results. Once this system is installed around your home, you can enjoy absolute freedom from these troublesome pests.

NOTE: ANTROL is manufactured according to a United States Government formula.

The jars are of glass with aluminum top and should last a life time. The syrup can be purchased separately to refill the jars when they need replenishing.

Cottage Sets (like the illustration) containing a dozen jars of **ANTROL** Syrup, shipping weight 8 lbs. **\$3.00**

Jars only **\$0.25**
 Pint bottle **ANTROL** Syrup **.50**
 Quart bottle **ANTROL** Syrup **.85**
 Gallons **ANTROL** Syrup **2.50**

ANTROL can not be mailed.

FLYROL

A perfect fly and insect control; destroys flies, moths, mosquitoes, roaches, bed bugs, fleas, chicken mites, lice and their eggs.

At last a positive control for troublesome winged insects wherever they may prove a nuisance. **Flyrol** will rid your home, your stable or your stock yards, of the fly, which modern science recognizes as one of the greatest sources of contagion. **FLYROL** is easily applied with a fine spray gun; simply spray it in the air in the house and go out and close the room for a few moments; when you return you will find the flies dead on the floor. **FLYROL** will not injure dress goods, furniture, or the like. It is pleasant to smell and offers an economical and satisfactory control of flies.

Prices: Each
 Pints **\$0.65**
 Quarts **1.20**
 Gallons **3.25**

Can be mailed.

SNAROL

A ready-to-use positive control for hard shelled snails.

SNAROL is a boon to gardeners. It is a specially treated meal, very attractive to snails as food and having the properties necessary for speedily killing them after they have eaten it. One or two applications in the evening will completely eliminate snails in the garden.

Method of applying: After thoroughly wetting the premises, scatter **SNAROL** lightly over the wet ground. In the morning you will find numerous dead snails. Repeat this application after two weeks to destroy the young that have developed from eggs which might have been laid in the ground.

Do not place SNAROL within the reach of fowls.

Prices: Each
 1 lb. package **\$0.50**
 2 1/2 lb. package **1.00**
 Can not be mailed.

LEMON OIL

An effective insecticide for scale and plant lice on ferns, palms, rubber plants, etc. Will not injure the blossom or foliage. Use one tablespoonful of **LEMON OIL** to one pint of water. Prices: 1/2-pint, **50c**; 1 pint, **75c**; quart, **\$1.25**.

SEMESAN

A Mercuric Disinfectant

Semesan is one of the most remarkable chemicals developed by modern science. It will kill or control many of the diseases borne on the surfaces and some interiors of even the finest of selected seeds and yet at the same time in no way injure the delicate germ life of the seeds treated. In fact, **Semesan** stimulates seeds to a growth, vigor and fertility that far exceeds the capabilities of their progenitors.

Semesan is supplied in packages as follows:
 2 ounces **\$0.60** 1 pound **\$2.75**
 4 ounces **1.00** 5 pounds **13.00**
 8 ounces **1.60** 25 pounds **62.50**

A SEED INOCULANT THAT INCREASES CROP PRODUCTION

Seeds of all legumes—beans, peas, clover, alfalfa, and related crops—will produce far better if inoculated with **Farmogerm**. In addition to the increased crops, these legumes leave in the soil a heavy deposit of nitrogen which benefits all succeeding crops.

No other inoculant will thoroughly inoculate as much seed. The one-acre size bottle of **Farmogerm** is sufficient for 15 pounds of clover, 20 pounds of alfalfa, 100 pounds of Canada field peas, 60 pounds of vetch, etc. A different culture is required for each crop. Be sure to state what crops you wish to inoculate.

A special composite culture is prepared for peas, beans and sweet peas. 1/4-acre size only. You'll get more peas and beans, and larger sweet peas by using this. Ask for No. 5, price **50c**.

Farmogerm prices are: 1-acre size, **\$1**; 3-acre size, **\$2.50**; 12-acre size, **\$9**. Full directions accompany each bottle.

Use Farmogerm (87) for Alfalfa

SPRAY PUMPS

Write for Complete Spray Pump Catalogue

"PRIZE" SPRAYER, FIG. 669 For Garden and Greenhouse Spraying

Without some type of bucket spray pump, no assortment of garden tools may be said to be complete. The "Prize" is much used for spraying small trees, garden truck, flowers and shrubbery; washing windows, porches, autos and buggies; applying whitewash and disinfectants in barns and poultry houses; applying cattle-fly oil, stock dip, etc.

This is our lowest priced spray pump, but it is often referred to as "much in little." The "Prize" is double acting, discharging one-half the solution on both the up and down stroke, giving a continuous spray. It is light; easy to carry; and is "built for business," will develop a good pressure; is easy to operate; is practically non-breakable and will last for years.

Shipping weight, 9 lbs.
"Prize" bucket pump, as illustrated... \$5.25
With "Bordeaux" nozzle instead of "Acme"..... 5.75

"SUCCESS" SPRAYER, FIG. 659 For Garden and Greenhouse Spraying, Etc.

Without doubt, this is the most popular bucket spray pump on the market. Hundreds of thousands of them are today in use all over the civilized world. It is similar to the "Prize" pump, except that it has a large brass air chamber, which acts as a cushion while the pump is operated, and delivers a more uniform stream.

For spraying a small number of trees, for flower and vegetable gardens, greenhouses, etc., it is practically indispensable. The "Success" is also widely used for washing windows, buggies and autos, for applying whitewash and disinfecting barns and poultry houses, also for applying cattle-fly oil, stock dip, etc. An easy working, powerful pump, will last a lifetime if given reasonable care.

Shipping weight 10 lbs. Each..... \$7.25

GERMAIN'S AUTOMATIC LAWN WEEDER

The Germain Automatic Lawn Weeder will kick out clover, bunch grass, dandelions, watercress, in fact, all weeds that a lawn may be infested with.

A little girl with a Germain Automatic Lawn Weeder can easily do the work of three or four men in weeding a lawn and do it better. And she does it standing in an upright position. No stiff back, no sore knees, no soiled hands. She could weed the lawn in her evening gown without soiling her hands.

All you have to do is firmly grasp the handle of the Germain Automatic Lawn Weeder, put point of weeder against weed, place foot against foot rest, do not move foot, just pull handle towards you, using foot as a pivot and the weeder will automatically kick the weed out.

There are no complicated parts, no knives to sharpen, nothing to get out of order. It's fool-proof.

Price, 85c each, postpaid. [89]

POULTRY ACCESSORIES—THERMOMETERS

Hawes Automatic Water Valve

for watering poultry and small stock

These Simple Valves Solve the Watering Problem

At last a trouble-proof water valve that works automatically! It is so simple in design, so perfect in operation you will marvel you did not think of it yourself. Easy to attach—nothing to get out of order. A hollow metal float rests on the surface of the water, as level rises and falls, valve automatically closes and opens. This insures a constant supply of pure, clean drinking water—a vital factor in successful poultry and small stock raising.

Float turns up to clean bowl

A combined automatic valve and individual shut-off. The automatic valve, complete in a screw cage, is as easily removed for cleaning or replacement as a tire valve. The needle valve may be adjusted to reduce the water pressure or used as a shut-off, to avoid disturbing the rest of the line.

Adjusted to drip, fowls need never be without water should automatic become obstructed. Made entirely of copper and brass, nothing to rust or wear out.

Valve only \$1.00
With Individual Shut-off 1.35

BEUOY CAPON SETS

Especially designed to simplify the operation of caponizing, so that the beginner can easily master it. We recommend it as the best low-priced set in popular use. Full printed directions with each set.

Price—In substantial wood cases... \$4.50
Caponizing Set complete with Bow... 5.50

HUMPTY DUMPTY EGG CARRIER

Has been for years the most popular Egg Carrier on the market. It is the most convenient and cheapest obtainable; holds 12 dozen eggs, uses the same cardboard fillers as the ordinary egg cases, can be folded into very small space; weight 6 pounds. Price, complete with Fillers, \$1.00

NEST EGGS

The Common China Glass Egg, indispensable for the chicken yard. 5c. each; 50c per dozen.

GILT EDGE EGG SCALE

Success of California producers has been the result of careful standardizing of their products. So it is with the egg producers; those who are making a success are those who are grading their eggs and selling them according to their weight value.

The **Gilt Edge Egg Scale** is the only Egg Scale made that will give you a correct grading within a range of weights from 17 to 30 ounces to the dozen. Price, \$2.00.

RELIABLE EGG SCALE

The **Reliable Egg Scale** is built for speed, accuracy and endurance.

The **Reliable Egg Scale** has a quick double shift, just a flip of the finger, and you can get all the weights required with the one shift, thereby taking the place of two scales. Price, \$2.75 each.

CHICK BOXES FOR SHIPPING BABY CHICKS

Our **Baby Chick Shipping Boxes**, like the egg boxes, are made of strong corrugated paper conveniently arranged in compartments to hold 25 chicks and come in from one to four compartments to hold 25, 50 and 100 chicks. Prices, 25 chick size, 30c; \$3.00 per dozen.; 50 chick size, 40c; \$4.00 per dozen; 100 chick size, 60c, \$6.00 per dozen.

LAMPS COMPLETE

No. 2 Burner, with 6-inch Fount and Chimney, complete Price each \$1.60

No. 3 Burner, with 7-inch Fount and Chimney, complete Price each \$2.25

No. 3 Burner, with 8-inch Fount and Chimney, complete Price each \$2.50

GERMAIN'S EGG TESTER

No. 3

For testing eggs for hatching; fits any ordinary size house lamp or the lamp furnished with the Cypher's and Queen Incubator. Price, No. 2, 45c ea.; No. 3, 50c each.

No. 2

SEARCHLIGHT EGG TESTER

This electric tester is the most simple and at the same time most efficient tester yet devised. By simply moving the tester over the rows of eggs, the searchlight effect on the

air cells of the egg illuminates the entire contents and as the germ always rises to the top it instantly and clearly appears in plain view. Weak or dead germs, blood-spots, cracked shells and clear eggs are all instantly detected. Price, \$5.00.

"SPIR-OL"

Celluloid Leg Bands Are Best, Because:—They are easily placed, easily distinguished, cannot come off, can be used over again, do not break, they are cheap. Colors, Black, White, Red, Yellow, Blue, Green, Purple, Light Blue, Maroon and Pink.

When ordering be sure to state size and breed of fowl.

Prices, postpaid, 15c for 12; 25c for 25; 40c for 50; 60c for 100; \$5.00 for 1000.

ROGERS POULTRY PUNCH

All Steel, Nickel Plated, Punches Clean Hole; is right size; will not bruise the foot. Price, 40c by mail.

TYCOS INCUBATOR THERMOMETER

No. 5775

Black oxidized brass scales, white filled figures and graduations, mercury tubes, angle pattern, flange turned over on upper edge to hook on wire or metal strip. Price, 75c each, postpaid.

No. 5770—Straight Pattern..... Each \$.75
No. 5783—Certified, same Pattern as No. 5774..... Each 1.00

No. 5792 BROODER THERMOMETER

When placed in a hole in top of the brooder or hover the scale can be read from the outside while the bulb of the thermometer is inside. Price each 75c.

TYCOS HYGROMETER

Millions of chicks die in the shell every year for the want of proper moisture conditions. The importance of a correct percentage of moisture during incubation has made the **Tycos Hygrometer** as necessary as the **Tycos Incubator Thermometer**. Neither takes the place of the other, but together they give the practical poultry raiser all the facts required for successfully regulating the heat and moisture of his incubators. The **Tycos Incubator Hygrometer** is not a regulator of moisture, but an indicator, showing (together with the **Tycos Incubator Thermometer**) exactly what the conditions are, so that if not correct they may be made so.

Standard grade **Tycos Incubator Hygrometer**, black oxidized brass scales, white filled figures and graduations, glass water cistern, silk wick, complete directions with each instrument. Price, \$1.75 each.

Extra Silk Wicks for Hygrometers, 15c each
Booklets on Incubator and Dairy Thermometers sent upon request.

PREMIUM INTESTINAL CLEANSER FOR POULTRY

Formula of A. M. Pollard, Former Extension Instructor in Poultry Husbandry at Delaware Agricultural College.

Intestinal worms are the cause of most of the diseases of poultry. This Cleanser does not expel the worms, but causes them to be digested, thereby retaining in the birds all of the elements previously taken from the birds. In expelling these worms all of the elements are lost.

Price, 35c per lb.; 5 lbs. for \$1.50.

BUHACH is an insect powder that will get rid of house flies, ants, bedbugs, fleas on dogs and cats, lice on chickens and rabbits—in fact it will drive out many insect pests. It is a necessity in every house, as it protects from loss and adds to the comfort and peace of the residents. In 25c, 50c and \$1.50 package s.

BAG BALM

A Great Healing Ointment

Bag Balm is a most effective remedy for chafed bags, cow pox, chapping, bunches, inflammation, chafing, extreme soreness and tenderness. It is invaluable in relieving any udder trouble. Also used for cuts and bruises. Fever spots are cooled and inflammation is allayed almost immediately. It keeps little hurts from getting big and is a great aid around the calving period.

Price, 60c per package.

KOW-KARE

Both need Kow Kare

Kow-Kare has positive medicinal qualities that act upon the organs of production and reproduction, making them function properly. It is widely used as a preventive of disease, and is especially effective in removing such ailments as Scouring, Lost Appetite, Bunches or Red Water. For the treatment of Abortion, Barrenness, Retained Afterbirth or Milk Fever it has no equal. Its use upon "poor milkers" will usually increase the milk flow from 10 to 20 per cent. Price, 65c and \$1.25.

Be sure and send 2 cents postage for Latest Edition of The Home Cow Doctor—FREE.

ARROW CARBOLINEUM

A single application of **Arrow Carbolineum**, however, will be sufficient to destroy and eradicate mites from a poultry house for a whole year or more. It kills every house or mite it touches, it can be used with a brush or a sprayer and will readily penetrate all cracks and crevices and thus reach the mites at close quarters.

We guarantee that one thorough application of **Arrow Carbolineum**, either by brush or sprayer, to the interior walls of a hen-house or barn, after a previous cleaning, and no matter whether they consist of wood, tar paper or plastering, will exterminate the vermin in same for a whole year.

Quarts, 65c; gallons, \$2.00; 5 gallons, \$9.00

INCUBATORS AND BROODERS

SOL-HOT BROODER

THE BABY QUEEN

No. 1—85-Egg Capacity
Each, \$26.00

New Improved Baby Sol-Hot Brooder—24 Canopy
A positive oil control. Reduced oil consumption.
Increased heat production. Automatic oil control.
A perfect, even heat distribution.

STYLE K QUEEN INCUBATORS

The Style K line of Incubators is not of the same high standard as our Queen line, in material nor workmanship, but they embody all the principles that have made the Queen line so successful and famous.

However, they are good substantial machines, built to sell at a lower price to people to whom price is an important consideration.

The regulator is the same as the Queen, except of lighter construction, and has a three-inch brass wafer.

No. 20—70-Egg Capacity
Each, \$17.75

All Copper Tanks and Heaters

Floor space, including lamp, 23x28 inches.

Egg tray, 16½x18½ in.
Shipping weight, 46 lbs.

This little machine is a wonder for the money. It is not so thoroughly constructed, nor so completely equipped as the regular Queens, but it is made of California Redwood, has a copper heating system, and a special Queen Regulator. It will serve the need of those who want to get into the poultry business on a small scale economically.

No. 21—130-Egg Capacity, Each, \$27.00
No. 22—220-Egg Capacity, Each, \$34.50

GRAVES ELECTRIC INCUBATOR

HOTKAPS

TRADE MARK

HOTCAPS are miniature hothouses, manufactured from wax paper, under which the seed of melons, tomatoes, peppers, etc., can be planted, thereby saving the cost of labor of transplanting. Can be set by machine or by hand. Young plants under HOTCAPS are protected from frost and insects and will mature more quickly than those transplanted.

A low premium crop insurance and a labor saver as well.

GOLDFISH, FOODS, ACCESSORIES

Write for Price List

Today the ornamental Fish has come into its own and no home decorative scheme is considered complete without colorful, fancy shaped Fish in attractive bowls or aquariums. Cleanly washed river sand or gravel and some ornamental piece of rockwork should be placed in the bottom. It is also necessary to have some fresh water plants that will grow underneath the water, in order to supply oxygen. Scavengers and snails should be included in the equipment as they clean up refuse that would otherwise decay and spread disaster through the aquarium.

DECORATIVE FISH

We have a wide assortment of ornamental fish in a varying degree of sizes and color, including Gold Fish, Telescope Eye Fish, Straight-tails, Dwarf Transparent, Calico and others. There is a great variation in the color of the Telescope Eye—some are all black, others are black and gold, gold and white, and blue-black and gold. The latter are called Calico fish. The Dwarf Transparent Gold Fish are exceedingly small and only grow to one inch in length. They are transparent and stay near the top of the water. Write for price list.

CATNIP MICE

A new plaything for the cat in the way of Catnip. The animal has a wonderful time playing with it, besides being of great health benefit. Price, 15c each.

CATNIP BALL

Its object is to afford amusement to and benefit the health of cats. In endeavoring to get the catnip it induces them to exercise. If the cat plays with it violently, it is saying as plainly as though it could talk that it desires CATNIP. Price, 20 cents each.

SUMMIT BRAND LOOSE CATNIP

Catnip is medicina] for all cats and where these pets are kept some should be on hand. Summit's Brand Loose Catnip is carefully selected and prepared from loose catnip leaves and tops. It is free from adulterations, dirt or foreign matter and is especially intended for making Catnip Tea. Price, 15c.

SPRATT'S CAT FOOD. A complete food for cats. Used at the leading cateries throughout the world and daily becoming more popular among the fancy. Cartons, 30c.

SPRATT'S CAT FOOD WITH PASTEURIZED MILK. Excellent for kittens and invalid cats. Prices, same as regular cat food.

SPRATT'S MALTED KITTEN FOOD. Thousands of kittens that are somewhat delicate at birth or that are without stamina die for want of proper food and nourishment. For these little fellows we strongly recommend this food. Price, 30c.

SPRATT'S FISH CAT FOOD. Use this as a change of diet, especially during the summer months. Prices, same as regular Cat Food.	
Spratt's Tonic and Condition Tablets	Each \$0.50
Spratt's Worm Capsules	Each .50
Spratt's Distemper Tablets	Each .75

GERMAIN'S PET SHOPPE

DOGS, PUPPIES, CATS, KITTENS, PARROTS, RABBITS, ETC.

Germain's maintain the largest, most sanitary, and complete Pet Stock Department on the Pacific Coast. Everything in our shop has been built for the comfort of the animals to keep them in a healthy condition. Our kennels are spotless and the shop equipped with the Vacuum Ventilating system. All these features insure the purchaser clean, healthy stock, absolutely free from disease. We have on hand constantly the largest supply of pet stock in this part of the country which consists of dogs and pups of most every known breed, fancy Persian and Angora cats and kittens, talking parrots that do talk, rabbits, guinea pigs, squirrels, chipmonks, tame white rats and mice, tame monkeys and many other pets too numerous to mention. We cannot give a lengthy description of each animal but must be brief; therefore, ask our customers to correspond with the manager in charge of this department for desired information of any breeds not mentioned

PUPPIES

AIRDALE TERRIER. This dog is of fairly recent creation. He is a sensible and companionable dog, game to the core and a fine guard. He has a well knit frame, with keen expression and wiry, weather resisting coat; can be kept in or out doors. Females \$10.00 to \$15.00. Males \$15.00 to \$25.00.

Boston Terrier. Or Boston Bull as they are sometimes called. Are a very keen and active dog, smooth coated, brindle in color with white markings, usually screw tail. A dandy house dog. Females \$25.00 to \$35.00. Males \$35.00 to \$50.00.

Cocker Spaniel. This dog is shaped like a miniature setter but is more merry and alert in expression and behavior. They come in many colors. Jet black, red, brown and parti-colors mixed with white. They make a wonderful house and duck dog. Females \$25.00. Males \$35.00.

Collies. The collie is a lithe, active dog and is remarkable chiefly for his intelligent, cunning, yet kindly outlook, his magnificent coat and the devotion he displays to his master. A wonderful dog for children. Females \$15.00. Males \$20.00 to \$25.00.

Fox Terrier. The wire hair fox terrier resembles the airdale excepting for size and color. They grow about sixteen inches tall, about twenty pounds in weight, white predominates with black or tan markings.

Make wonderful watch and house dogs. Females \$25.00 to \$35.00. Males \$35.00 to \$50.00.

The smooth coated fox terriers are the same dog as the wire hair excepting that the coat is smooth. Same disposition, etc. Females \$10.00 to \$15.00. Males \$15.00 to \$25.00.

Irish Terrier. Has the same characteristics as the Airdale only red in color and a trifle smaller. This dog is not plentiful, yet popular. Females \$25.00 to \$ 35.00 Males \$35.00 to \$50.00.

French Poodle. Usually pure white, curly coats with black eyes and nose. Weigh about five pounds when full grown. They are very intelligent and can be taught many tricks. Females \$15.00. Males \$20.00.

Esquimo Spitz. Are pure white, medium size, well built and cobby, covered with a thick fur. They have rather a small eye of dark color and convey a very intelligent and lively expression. The ears are erect, broad at the root and taper to a point, the tail is short and heavy coated and curled over the back. Very popular dogs. Females \$15.00. Males \$25.00.

PARROTS

Our selection of Talking Parrots cannot be excelled in quality and quantity. While we carry most all varieties such as the Double Yellow Head Mexican, Red Head Mexican, Amazon, African Grays and Pana-

mas, we do specialize on the Panama Parrot for many reasons. They are one of the hardiest birds and make the finest talkers of all talking birds and are usually finger tame. The following prices prevail on birds that we guarantee to talk within ninety days.

- Double Yellow Head Mexicans..... \$ 25 00
- Red Head Mexicans..... 15 00
- Amazon Parrots..... 25 00
- African Grays..... \$60.00 to \$100.00
- Baby Panamas..... \$35.00 to \$50.00
- Bee Bee or Dwarf Parrots..... \$10.00 ud

RABBITS

- Belgian Hares (Utility)..... \$2.00 each up
- Rufus Reds..... 3.00 each up
- Flemish Giants (Extra Heavy) \$15.00 pair up
- Chinchillas..... (Price on request)
- Dutch Black-Blue..... \$10.00 pair up

MISCELLANEOUS

- Guinea Pigs (Common Variety) . . . pair \$2.00
- Squirrels..... (Prices on request)
- Chipmonks (Striped Variety)..... each 2.00
- White Rats (Pink Eyes)..... each .50
- White Mice..... pair 1.00
- Tame Mice (All colors but white) . . . pair 1.50
- Tame Monkeys (Ringtails)..... \$50.00 up
- Tame Monkeys (Java)..... 35.00 up
- Tame Monkeys (Spider)..... 50.00 up

Persian and Angora kittens come in many colors such as Orange, Cream, Blue, Black, Brown Tabby, Silver Gray, light and shaded. Female \$10.00. Males \$15.00 and up.

SINGING AND DECORATIVE BIRDS

CANARY BIRDS

These beautiful birds are the favorite song birds and today no home is complete without a dainty cage and its joyful occupant. Their wonderful vocal powers make them desirable pets and one finds it also interesting and very profitable to raise them. They readily breed in cages or aviaries and one can easily care for them by following the directions given in our book. We carry in stock only the best of these—both male and female—and can quickly furnish them in any number desired.

THE ROLLER

Considered the finest singers among the canaries, these birds are bred and trained in the United States. The birds are handled only by experts who use bird organs to train the vocal powers. St. Andreasburg Rollers represent years of training of the canary's voice.

THE HARTZ MOUNTAIN WARBLER

These birds have been raised in the United States since the war. They rightly deserve their famous renown as a joyful and active singer besides possessing extraordinary vocal powers.

THE ENGLISH OR NORWICH CANARY

Bred for their beautiful plumage and size, as well as for their strong song, these birds make splendid pets and should be in every home. We always have on hand choice singers at \$15.00 and up. Safe shipment by express.

---	---	--	--	---	---

HADLEY (upper left). Deep velvety crimson, retaining its brilliancy during the whole year. Large, well-formed buds, and one of the most fragrant roses grown. Vigorous grower, bearing flowers on long stiff stems. Each 50c postpaid.

CLAUDIUS PERNET (lower left). Striking sunflower yellow, large, full and beautifully formed, with deep elongated petals. Long, pointed buds of exquisite shape, carried on long, stiff stems. The new yellow color keeps without fading even in warmest weather. Each \$1.25 postpaid.

IRISH FIREFLAME (upper right). Old gold, coppery-yellow, flamed with ruddy crimson, becoming fiery orange as the spiral bud develops. Strongly and deliciously perfumed and almost always in bloom. Each 50c postpaid.

CLIMBING LOS ANGELES (lower right). The most popular rose in the world in climbing form. Flowers somewhat larger than the bush type, displaying the same deep shades of flame pink with golden yellow shading at the base of the petals. Truly a rose without fault. Each \$2.50 postpaid.

One Each of These Four Varieties, \$3.95 Postpaid
